The Distinctive System

of The Scottish Provident Institution was designed to give maximum protection without sacrifice of the valuable right to participate in the Surplus.

At early and middle ages you can obtain a Whole Life Assurance of about £1300 with right to bonuses under the Distinctive System for the same premium as is charged elsewhere for £1000.

£100 at death with right to share in Surplus

Annual Premium	Age at Entry			
	25	30	35	40
Payable throughout Life	£1 11 8	£1 16 7	£2 2 11	£2 11 0
Limit of number using before age 65	1 13 7	1 19 6	2 7 7	2 18 10

The "Adequate Income" plan

supplements the ordinary Life Assurance Policy and in conjunction with the Distinctive System enables provision to be made of a larger income for dependants during a critical period than can be secured by other means.

All classes of Life Assurance and Annuity business are transacted

A Prospectus will be sent on application

The name and block will be familiar to the readers of WHITAKER now for 43 years. Just 50 years ago it was more particularly identified with the development of the IRISH woollen industry hence the picture at side, but for the last 30 years we have added successively to our departments the finest products of WELSH, SCOTCH and ENGLISH looms both mill and peasant work (as our trade became more world wide) cloths bearing a reputation for hard useful wear as against what are more usually seen and described as novelties of fashion designs mutant only for a season and often with fantastic names. We are content with the well known trade definitions of TWEEDS, HOMESPUNS, CHEVIOTS, WORSTEDS, SERGES, SAXONIES, CASHMERE, FLANNELS and these distinguishing classes may fairly cover all requirements for the various seasons purposes and climates in all parts of the world for man woman and child. We rarely identify our merchandise as not suited to the public demand nor do we attempt it. Appropriate concern built on a sure foundation doesn't need it our customers establish it abroad. We stock none but BRILLIANT woollens and of these IRELAND is still included in the Empire—W B

Also ENGLISH, SCOTCH, & WELSH.

(Schedule of our Standard Woollens.)

HOMESPUNS—Scotch and Irish, peasant-made from all districts; for country wear, sport, and travelling.

SCOTCH CHEVIOTS; for warm, rough suits, and overcoats

WELSH, IRISH, & SCOTCH TWEEDS; for country and sports wear, light, medium and heavy weights.

TWEEDS; for ordinary town wear; various weights and mixtures

WORSTEDS & SAXONIES; for business, & professional wear

SERGES; navy, grey, and black, rough, and smooth, all seasons.

CASHMERES; for tropical, and semi tropical wear.

FLANNEL TWEEDS; for light summer, and semi-tropical wear.

COSTUME TWEEDS; for ladies' country wear.

OVERCOATINGS; light, medium, and heavy.

MOTOR & TRAVELLING RUGS, 15/- to 50/-, in great variety and at competitive rates. All pure wool.

An outstanding stock of Scotch and Irish Hand and Frame Knit **PULLOVERS, CARDIGANS, SHAWLS, SCARVES**, etc

Also Golf, Shooting, and Fishing **STOCKINGS** and **SOCKS**—heavy, medium, and light, plain and fancy, all of real value and worth

Of all these goods sound BRITISH manufacture whether mill or peasant made we keep a great stock. They can be critically inspected and handled in bulk by the PUBLIC as well as by the TRADE. Quotations are of little worth without reference to the character and merits of a cloth as of any other merchandise that is the reason we advise any prospective customers to call at the warehouse when in London. When that is not possible we will submit patterns if a description of what is wanted is given not for a perfunctory request

LETTERPRESS PRINTING.

NO other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man in William Clowes who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £350.

From the first the business was progressively successful. The just enough of type for one day's work which compelled him at the beginning to run off on the hand press at night what he had set during the day was to increase the type for further service was very speedily multiplied. His single press and one journey man printer as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray & Co., and the Religious Tract Society for which the firm still print to this day.

The printing of newspapers by steam presses was introduced into the *Letterpress* office in 1834. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Facklins—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulhenny envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs. Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and

spent long days at the Duke Street printing works collecting his stories in proof.

When the Great Exhibition of 1861 was being organised, Messrs. Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no fewer than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to day.

Besides the Great Exhibition Messrs. Clowes carried out the printing in connection with all the South Kensington Exhibitions.

When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported the lawyers formed a committee with the object of providing their own reports and Mr. George Clowes, of William Clowes & Sons was consulted. When the project seemed unable to be carried on through lack of capital the firm offered to finance the publication to the extent of £10,000. The offer was accepted and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps however, the largest undertaking of all was the printing of the British Museum Catalogue which took twenty-seven years to do, and was full of foreign type.

As long ago as 1873 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets) that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically driven machinery this now constitutes one of the largest book printing establishments in Great Britain.

The relief of pressure on the London works was only temporary and increasing business necessitated, in 1897, the renting of additional land at Duke Street where another building was erected. On the expiry of the lease of the original premises in Northumberland Court this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language the firm has proved itself of innumerable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc. for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print craft on its technical side, and to day as modern printers their several establishments stand second to none.

NOTE.—"WHITAKER" for 1933 is published in two editions:—

720 pages, in Orange Paper Cover - - - 3s. net.

1008 pages, in Red and Green Cloth Cover - 6s. net.

1008 pages (Presentation Bindings).

PREFACE TO THE 65TH ANNUAL VOLUME. (1933.)

"WHITAKER," is published early in December in order that it may be available for transmission overseas before the end of the year. The 1933 edition is revised to the latest possible date, and contains all its usual features and many additional tables relating to Vital Statistics, Armaments, Social Services, Trade, Tariffs, Food Imports and World Production.

Interesting articles deal with the Hebrew and Muhammadan Calendars, and it is hoped next year to provide a similar explanation of the Complex Chinese Calendar.

Annual Summaries deal with The Year's Weather, Storms and Floods, Science and Invention, Literature, Art, The Drama, Films, Broadcasting, Gliding and other matters.

In order that the varied contents may be available for instant reference, the Index has again been enlarged and now consists of upwards of 150 columns, containing more than 25,000 references.

Many suggestions made by correspondents have been adopted, and the Editor-in-Chief is deeply grateful to his collaborators for their valuable assistance during the past year and hopes the result of their co-operation will encourage them to continue the work of preserving and increasing the usefulness of a book which has become so familiar to all who read or speak the language in which it is printed.

Correspondents are earnestly requested to note the *first* day of October as the *last* day for suggestions to reach the Office, at the address given below.

Wear

THE BURBERRY

—the one topcoat that is made to resist every kind of weather—rain, sleet, snow and bitter winds! The Burberry keeps its wearer safe, snug and warm. Proofed without rubber and self-ventilating. The Burberry is the most healthful topcoat it is possible to buy—a lifelong investment in comfort and security.

✓ ✓ ✓

Send for the Burberry Book, which tells the story of The Burberry and why it is the best overcoat that money can buy. Please mention "Whittaker's Almanack."

*The World's
Best Weatherproof*

BRITISH ASSOCIATION OF CHEMISTS.

THE PROFESSIONAL ASSOCIATION FOR ALL ANALYTICAL, CONSULTING, TECHNICAL, RESEARCH AND WORKS CHEMISTS, AND CHEMICAL PRACTITIONERS.

(Founded 1917.)

A few of the established activities:—

APPOINTMENTS BUREAU.—Employers requiring the services of fully trained and experienced chemists, or assistant chemists and works managers, technical experts and specialists, are invited to make free use of the Bureau. This very active department issues a weekly circular of all available vacant appointments, and advises on salaries.

LEGAL ADVICE AND ASSISTANCE.—Free to members in all matters of a professional nature requiring legal aid or advice. Several important precedents have been obtained.

UNEMPLOYMENT INSURANCE.—A contributory fund from which substantial benefits are paid to those who may become unemployed. Over £2,000 has been paid out in benefits.

LOCAL SECTIONS.—Social and other activities.

Further information and full particulars may be obtained on application to

C. B. WOODLEY, F.I.S.A., C.R.A.,

General Secretary, B.A.C., "Empire House," 175 Piccadilly, London, W.1.

Don't Wear a Truss

Brooks Appliance is a new scientific discovery with automatic air cushions that draws the broken parts together and binds them as you would a broken limb. It absolutely holds firmly and comfortably and never slips. Always light and cool and conforms to every movement of the body without chafing or hurting. We make it to your measure, and send it to you on a strict guarantee of satisfaction or money refunded, and we have put our price so low that any body, rich or poor, can buy it. Remember, we make it to your order—and it to you—you wear it—and if it doesn't satisfy you, you send it back to us and we will refund you money. That is the way we do business—always absolutely on the square—and we have sold to thousands of people this way for the past ten years. Remember, we use no salves, no harness, no ties, no fakes. We just give you a straight business deal at a reasonable price.

If in London or Manchester, please call. 11 letters and nurses always in attendance at both offices. Write at once for our Illustrated Booklet!

BROOKS APPLIANCE CO., LTD.,

(194B), 80, Chancery Lane, London, W.C.2

(194B), Hilton Chambers, Hilton Street Manchester, 1

MANUFACTURING MASONIC OUTFITTERS

Goldsmiths, Gold Lacemen and Embroiderers,
Ribbon Weavers and Spinners of Gold and
Silver Thread

GEORGE KENNING & SON

Offices and Manufactory: 1-4 Eagle Wharf Road, London, N. 1

Branches: Alder House, 1 Aldersgate Street, E.C.1;

16 Great Queen Street, W.C. 2

and at Liverpool, Manchester and Glasgow

Ribbon Factory at Coventry

Cuba	1,550,373,312	1,659,229,616	1,072,975,456
Peru	278,246,304	266,008,512	390,589,248
St. Domingo	413,176,064	531,863,584	338,738,060
Poland including Danzig	128,109,408	103,254,816	312,352,800
Germany	74,504,752	179,534,720	308,034,272
Other Countries	617,335,264	334,419,120	245,926,752
Total	4,585,345,632	4,161,215,856	3,981,263,552

England in 1930 3rd season produced some 423,000 tons of Sugar or 950,000,000 lb. In 1931 3rd the production has been put at 250,000 tons or 560,000,000 lb.

Milk (condensed)—From

	1929 cwt	1930 cwt	1931 cwt
All countries	405,387	402,967	483,579

This is the equivalent of 116,000,000 gallons of Milk (1 cwt = 34 gallons)

Milk Powder—From

	1929 cwt	1930 cwt	1931 cwt
All countries	263,048	250,400	322,652

This is the equivalent of 35,000,000 gallons of Milk (1 cwt = 100 gallons)

The total home production of Milk not fed to stock in England and Wales alone has been estimated at 1,137,000,000 gallons.

Potatoes—From

	1929 cwt	1930 cwt	1931 cwt
Channel Islands	1,285,439	1,033,263	910,854
Irish Free State	370,302	213,920	780,455
Germany	3,840	268,255	4,602,257
Netherlands	430,385	910,722	3,508,974
France	2,510,528	2,208,140	2,122,411
Spain	1,040,587	938,828	1,426,350
Other Countries	228,105	208,346	3,162,009

Total 5,869,186 5,781,574 16,653,210

The home production of Potatoes in England, Wales, Scotland and Northern Ireland on farms and allotments was returned as 4,459,000 tons in 1930. If we add 830,000 tons imported in the calendar year 1931 it points to a consumption of over 250 lb per head per annum (private horticulture besides).

Onions—From

	1929 cwt	1930 cwt	1931 cwt
All countries Spain &c	10,685,605	10,783,703	10,170,550

Tomatoes—From

	1929 cwt	1930 cwt	1931 cwt
Channel Islands	740,505	863,161	768,383
Canary Islands	1,218,040	1,393,997	1,295,266
Netherlands	610,545	665,071	730,533
Other Countries	122,383	129,872	122,254

Total 2,751,473 3,052,101 2,936,436

BOY SCOUTS (Incorporated)

FOUNDED in 1908 as a result of an experimental camp held by the Chief Scout the previous summer at Brownsea Island Dorsetshire the movement was organised by Lord Baden Powell GCMG, GCVO KCB Chief Scout to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self reliance inculcating loyalty and thoughtfulness for others teaching them services useful to the public and handicrafts useful to themselves and promoting their physical development and hygiene

The Movement (whose membership exceeds 2,000,000) has taken root in all parts of the British Empire and nearly every other country in the world—Imperial Headquarters, 25 Buckingham Palace Road, London, S W 1

THE GIRL GUIDES ASSOCIATION

A movement founded by Lord Baden Powell GCMG, GCVO, KCB Chief Scout, on the lines of the Boy Scouts and incorporated by Charter in 1915 while in the year 1923 H M the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character training them in habits of observation, obedience, and self reliance inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its device is to cooperate with educational and other bodies working to this end. The membership of the Movement now numbers over 2,000,000 all over the world, that of the British Isles alone being over 586,000. Imperial Headquarters, 27-29 Buckingham Palace Road, London, S W 1.

Ready Reference Calendar for 200 Years.

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding hours at the head of the columns of days below. For Example

To know on what day of the week Aug. 4 fell in the year 1924, in the table of years look for 1924, and in a parallel line under Aug., is 6 which directs to col. 6 in which it will be seen that Aug. 4 fell on Tuesday.

† 1752 same as 1772 from 1 to 14 to Sept. 2 from 14 to Dec. 31 same as 1752 (Sept. 2-13 were omitted)

NOTE — In England the change from the Julian System or Old Style to the Gregorian System or New Style was made in September 1752 when the 11 days 3rd to 13th inclusive were omitted and Wednesday Sept 2 was immediately followed by Thursday Sept 14. Other countries made the change at dates varying from 1582 to 1923. (See p. 161.)

If it is desired to look up a date after 1752 in Old Style, or before 1752 in New Style, it can be done by taking a date 700 years earlier in the first case, or 400 years later in the second case, e.g., 1923 in Old Style is the same as 1223, and 1582 in New Style is the same as 1982.

NOTES FOR THE YEAR 1933.

time of the rising which happens during that day, and the figures in the two following columns show the time of the setting and of the setting *which* *not follow that rising*. These sometimes happen after the midnight which ends the day, and in such cases the figures are in heavy type, so that it is to be remembered in using this table that these distinctive figures always indicate a time on the *morning of the day of its line*. A similar system is followed in the tables of the planets (see pages 85, 86, 87, &c.) In the ephemerides of the planets on page 3 of each month Italian figures are occasionally used (pages 108, 112, 116) to indicate the change of sign of the declination noted in the heading.

Double High-Water.—Among the Tidal-Constants on pages 128 and 133 it will be seen that for Southampton and some other places near the Isle of Wight two times of High Water are indicated, differing by two or three hours. This is the result of observation, but an explanation sometimes advanced that it is the effect of the combination of two tides one of which passes round the Island, the other arriving normally, is believed to be erroneous. In shallow water the main tidal oscillation generates a secondary oscillation of small range and half the period of the main oscillation, and normally in an estuary this tends to accelerate high water and to retard low water. In the neighbourhood of the Isle of Wight the normal relationship of primary and secondary oscillation is disturbed and the four maxima of the secondary tide become prominent at Southampton, and the four minima at Portland, so that at the former place there are double high waters and at the latter there are double low waters.

Time of High Water at the undermentioned Places—

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low bar with heavy rains in the counties drained by the Thames may cause a higher rise of the river and the low lying river-side districts to be flooded.

MORNING AND EVENING STARS

☿ MERCURY being at Superior Conjunction on the 7th is an Evening Star after that date, but is scarcely likely to be seen until the last few days of the month (v. March note.)

♀ VENUS rises less than an hour before the Sun. This planet is little visible until the end of the year.

♂ MARS and JUPITER are evening stars, rising about 8 o'clock, or earlier as the month goes on. Since they are approaching Opposition, both are still retreating or moving from left to right. Mars the more rapidly, so that it is leaving its brighter neighbour. Magnitudes, Mars -0.4 to -1.2, Jupiter -2.0.

♂ SATURN rises in the late dawn, and is not likely to be seen.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 55m. (Civil twilight ends 12h. 24m. Night begins 10h. 30m. The length of the Day is 10h. 50m.

Mar. 1. Mars in Opposition. Least distance from Earth (Mar. 4) 66,678,000 miles.

Mar. 6. Mercury at Greatest Elongation. 18° E.

Mar. 9. Jupiter in Opposition. Least distance from earth (Mar. 10) 41,908,000 miles.

Mar. 11, 24. Mars in conjunction with J. 6° 4' N.

Mar. 11, 23h. Jupiter in conjunction with J. 2° 3' N.

Mar. 21, 24. The Sun enters the Sign Aries (*Equinox*). Beginning of the Tropical Year.

Mar. 22, 24. Saturn in conjunction with J. 2° 5' N.

Mar. 23. Mercury in Inferior conjunction.

Mar. 25, 16h. Venus in conjunction with J. 9° 4' S.

Mar. 25, 17h. Mercury in conjunction with J. 0° 0' 9" N.

The Zodiacal Light may be seen after sunset in the latter half of this month.

In this month the Mornings increase 6m.; the Afternoons 5m.

Constellations near the Meridian at 22h. Gemini, Canis Minor, Monoceros, Argos, Lynx, Cancer, Hydra, Leo, Crater.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Mars and Jupiter.—Because of the nearness of the dates of opposition shown above, these two planets are neighbours in the sky for an unusually long period this year. Mars and Jupiter are in heliocentric conjunction, or in the same straight line drawn from the Sun every 800 days (about), and since the Earth is usually not in that line, the general case is that Mars is seen to approach Jupiter from the west and pass it, remaining near it for only a month or two. But when an exterior planet is in and near Opposition, it *retrogrades* or apparently moves from east to west because the movement of the Earth is greater than that of the planet. Consequently, in the circumstances of this year these two planets perform a backward and forward movement which lengthens the period of their companionship. At the beginning of this year Mars moving eastward

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 2h. 35m. Civil twilight ends 2h. 28m. Night begins 2h. 3am. The length of the Day is 12h. 53m.

Apr. 4. morn. Eclipse of Jupiter's satellite IV. See p. 138

Apr. 6. aft. Occultation of Regulus, mag. 1.3, by Δ . See p. 138.

Apr. 7. 3h. Mars in conjunction with Δ . 5° N.

Apr. 8. 2h. Jupiter in conjunction with Δ . 11° N.

Apr. 13. Mars at a stationary point.

Apr. 18. 12h. Saturn in conjunction with Δ . 12° N.

Apr. 20. Mercury at greatest elongation 27° W.

Apr. 20. aft. Eclipse of Jupiter's satellite IV. See p. 138.

Apr. 21. Venus in superior conjunction.

Apr. 22. 12h. Mercury in conjunction with Δ . 8° S.

Apr. 25. 12h. Venus in conjunction with Δ . 6° S.

In this month the Mornings increase 6m.; the Afternoons 48m. Constellations near the South meridian at 2h.: Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

April 15. Sun's semidiam. in Transit, 1m. 4.76s. of Mean Time.

The Date of Easter. Easter Sunday was on April 16 as it is this year, in 1911 and in 1925; the next occasion if the present system of fixing the date continues will be in the year 1995, 66 years hence. This date is one of the three most frequent at the period of time now current. In the list of dates from 1583 to 2000, March 31, April 11 and April 16 each occur 26 times.

Some Curiosities of the Calendar.—It will be seen in a Table on page 130 that there will not be a Full Moon in February of next year, 1934. This is sometimes spoken of as being a very rare occurrence, but actually it happens 34 times in the 728 years between 1228 and 1995 inclusive, or on the average once in every 21 or 22 years. This is a somewhat less rare event than the occurrence of five Sundays in February, which happens when the dominical letters of the year are D.C., 13 times in four centuries, and occurs 23 times in the period above specified. A rarer event than

MORNING AND EVENING STARS.

♂ MERCURY passed through inferior conjunction on March 23, and is therefore west of the Sun and a morning star, but though it is at greatest elongation on April 20, it rises about half-an-hour only before the Sun and will not be seen.

♀ VENUS, being at superior conjunction on April 21, rises and sets nearly with the Sun throughout the month.

♂ MARS and JUPITER are striking objects in the southern evening sky, whilst the brilliant stars of the winter group make a splendid display farther west. Their positions change little during the month. Mars is near Regulus. Magnitudes, Mars = 0.5 to + 0.2, Jupiter = + 0.2 to - 1.6.

♂ SATURN is coming into view as a morning star.

5	3 9	6 43	12 17

either of these is the occurrence of February without a Full Moon in a leap year, which happened in 1682 and may not again until 2996, though it is difficult to speak with certainty. A coincidence that may be considered the rarest event in the calendar seems to be the occurrence of five Sundays in February in a year when Easter falls on its latest date, April 25. In the Julian Calendar this conjunction of events occurs once in each Easter cycle of 532 years, and it did so in 1732. In the Gregorian Calendar it has not yet occurred, and will not until 2964. Between then and 2964 it will happen eight times in the 132 years.

after which there is a gap of 1208 years before 2082, when it is again due. (S. B. Gaythorpe in the Brit. Ast. Assoc. Journal, July, 1922.)

Configurations of Jupiter's Satellites at noon, gm. (See p. 116)

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 4m. Civil twilight ends at 2h. 12m. Night begins 2h. 53m. The length of the Day is 14h. 45m.

May 4. 27h. Mars in conjunction with Δ . δ 5° N.

May 5. 12h. Jupiter in conjunction with Δ . δ 2° N.

May 10. Jupiter at a stationary point.

May 15. 22h. Saturn in conjunction with Δ . δ 0° 8' N.

May 16. 20h. Mars and Neptune in conjunction. δ 0° 8' N.

May 21. 12h. Uranus in conjunction with Δ . δ 5° S.

May 24. 0h. Mercury in conjunction with Δ . δ 5° S.

May 25. 7h. Venus in conjunction with Δ . δ 5° S.

May 28. Mercury in superior conjunction.

A meteor shower, believed to have relation to Halley's comet, diverging from a point in Aquarius, sometimes appears in the mornings from May 2-6.

In this month the Mornings increase 43m.; the Afternoons 44m.

Constellations near the S. meridian at 22h.: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

May 15, Sun's semidiam in Transit, 12m. 6^{sec}. of Mean Time.

May 16. Uranus rises 3h. gm., sets 10h. 49m. Neptune rises 12h. 10m., sets 1h. 53m.

The Gyro-compass. - If a heavy wheel be mounted on an axle in bearings that are free to move without any constraint from mechanical connections, and this be made to rotate rapidly, its plane and therefore the axle about which it turns will retain fixed directions in space. In other words, the plane of the rotating wheel will remain parallel to itself. This, which may be quoted as the gyroscopic principle, is the basis of the action of an instrument brought into use for sea and air navigation comparatively recently. The gyro compass appears outwardly as a card marked with the points of the compass in a binnacle, but, unlike the magnetic compass which it so far resembles, the north of the card points to the geographical north and not to the magnetic. This results from a combination of the gyroscopic principle with the action of gravity. The card is attached to a wheel turned by an electric motor set in bearings that float in mercury or are other-

Time of High Water at the undermentioned Places—

wise supported so that they have the utmost freedom of motion. Let it be supposed that this wheel be set rotating with its plane vertical and in the north and south direction. It would retain this direction, but the Earth turning from west to east displaces the horizon plane beneath it and tends to set the axle of the wheel out of level. Gravity at the same time tends to restore it to level, and the conflict of these two forces sets up what is known as a precessional motion that rotates the axle in a horizontal plane.

This Precessional motion may be illustrated by simple experiment with a gyroscopic top. If the original plane of the wheel had been east and west instead of north and south, the rotation of the earth would not tend to put the axle out of level, and it is to this position that precession rotates the apparatus.

MORNING AND EVENING STARS

☿ MERCURY is above the horizon almost wholly in daylight hours.

♀ VENUS, having been in superior conjunction on April 21, is not far to the east of the Sun, and sets later than that body by less than an hour even at the end of the month.

♂ MARS and ♃ JUPITER, though both are becoming less bright, are still prominent in the evening sky. Mars is approaching Jupiter rather rapidly. Magnitude, Mars +0.2 to +0.7. Jupiter -1.6 to -1.6.

♄ SATURN rises an hour or two after midnight in the south-east below Aquila and Vega.

Configurations of Jupiter's Satellites at each noon. (See p. 112)

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 22h. 3m. There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on June 1 is 16h. 14m. Its length is nearly 16h. 34m. from the 19th to the 24th.

June 2, 28 h. Mars in conjunction with γ . δ 2° N.

June 1, 20h. Jupiter in conjunction with γ . η 3° N.

June 4, 21h. Mars and Jupiter in conjunction. δ 0° 3' S.

June 8, 16 h. Mercury and Venus in conjunction. γ 1° 10' N.

June 12, 5h. Saturn in conjunction with γ . η 0° 5' N.

June 21, 22h. Sun enters the sign Cancer. Solstice.

June 24, 14h. Venus in conjunction with γ . η 2° S.

June 25, 6h. Mercury in conjunction with γ . δ 2° S.

June 26, 22h. Eclipse of Jupiter's Satellite IV. See p. 128.

June 29, 8 h. Jupiter in conjunction with γ . η 3° N.

June 30, 2 h. Mars in conjunction with γ . δ 3° N.

In this month the Mornings increase about 7m. up to the 19th, and then decrease 4m. The Afternoons increase about 14m. up to the 24th, and then decrease slightly.

Polar Lights.—A description of the Aurora Borealis, which is the subject of much study at the present time, and some facts concerning it, will be found on page 122. The phenomenon is rarely seen in low and middle latitudes, but the frequency increases in proceeding to the Poles, and, moreover, if the numbers seen in a given time at different places be tabulated and curves of equal frequency formed, it is found that these centre on the magnetic pole rather than on the geographical. The association of Aurora with earth magnetism has been long recognised. The near agreement between the direction of the auroral rays and the local direction of a freely poised magnetised needle and by the parallelism in time of occurrence and intensity of aurorae with magnetic disturbances and storms supply further evidence on the point. A recent observational discovery of importance is that the specially high aurorae seen in the west after sunset, or in the east before sunrise, are in the part of the atmosphere beyond the Earth's shadow still traversed by the

Time of High Water at the undermentioned Places—.

MORNING AND EVENING STARS

☿ MERCURY is at greatest eastern elongation on July 2 and is an evening star. At 6 o'clock on June 25 it will be in the W N W at an altitude of 40° degrees, Venus being more to the north and lower. It is doubtful however whether these planets will be seen in the strong twilight.

♀ VENUS will set rather more than an hour after the Sun throughout the month, nearly in the north-west.

♂ ♃ MARS and JUPITER will be in conjunction on June 4. At 6 o'clock in the evening of that day Mars (mag + 0.8) will be almost directly below Jupiter (mag - 1.6) separated from it by a distance less than a diameter of the Moon. The Moon at first quarter will be in the neighbourhood of these two planets in the evening of the 1st and again on the 25th.

♂ ♄ SATURN now rises before midnight. Magnitude +0.8 to +0.6.

sun's rays. On the theoretical side Birkeland and Stormer have developed the hypothesis that the aurora is due to electrically charged particles discharged from the Sun and deflected by the Earth's magnetic field towards the polar regions from which is deduced the existence of the auroral zones round the north and south poles and many other of the observed features. But according to Schuster the effect of the electrostatic forces should be taken into account as well as the electro-magnetic in guiding of the particles. This may be difficult but it is possible that present ideas will find a place in some further discussion (Prof. A. Chapman, Brit. Soc. Guild lecture).

DAY OF

Fasts and Festivals.

Remarkable Days—Events.

SUN'S LONGITUDE 120° 0' 23d. 24.

THE SUN

DAY

M. Light and Dark W.

I	S	DOMINION DAY, Canada (1867). The Somme, 1916.	Rises		Sets		of the Year.	to end of Year.

air, and that to understand our own weather the origin of these masses in polar and equatorial regions must be traced out. To effect this sporadic observations are not sufficient, but simultaneous and continuous observations must be made in all parts of the polar regions. At about eight miles above the surface of the earth in the latitude of England, the temperature no longer decreases with height but becomes nearly constant for about another 30 miles, the region of uniform temperature being called the stratosphere. It is known that the thickness of the stratosphere decreases as it recedes from the Equator north and south. It is possible that this may be shown to be the case as far as the Pole.

Jupiter is in conjunction with Saturn on September 27. Because the planet is above the horizon almost wholly in daylight hours, the satellites are not likely to be visible from the middle of August until the middle of October.

See note, p. 116.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

August 2. Day breaks at 3h. 30m. Civil twilight ends at 2h. 43m. Night begins, 2h. 45m. The length of the day is 12h. 23m.

Aug. 5. Saturn in opposition. Distance from Earth 865,324,000 miles.

Aug. 5. 20h. Saturn in conjunction with J. 11° 5' N.

Aug. 11. 23h. Uranus in conjunction with J. 11° 8' S.

Aug. 12. Occultation of ϵ Arietis (double star) by the J. See p. 130.

Aug. 17, 12h. Venus and Jupiter in conjunction. 9 a.m. S.

Aug. 18. Mercury at Greatest elongation. 19° W.

Aug. 19, 24h. Mercury in conjunction with J. 0° 3' S.

Aug. 21. Annular Eclipse of the Sun. Invisible at Greenwich. See p. 138.

Aug. 23, 24h. Jupiter in conjunction with J. 11° 4' N.

Aug. 24, 24h. Venus in conjunction with J. 9° 4' N.

Aug. 26, 7h. Mars in conjunction with J. 0° 5' N.

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 26th to the 12th. The Moon is at its last quarter on the night of the 26th, which may be a slight hindrance to their visibility.

In this month the Mornings decrease 47m., and the Afternoons 59m.

The Upper Atmosphere.—Since the First International Polar Year transmission of what may be called "wireless waves" has become a branch of science, and it has been found that there is a difficulty in transmitting radio-signals over the Polar regions which is believed to be connected with the electrical conditions of the upper atmosphere in these regions, and to investigate this special point a British expedition is located at Tromsø in Norway, to make observations simultaneously with those mentioned on p. 288.

A method of investigation is to project wireless waves of varying frequency vertically upwards. These are reflected back to earth probably by an electrified layer in the upper atmosphere, and by

Time of High Water at the undermentioned Places—

MORNING AND EVENING STARS.

☿ MERCURY rises before the Sun throughout August, and is at greatest western elongation on the 18th. It is more likely to be seen after maximum elongation than before. At 4 a.m. on August 20 Mercury will be placed nearly in the E.N.E. at altitude between 6 and 7 degrees.

♀ VENUS still sets in the twilight. It moves through Leo into Virgo and makes a close approach to Jupiter at mid-day of the 17th. Magnitude -3.4.

♂, ♃ MARS and JUPITER are above the horizon for an hour or two after sunset. Jupiter may perhaps be seen with Venus in the twilight nearly due west. Mars is near Spica on the 13th. Magnitudes, Mars +1.2, Jupiter -1.2.

♄ SATURN is in Opposition on August 5, and is then above the horizon throughout the night hours. Magnitude at Opposition +0.4.

timing the return of the wave and observing its characteristics it is possible to deduce the density of the electrification and its height. Experiments in temperate regions show an electrified layer at a constant height of about 50 miles, known as the Kennelly-Heaviside layer, that reflects long and medium wave-lengths, but allows short waves to pass to a layer about 100 miles above the surface, known as the Appleton layer, which reflects them. It is believed that these layers are made conducting by something that comes from the Sun, but whether it is ultra-violet light or electrical particles emitted is not yet known.

 ● Last Quarter 11 21 30' 9"
 ● New Moon 19 28 20' 9"
 ● First Quarter 26 15 36' 3"
 Apogee 12d. 9' 2h. 251,200 miles.
 Perigee 23d. 10' 5h. 259,650 "
 Mean Longitude of Asc. Node, Sept. 1, 308° 2'.

RAIN FELL AT GREENWICH IN SEPT. 1933, on 25 days; total fall 2.26 inches; above the average by 0.21 inch.

MONTHLY NOTES.

September 1. Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins. Partridge shooting begins.

21. Jewish New Year (A.M. 5594).
 22. Sheriffs of London to be sworn in.
 29. Lord Mayor of London elected.
 30. Yom Kippur (Day of Atonement).

Quarter Sessions to be held within the period of 22 days immediately preceding or immediately following Sept. 29.

1923

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h 7m. Civil twilight ends at 12h 33m. Night begins 22h 53m. The length of the Day is 12h 33m.

Sept. 2, 12h. Saturn in conjunction with γ . $2^{\circ} 7' N$.

Sept. 7, 22h. Uranus in conjunction with γ . $4^{\circ} 8' S$.

Sept. 11. Mercury in Superior conjunction.

Sept. 20, 22h. Jupiter in conjunction with γ . $4^{\circ} 4' N$.

Sept. 20, 12h. Mercury in conjunction with γ . $0^{\circ} 4' N$.

Sept. 22, 22h. Venus in conjunction with γ . $9^{\circ} 4' N$.

Sept. 23, 12h. Sun enters the Sign Libra (*Aquinoz*).

Sept. 23, 12h. Mars in conjunction with γ . $6^{\circ} 5' N$.

Sept. 27. Jupiter in conjunction.

Sept. 29, 6h. Saturn in conjunction with γ . $2^{\circ} 7' N$.

In this month the Mornings decrease 47m.; the Afternoons, 1h. 6m.

Constellations near the S. meridian at 22h.: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

Sept 16 Sun's semidiam in Transit, 1m. 32s of Mean Time.

Infra-Red Photography.—Newton showed by experiment that white light or sunlight is made up of light of various colours, and that by means of a prism there can be formed the spectrum or band of colours ranging from violet at one end to red at the other, each colour being the effect of rays of a particular wave-length. This is all that the eye can see, but it is now known that beyond the violet is an ultra-violet region, and beyond the red an infra-red, both invisible but having special properties. The violet end of the spectrum specially affects the ordinary photographic plate, whereas the red end of the spectrum has little effect of that kind. The ultra-violet and infra-red rays are, however, both capable of acting on suitably sensitised photographic material, and in particular the discovery of a new dye by the Ilford firm has made it possible to prepare plates sensitive to the infra-red that can be used with good effect. Moisture, vapour and dust in the air scatter light. They scatter red light less than blue light, and infra-red less still. It is this scattering that hinders visibility to the eye and spoils photography. If, however, the infra-red

that are invisible to the eye

says only are used there is less scattering and consequently improved photographs can be taken by passing the light through a lens-filter which obstructs violet and light of other colour permitting only the infra red rays to reach the plate which is made sensitive to that end of the spectrum. Long distance photography with a long focus lens and a filter consisting of a dyed gelatine film which permits only infra red light to pass combined with a plate sensitive to infra red light is now practised with great success. Views of the French coast from Dover, and the Isle of Man from Cumberland, are recently published examples. With such plates it is possible to photograph objects in a room lit by infra red light only that are invisible to the eye. An electrically heated iron can be photographed in a dark room

MORNING AND EVENING STARS

☿ MERCURY at Superior Conjunction on the 11th is not to be seen as a morning or evening star throughout the month

♀ VENUS is an evening star setting about an hour after the Sun south of the west point. Magnitude - 3.5

♂ MARS lingers in the evening sky setting about an hour and a half after the Sun at the end of the month, but will not be conspicuous

♃ JUPITER is in conjunction with the Sun on the 27th and its apparition as an evening star has come to an end

♄ SATURN, retrograding slowly in Capricornus, will be seen low down in the south and south west from twilight to midnight

PHASES OF THE MOON.

○ Full Moon ...	3d. 17h 7 m.
☾ Last Quarter ...	11 16 45.5
● New Moon ...	19 5 44.7
☾ First Quarter ...	23 22 20.7

Apogee 10d. 4 h 21.350 miles.
Perigee 2d. 0 h 26.850 "

Mean Longitude of Asc Node, October 1, $306^{\circ} 27'$.

RAIN FELL AT GREENWICH IN OCT., 1932,
on 8 days; total fall 0.74 inch; below the
average by 1.79 inches.

MONTHLY NOTES.

October 1. Latest day for receiving corrections
for next year's "WHITAKER."—Quarter Sessions
to be held within the period of 21 days im-
mediately preceding or immediately following
Sept. 29 last.—Pheasant shooting begins.

3 Harvest Moon.

5 Feast of Tabernacles.

8 Summer Time ends 2 A.M. (G.M.T.).

22 Fire Insurances must be paid.

24 Borough Councillors to be nominated.

29 Turkish National Holiday.

1933.]

OCTOBER TENTH MONTH.

Configuration of Jupiter's Satellites at 4h 45m. (See p. 112.)

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 5m. Civil twilight ends at 2h. 5m. Night begins, 10h. 30m. The length of the Day is 12h. 36m.

Oct. 13, morn. Occultation by the ♀ of Cancri, mag. 5.5, and several fainter stars of the constellation. (See p. 130.)

Oct. 14, 11h. Venus and Mars in conjunction. ♀ 1° 2' N.

Oct. 18, 4h. Jupiter in conjunction with ♀. 1° 5' N.

Oct. 19. Uranus in opposition. Distance from the Earth, 1,757,160,000 miles.

Oct. 20, 5h. Mercury in conjunction with ♀. ♀ 5° N.

Oct. 22, 7h. Mars in conjunction with ♀. ♀ 4° N.

Oct. 23, 11h. Venus in conjunction with ♀. ♀ 2° N.

Oct. 25, 12h. Saturn in conjunction with ♀. ♀ 5° N.

Oct. 28. Mercury at greatest elongation 24° E.

In this month the Mornings decrease 5m., and the Afternoons 1h. 37m.

The Zodiacal light may be seen before dawn in the latter part of this month when the Moon is absent from the early morning sky.

Constellations near the N. meridian at 2h.: Delphinus, Equuleus, Aquarius, Capricornus, Pegasus, Andromeda, Pisces, Pleiades, Australis, Cetus.

Oct. 12. Uranus rises 37h. 5m., sets 7h. 3m. Neptune rises 2h. 45m., sets 16h. 14m.

Earthquake Recording.—Earthquakes are believed to be a kind of fracture caused by the breakage of the Earth's substance under a growing strain. There is no very certain method of finding the depth at which this happens, but it seems to range between 50 and 450 km. An earthquake sets up waves in the substance of the earth that traverse the whole globe. There are three principal types of waves: a thrust wave known as the "primary," which travels most rapidly; a transverse secondary wave, and a third of a gravitational character. It is possible to detect this wave movement, even though it may be not more than a twenty-five thousandth part of an inch at places far removed from the fracture, by means of an instrument called a

Selsomograph, of which the Milne-Shaw is the approved pattern much in use, the essential feature being a boom, which may be likened to a gate hanging on a gate-post out of plumb, and therefore takes up a new position if the supporting post does. A difficulty in the recording arises in the choice of a site. Local peculiarities such as tilting of the ground due to ocean tides near a coast line, vibration due to traffic, either vehicular or pedestrian, may disturb the instrument and obscure the desired record. Somewhat unexpectedly it has been found that a site in a London store on a floor 54 feet above the street is not unsuitable. The building contains 120 columns, each standing on a block of concrete

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 00m. Civil twilight ends at 7h. 29m. Night begins 12h. 28m. The length of the Day is 9h. 38m.

Nov. 1, 8h. Uranus in conjunction with Δ . $4^{\circ} 5' S$.

Nov. 3, aft. Occultation by the Δ of several stars of the Pleiades group. See p. 129.

Nov. 15, 6h. Jupiter in conjunction with Δ . $1^{\circ} 6' N$.

Nov. 15-19. Possible display of Leonid meteors. See below.

Nov. 17, 23h. Mercury in conjunction with Δ . $5^{\circ} 5' N$.

Nov. 22. Mercury in inferior conjunction.

Nov. 22, 12h. Mars in conjunction with Δ . $8^{\circ} 3' N$.

Nov. 22, 12h. Venus in conjunction with Δ . $9^{\circ} 0' S$.

Nov. 22, 20h. Saturn in conjunction with Δ . $1^{\circ} 0' N$.

Nov. 25. Venus at greatest elongation. $47^{\circ} E$.

In this month the Mornings decrease 49m.; the Afternoons 38m.

Constellations near the S. meridian at 22h.: Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus

Nov. 12. Uranus rises 12h. 17m., sets 4h. 53m. Neptune rises 12h. 49m., sets 12h. 14m.

The Leonid Meteors.—It is unnecessary to tell again the story of the appearances of these November meteors (see *ibid.* 1932, p. 44), but it is inferred from them that an orbit which may be visualised as an immensely thick cable or tube bent into the shape of an oval nearly a million miles long encloses the Sun and stretches from the orbit of the earth to beyond that of Uranus. Small bodies that are seen as meteors are moving round this orbit, each completing the whole circuit in about 33½ years. In most parts they are sparsely scattered, but at one point there is a large dense cluster. The orbit intersects that of the Earth at the point where the Earth is in the middle of November, and consequently in November of every year the Earth and some of these small bodies meet at the point of intersection

which is called the node and shooting stars are seen. Generally there are only a few, but when the cluster comes to the node there are many, and this is the year when that should happen. The cable or tube representing the orbit is very thick, and the earth takes some days to pass through it and meteors are seen for several nights. As the cluster is long, profligate showers may be seen in two consecutive years. Because there was no display in the years 1899 or 1900 it was inferred that the orbit had been displaced, and no longer met that of the Earth. There is a certain comet known as Tempel 1866 I, which is believed to be the virtual progenitor of the Leonid meteor stream because the orbits show much resemblance, and a possible displacement of the meteor orbit may be inferred by considering that of the comet's orbit. A displacement may shift the node on the Earth's orbit so that the display

MORNING AND EVENING STARS

☿ MERCURY towards the end of the month Mercury rises about an hour and a half before the sun, and may perhaps be then seen shortly before 7 o'clock in the south east by east.

♀ VENUS will be low down in the south west in the twilight and early evening setting later and growing brighter night by night. A close conjunction with the moon on the night of the 26th will be noted. Magnitude - 3.8 to - 4.1.

♂ MARS is still above the horizon for nearly 2 hours after sunset.

♃ JUPITER is conspicuous in the late morning sky. It is approaching Spica. Magnitude - 1.2 to - 1.3.

♄ SATURN is to be seen in the early evening sky, setting about 9 o'clock at the end of the month.

Continued on p. 126.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 45m. Civil twilight ends 5h. 45m. Night begins 7h. 57m. The length of the Day is 2h. 5m.

From Dec. 18 to 25 the length of the Day is about 7h. 45m.

Dec. 6. Mercury at greatest elongation. 21° W.

Dec. 12, 19h. Jupiter in conjunction with J. 1° 6' N.

Dec. 15, 24h. Mercury in conjunction with J. 0° 6' N.

Dec. 18, 23h. Mars in conjunction with J. 0° 2' N.

Dec. 20, 7h. Venus in conjunction with J. 0° 7' S.

Dec. 20, 24h. Saturn in conjunction with J. 1° 0' S.

Dec. 21, 12h. Venus and Saturn in conjunction. 0° 3' S.

Dec. 22, 7h. Sun enters the Sign Capricornus. Solstice.

Dec. 23, 24h. Uranus in conjunction with J. 1° 0' S.

Dec. 31. Venus at greatest brilliancy.

In this month the Mornings decrease 27m, the decrease being continuous throughout the month. The Afternoons decrease 4m. up to the 13th, and then increase 9m.

may come later than hitherto expected, or it may cause the meteor orbit to cut the plane of the ecliptic at a point within or without the Earth's orbit. It has been found that the orbit of the comet now passes within that of the Earth, but not sufficiently so as to preclude the possibility that the Earth will pass through the stream. This, however, is subject to alteration, and it is not to be asserted that a display is certain. These meteors diverge from a point in the constellation Leo, which rises about 10 p.m., so that they may be looked for from that time. Since the moon is now this year on November 17, there will be little moonlight on the nights when the meteors are expected to interfere with their observation. It was concluded by Mr. B. V. Marsh of Philadelphia, from the observations in 1866, that there are actually three streams, and that the densest group of meteors is flanked on either side by more tenuous groups with vacant spaces between; the

Earth being about $4\frac{1}{2}$ hours in the central dense stream about 6 hours in the vacant spaces, and 12 or 13 hours in each of the outside streams. This hypothesis, known as Marsh's Little Shower, requires verification by discussion of the observations in different longitudes.

Continued from p. 121

12 feet by 12 feet by 6 feet, which rests on the Blue Clay 42 feet below ground level. In spite of the fact that thousands of persons walk daily through the building and thousands of vehicles pass outside, it is found possible to detect these minute vibrations arising from causes at places thousands of miles away.—J. J. Shaw, at Brit. Assoc. Meeting, 1932.

MORNING AND EVENING STARS.

☿ MERCURY is at greatest western elongation on December 6, and will be in the south east at nearly 20 degrees altitude in the mornings before and after that date.

♀ VENUS is a bright evening star to be seen in the early twilight at altitude about 25 degrees. Magnitude at greatest brilliancy, December 21—4.4.

♂ MARS is still in the evening sky for about two hours after sunset low in the south west.

♃ JUPITER, rising two hours after midnight in the middle of the month, is a prominent object of the morning sky. Magnitude—1.4 to -1.5.

♄ SATURN will be seen in the early evening sky. It will be near Venus about the 21st. Magnitude +1.2.

BRING THE SECOND YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 24 AND 25 OF KING GEORGE V.

Calendar Elements and Dates for the Year.

Golden Number	XVI	Walt Sunday	May 20
Epoct	14	Birth of Queen Mary (1867)	" 26
Solar Cycle (Year of)	11	Trinity Sunday	" 27
Roman Indiction (Year of)	12	Corpus Christi	" 31
Domical Letter	G	Union Day, South Africa	" 31
Julian Period (Year of)	6647	Birth of King George V. (1863)	June 3
Julian Day, Jan. 1 (begins at noon)	2,427,439	Birth of Prince of Wales (1894)	" 23

Jan. 2. Earth in Perihelion.
Distance from Sun's centre
92,344,000 miles

Venus is an early evening star during this month, setting about an hour and a half after sunset at its end. Jupiter is a bright object of the morning sky. Mars and Saturn are above the horizon in the south-west to west for an hour or two after sunset, and will be in close conjunction on January 20. Mercury will not be visible this month.

In 1934 there will be two eclipses of the Sun and two of the Moon. A Total eclipse of the Sun about midnight of February 13 G.M.T. will be visible mainly from the western part of the Pacific, and an Annular eclipse on August 10 from South Africa, North of Cape Colony. The lunar eclipses on January 30 and July 26 are both partial, and the second of them invisible at Greenwich.

RISING, SOUTHING, and SETTING of PLANETS at intervals of Seven Days. (Noon = 12h.)

Tidal Constants.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the appropriate Time of High Water at the Standard Port (as shown on pp 85, 89, etc.) and adding thereto the quantities annexed. The time thus found will be Greenwich Time for British, Irish, French and Belgian Ports, and Amsterdam Time for Netherlands Ports. The rise of the tide at Springs and Neaps is given in the last two columns. An * denotes Range of Tide.

134 Tables for Finding the Times of Sunrise and Sunset.

This double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 90° N and 90° S.

To use the table. In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found figures which added to *ra*, give the *local apparent time of sunset*. Subtracting these quantities from *ra* will give the *local apparent time of sunrise*. To obtain from this the *mean time*, the equation of time for the day in question which is given on the second page of each month, must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and vice versa.

If the figures are required for a declination by latitude falling between two arguments of the table, they may be found by proportion. The effect of refraction is included.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack (and similarly of moonrise and moonset) are the times when the centre of the Sun's disc is seen on the horizon from sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34'. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge,

Declination.	LATITUDE.

of the Sun is on the visible horizon is given as the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign -, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the same moment lie in a slightly curved line across the map, the lines for different moments being approximately parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

Sun's Altitude and Azimuth—Time Conversion.

The times in the headline and penultimate column are *Apparent*. By applying the Equation of Time, the Mean Time is found to which the figures are appropriate.

Alt.—This is given to tenths of a degree, but there may be small differences between the morning and afternoon hours, and between the like days of the year. The effect of Refraction is not applied. Azimuth (Az.) is measured either eastward or westward from the N. Az. 45° is equivalent to N.E. or N.W. Az. 135° to S.E. or S.W. E.S.E. or W.S.W. is 112½°.

The year is divided into periods of thirty days (with exceptions). The figures for days other than those given can be found by interpolation with approximate accuracy.

Latitude 53° is chosen as an average for England. North or south of this the noon altitude is respectively less or greater by the difference of latitude, and for other times *pro rata*.

Solar and Sidereal Time.

TO FORM EQUIVALENT INTERVALS OF SOLAR AND SIDEREAL TIME

The length of a Sidereal day is 23h. 56m. 4^{sec}. of Mean Time. One hour of Sidereal Time is, therefore, equivalent to 95m. 50^{sec}. of Mean Time, and one hour of mean solar time is equivalent to 1h. 0m. 9^{sec}. of Sidereal Time. The multiples and submultiples of the differences from one hour are tabulated below under headings "acceleration" and "retardation"—for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. If it is Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Celestial Phenomena for Observation in 1933.

ECLIPSES

In the year 1933 there will be two Eclipses of the Sun and none of the Moon. This is the minimum number of eclipses that can happen in any year, and the two eclipses must be solar. The last occasion when it happened was in the year 1909. Both eclipses this year are Annular.

I An Annular Eclipse of the Sun on Feb. 24. Invisible at Greenwich. Begins on the Earth generally at 54° W (G.M.T.) in longitude 62° 21' W, latitude 34° 56' S. The path from which an annular eclipse may be seen begins its course off the western coast of South America in latitude 40° S near Valdivia in southern Chile, crosses that continent and the Atlantic, coming to land in French Equatorial Africa in latitude 5° S. It continues in a north easterly direction across Africa to Aden, where the Sun will be seen annularly eclipsed shortly before it sets, and comes to an end a little distance east of that place. The duration of the Annular Phase on the central line is about 11m 32s in the middle of the track, and more than 1m 50s at its ends. A Partial Eclipse will be seen from the following places —

	Mag	Begins d h m	Greatest Phase h m	Ends h m
Cape of Good Hope	0.35	24 11 46	25 53	23 57
Johannesburg	0.31	24 12 21	23 28	14 19
Mauritius	0.11	24 13 27	23 57	14 25

II An Annular Eclipse of the Sun on Aug. 22. Invisible at Greenwich. Begins on the Earth generally at 24° 52' N (G.M.T.) in longitude 41° E, latitude 28° 26' N. The path from which an annular eclipse may be seen begins its course in the Mediterranean close to the north coast of Egypt, crosses Arabia, Persia, Northern India, Siam, Borneo, and comes to an end in Northern Australia. Alexandria, Jerusalem, Bagdad, Delhi, Calcutta, and Rangoon are in or near the path. The duration of the Annular Phase on the central line ranges from 2m 12s at the western end of the path to 2m 2s near its middle, and 2m 12s at the eastern end. Partial Eclipses will be seen from the following places —

	Mag	Begins d h m	Greatest Phase h m	Ends h m
Bombay	0.64	21 3 20	4 48	6 26
Madras	0.59	21 3 44	5 19	6 57
Hong Kong	0.49	21 4 47	6 12	7 27
Perth	0.30	21 6 38	7 36	8 29
Adelaide	0.47	21 6 45	7 44	—
Melbourne	0.43	21 6 48	7 43	—

JUPITER'S SATELLITE PHENOMENA — The above table gives the times of Disappearance (D) and of Reappearance (R) of the Satellites of Jupiter at Eclipse that will happen when Jupiter is above the horizon at Greenwich and the Sun below. These phenomena are seen simultaneously from all places where the planet is above the horizon at the time. From opposition to conjunction, i.e. from March 9 to Sept. 27, the eclipses take place on the eastern side of the planet, from conjunction to opposition on the western. In the latter periods i.e. from Jan. 1 to March 9 and from October to December, satellites I and II disappear by eclipse and reappear from occultation.

OCCULTATIONS OF STARS BY THE MOON.

The above is a list of stars, chosen within certain limits as to magnitude and phase of the Moon, that will be occulted during the year, with the time of the phase of the occultation mentioned as seen from Greenwich. In general the phase is that which takes place at the dark limb, but both phases of the occultation of α Gemimorum on Jan. 11, which is the night of Full Moon, take place at the bright limb. Regulus on April 6 will not be seen occulted from Edinburgh and other parts of the British Isles north of Greenwich, but the line of demarcation is not readily defined. The Moon is among the Pleiades on the night of November 3 at about 36 hours after Full Moon, and both the disappearances and reappearances shown will be at an edge which is sensibly bright. The "angle from N. point" shows the place of disappearance or reappearance on the Moon's edge, and is measured from the point nearest the Pole of the heavens (not the highest point) towards the east. B.D. + 27° 722 (March 4) is 2 645, a triple star, α Arietis is a double.

at the eastern edge. The times of such reappearances (Oc. R.) are given, the satellite and the time of its disappearance being in the preceding line. From March 9 to Sept. the converse happens, and the times of disappearance by occultation (Oc. D.), and of reappearance after eclipse are given, the satellite being named in the second line. Near the time of opposition this pertains to satellite III as well as to I and II as will be seen by examples on Feb. 21, March 1 and April 6. The eclipse of a satellite is always accompanied by its occultation which precedes the eclipse from opposition to conjunction of Jupiter, but follows it from conjunction to opposition. In the morning of Feb. 13 satellite IV will disappear by occultation at 22.20m. and reappear at 4A. 43m. On the night of April 22, III will be occulted at 22.5m. reappearing at 2A. 12m. to disappear by eclipse almost immediately. Though satellite IV, like the other major satellites, moves in a plane that is but little inclined to the plane of Jupiter's orbit, because of its greater distance from the planet and therefore its greater linear distance from that plane when in heliocentric conjunction, in some circumstances it escapes and does not enter the shadow thrown by Jupiter and is not eclipsed. During alternate periods of about three years, Jupiter's satellite IV is and is not eclipsed, nor occulted, and is not seen in transit. A period of non-eclipse begins at the end of this year.

MEAN RIGHT ASCENSION AND DECLINATION OF BRIGHT STARS, VISIBLE AT GREENWICH, FOR JANUARY 1, 1883, with spectral type, P.M. and Parallax.

The position of a star is defined by its Right Ascension and Declination, which are co-ordinates analogous to longitude and latitude on the terrestrial sphere. The lines of reference on the celestial sphere depend on the position of the axis of the Earth, and since, for reasons known generally by the word Precession, this position has a continual small movement with respect to the stars, Right Ascension and Declination change annually by an amount that can be computed by formula. Observation of position of the stars shows that they do not conform precisely to this computed precessional change, and the outstanding amount for individual stars known as Proper Motion (see page 242), is shown in two columns of the adjoining table. The annual precession and Proper Motion combined, or the amount by which each element of a star's position changes in a year, known as the Variation is also shown. The angular parallax of a star is the angle that the mean radius of the Earth's orbit would, placed squarely, subtend at the star, and is therefore inversely proportional to its distance, and hence is a measure of that same. The parallaxes in the adjoining table are mainly trigonometric (see p. 244) and are taken from the General Catalogue of Parallaxes collected by Dr. Frank Schlesinger of Yale. The entry ∞ indicates that the star is

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the various classes of objects are at very different distances. The Moon, our nearest neighbour, is 240,000 miles from us; a distance which light, travelling at the rate of 186,000 miles a second, traverses in less than a second and a half. Of the bodies of the Universe whose distance is known, the farthest is so remote that its light takes over 100,000,000 years to reach us. The nearest star to the Sun is more than eight thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, their movements and their sizes. Cosmical Physicists attempt to deduce their physical nature, and that of cosmical matter in general from the observations of the astronomer, combined with knowledge gained in the laboratory, with the hope of finally elucidating their past and future history. The total number of stars of magnitude 6 and brighter, which is sometimes taken as the limit of naked-eye visibility, is about 4,300, of which 3,000 are visible during the year from latitude 60°, but a more generous estimate, formed by including cases when two faint stars close together are seen as one, sets the whole number at 10,000. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid, and from counts on such plates estimates have been made of the number of stars in the Universe. 2,000,000,000 was once assigned as a limit to their number, but this has been much increased by various estimates. From them 50,000 millions may be taken as the possible total number of stars in the galactic system (i. e. *infra*), though twice that number has been mentioned as a reasoned estimate. The number in the whole of space is incalculable.

THE STRUCTURE OF THE UNIVERSE.

The stars as seen are classed according to their apparent brightness and down to the 9th or 10th magnitude the number of each magnitude is known, all to this order having been catalogued. For fainter stars the numbers have been derived from counts in sample areas. If the Universe is an aggregation of stars in which the individuals of each degree of intrinsic brightness are distributed uniformly throughout an endless space, it can be shown that the number of stars brighter than the 4th magnitude would be about four times as great as the number brighter than the 6th; the number brighter than the 6th magnitude greater than the number of those brighter than the 4th in the same ratio, and so on indefinitely. When the numbers of stars of different magnitudes obtained by counts are compared it is found that in the case of the brighter stars this star-ratio, as it is called, approaches but does not attain the theoretical value 3.98, and that the ratio decreases continually as the stars are fainter, until at the 15th magnitude it is only about two. The explanation of this observed fact is that the universe of stars accessible to vision is limited; either there are few or no stars beyond a somewhat indefinite boundary, or we are prevented from seeing them by absorbing material distributed throughout interstellar space.

It is established from counts and measured distances that around our Sun the stars are fairly uniformly distributed at the rate of about one

per an cubic parsec. It is obvious that a uniform distribution of this nature cannot go on indefinitely, for, if it did, the background of the firmament would be bright, since in whatever direction we looked we should, in time, come to a star.

To a casual glance it is clear that the stars are not uniformly distributed over the sky, but have a tendency to congregate near the great belt of cloud-like forms which encircle the heavens, known as the Milky Way or Galaxy. Applying the method of sounding by "star ratios" above outlined, it is found that the stars appear to thin out less rapidly as we go off in the plane of the Milky Way than they do in the direction of the galactic poles. The deduction is apparent; the boundaries of the stellar system are more distant in the plane of the Galaxy than they are at the poles. In other words, the stellar system is an extremely flattened organization, whose general form is, roughly, that of a double convex lens or of a watch. Looking along the galactic plane we find the stars crowding together, as we should expect, since this is the direction of greatest extension, and the Milky Way is therefore largely a depth effect. But examination of its prominent features, the great star-clouds, the irregularities in its form, and the deep rifts in its structure, shows that its appearance is not wholly due to depth, and that the region is the home of bodies and masses other than uniformly distributed stars. This aggregation is known as the Galactic System; it has been called the Stellar Universe, or the Universe, but the name is scarcely well-chosen because, as will be seen below, there are other aggregations which make this system merely a unit in an immense number of such denizens of space.

Statistical study of the distribution of the brighter stars shows that they form a local system that appears to have the same shape in general as the larger system spoken of, but the fundamental planes are slightly inclined one to the other. It was formerly a general belief that the Milky Way surrounded this congregation of stars as a girdle, whether continuous with it or not was an open question, but a modern view supposes the existence of other local systems similar to this one of which our Sun is a member, all lying more or less in the Galactic plane that may be seen as star clouds in the Milky Way. The greatest condensation of stars as we see them occurs in the bright galactic clouds in Sagittarius, while the opposite portion of the Milky Way is a region of low concentration and brilliancy, from which it is inferred that we are not at the centre of the galactic system, but that this is about 50,000 light years from the Sun and is situated in a star cloud seen in Scorpius and Sagittarius (Shapley).

In and around the Milky Way there are irregular nebulæ (see p. 145) of which the nebula in Orion is one of the most remarkable that are found to be comparatively near objects, and are to be considered as within the Galaxy. There are masses of dark nebulosity that appear as rifts obscuring the stars behind. But besides these there are nebulæ of another type that are not seen about our central Galactic plane, though some, it has been suggested, may be hidden by the dark nebulosity, which are thought to be very distant from our Sun, but viewed with a powerful telescope are resolved into spots of light believed to be stars. Such nebulæ were called by William Herschel "Island Universes." They are now more often called extra-galactic

THE TWENTY BRIGHTEST STARS.

The last columns show the light emitted compared with that by our Sun, considered to be of magnitude -26.75 on the stellar scale. α^1 Centauri is the brighter of two bright stars seen as one by naked eye; they have a faint companion, Proxima. α^1, α^2 , Crucis, if considered as one star (Mag. 1.2) would have been in the first of above lists. * Brighter component.

nebulae, and being, to some degree, of the same shape as, and bearing other resemblance to our own galactic system, are believed to be similar systems perhaps in course of making. About two millions of these extra-galactic nebulae are visible in the Mount Wilson 100-inch telescope. They appear to be scattered with a tolerable approach to uniformity through space, their average distance apart being something of the order of 2,000,000 light years. The most distant of them is about 120 million light-years from us. To sum up modern ideas of the Cosmos we consider our Sun as one of millions, perhaps, that make up our local system. This, with other local systems and other bodies, make up the galactic system, which is merely one among millions of such systems that form the Universe.

Attempts have been made to estimate the dimensions of this Universe of stars. Four thousand light years was a former estimate of the diameter of our local system, but a more recent one is of the order of 20,000. The larger diameter of the galaxy is estimated to be more than 200,000 light years; 120 million light years has been taken as the limit of the Universe.

EXPANSION OF THE UNIVERSE.

Einstein in his recondit mathematical researches amended the law of gravitation by adding a minute "cosmical term" to the ordinary attraction, the effect of which was a repulsion from an origin varying directly as the distance. He thus conceived a Universe in which matter is distributed with uniform density, and is in equilibrium owing to the balancing of gravitational attraction and cosmical repulsion, the nebulae and stars being presumably knots or conglomerations of this matter. Dr. de Sitter of Leyden, in 1917, made a modification of this, which led to an hypothesis predicated large velocities of recession for distant objects, because at great distances "cosmical repulsion" gets the upper hand. Another method of dealing with the mathe-

matics left it uncertain whether the Universe was expanding or contracting, and at this stage observational evidence bearing on the question accrued.

In the spectra of a few of the distant extra-galactic-nebulae (see p. 124) that have been observed there was a displacement of the absorption lines, which, according to Doppler's principle (see p. 124) indicated a velocity of recession. This observational work has been followed up at the Lowell and Mount Wilson observatories, and it appears finally from a considerable amount of evidence, after making certain allowances, that the spiral nebulae are running away from us, the speed of recession increasing with increasing distance. The speed may be taken roughly as 500 km. per sec. per megaparsec distance (see p. 124), at which rate they will double their distance from us every 1,400 million years. It may be added that the nebulae and other bodies do not change in size but only the distance between them.

These rather extraordinary conclusions that are bound up with conceptions of space, and its limitations, have not passed without philosophic and general discussion.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscopic, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen. Planetary nebulae, some stars known as Wolf-Rayet, in whose spectrum the chief lines are bright, and the bright stars of Orion generally are in this group. Stars whose spectra range between A and F—it is to be remarked that there is no rigorous line of division between the classes and that there are subclasses and spectra noted as "peculiar"—are white or blue stars, and in their

spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls late in the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of settings, and the stars are orange and red. Antares, Betelgeuse, and a Herculis are notable stars in sub-classes of this type. (v. supra.)

STELLAR EVOLUTION.

The early stellar spectroscopists believed that they were investigating the chemistry of the stars and finding the material of which they are composed. It was thought that the hydrogen shown by the spectrum of Sirius would some day change into calcium, which is a leading characteristic of the solar spectrum, and hence that Sirius is in an earlier stage of development than the Sun. The modern view, based on laboratory experiments, is that the spectrum shows the radiative power or, in other words, the surface-temperature of the star, and that the hydrogen lines in the spectrum of Sirius, for instance, do not indicate an excess of that element, but, rather, that the star is at the temperature (20,000° C.) when those lines are prominent. The Sun is at a temperature of 6,000° C., which is known from the fact that light of wave-length 4800 Angstroms is most abundant in its spectrum. This type of spectrum is characteristic of iron. Formerly the theory of stellar evolution was very simple. It was believed that stars began by being very hot and then cooled down, their spectrum changing in type until they arrived at a condition that gave a spectrum of type M and then disappeared. But about the year 1913 a hypothesis was propounded to the effect that in the beginning all stars are of Class M. That some pass through certain stages to become white hot stars of type B, and then return to Class M.

THE SIZE OF THE STARS.

By the help of certain physical laws the rate of emission of energy per unit area of a star's surface can be deduced from the colour of the light that is emitted most profusely as shown by its spectrum, and since the intrinsic luminosity is the total outpouring of energy, it is easy to understand that the area of the surface may be deduced, and hence the diameter of the star. Writing generally, the size of the majority of the stars estimated in this way is of the same order as that of our Sun, though some may be so times as large, others smaller in the same ratio. The bright red stars, of which there are not many, are giants having diameters 200 times or more that of our Sun. There are a few stars of peculiar quality known as White Dwarfs that are much smaller, but of an amazing density and weight.

A method of measuring stellar diameters has lately been found by using an instrument known as an "interferometer," with which the angular diameters of several of the largest stars have been measured. Since the distances of these stars are known, the following values of the diameters in miles have been deduced, and it is satisfactory that these agree closely with the values derived from consideration of the surface brightness as above outlined:—

a Herculis	345 million miles
Betelgeuse (average)	256 " "
Aldebaran	34 " "
Arcturus	28 " "

ABSOLUTE MAGNITUDE.

This phrase implies the luminosity of a star irrespective of its distance. Actually it is the number that expresses, according to the usual system of stellar magnitude, the brightness of the star as it would be if it were at the distance of 20 parsecs (parallax 0.1"). If the distance of a star is known, its absolute magnitude can be computed from its apparent, or, if the absolute and the apparent magnitudes are known, the distance of the star can be determined, the numerical relation between M the absolute and m the apparent magnitude being $M = m + 5 + 5 \log r$, where r is the decimal fraction indicating the parallax of the star.

DISTANCE OF THE STARS.

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from different points in the Earth's orbit. This is now usually done by photographing the star and its surroundings at appropriate epochs and measuring the change in relative position. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars the ratio of the intensity of certain pairs of lines is a function of the absolute magnitude of the star. In stars of great luminosity, for example, a certain Calcium line is very strong, whilst a line due to Iron is weak, but in a star which emits small total light the case is reversed. Applying this principle to stars whose distance has been found trigonometrically, a table correlating the above characteristic with absolute magnitude has been formed by which the actual luminosity of a star may be inferred, and hence its distance.

The distances of some stars or groups of stars are found by indirect methods such as the following. If by any means it is possible to know the mean parallactic movement (see *Stellar Motion*) of a group of stars, the mean parallax or distance of this group follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars. The parallaxes of some binary stars have been found by a computational method assuming a value for their mass (hypothetical parallax).

For some distant objects a method is adopted depending on a peculiar property of a class of stars known as "Cepheid Variables." These stars show very regular fluctuations, coming to maximum at intervals which range from a few hours to several days, and it has been found that the length of this period has a relation to the mean absolute brightness of the star. Those stars which have the longest period are the brightest, and a definite law has been evolved connecting the two elements. These Cepheid Variables are very common in globular star-clusters—the peculiarity was, in fact, first suggested by a number seen in the lesser Magellanic cloud—and by adopting this law it is clear that the great distances of such objects may be known from a simple observation.

to express large distances a large unit is required. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros, another unit is the *parsec*, or the distance at which the mean radius of the Earth's orbit would subtend an angle of 1 (parallax = one second). This is 31 times the light year and is represented roughly by a followed by 13 zeros. The kiloparsec as equivalent for 1,000 parsecs and the megaparsec for a million are words now in use. There is also a unit little used called the *Solometer*, which is equivalent to a million times the distance of the Earth from the Sun.

Within the sphere of 10 parsecs radius about the Sun as centre there are rather more than a hundred stars whose distance has been measured. It is probable that more than that number remain to be discovered.

STELLAR MOTION

Many, if not all of the so called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. The seven bright stars of the Great Bear would on this account have formed in prehistoric times a configuration rather different from that seen to day. Consideration of these proper motions has led to the conclusion that they are in part due to actual movement in space of the stars themselves but in part to the movement of our own Sun which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way it has been found fairly conclusively that the Sun and with it the Earth and planets is moving through space with a speed of 20.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, for there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral

type B and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type. By an optical principle known as Doppler's, it is possible to find from certain peculiarities of the lines in its spectrum the rate at which a star is approaching or receding from us. The line of sight or radial velocities of many stars have been found in this way, but the possibility that such special peculiarities may be due to causes other than motion is to be remembered.

THE INTERIOR OF A STAR

Astronomical physicists explore the interior of a star on the assumption that it is a volume of perfect gas whose molecules are in incessant motion which constitutes its temperature, in which pressure density and temperature conform strictly to a certain relation (Boyle's Law). It is further assumed that the gas has adjusted itself to mechanical equilibrium so that the heat at any point within the star supplies just enough pressure to support the weight of the gas above it and hence is deduced the density and temperature at any point within a star its mass and radiative quality or luminosity. It is believed that annihilation of its matter is the source of a star's energy and that as a star grows older its mass lessens. A relation between mass and luminosity found to hold in the case of certain stars for which these qualities are known is thought to hold generally, the more massive stars being the brighter though a small class of stars of very high density known as 'White Dwarfs' of which the best known is the companion to Sirius do not conform.

Alternative hypotheses to that of the perfect gas have been proposed. In one the interior of a star is considered to be liquid and radiation pressure plays a minor part.

STAR CLUSTERS AND NEBULÆ

Among the apparently solitary stars there are found groups of stars gathered close together, some of which may be easily separable into individuals others that can only be separated by the most powerful telescopes and objects that appear as unresolvable patches of light the latter are called nebulae, and were aptly described by Sir William Herschel as 'shining fluid'. A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue	Westerhout's or Herschel's Number	R.A. 1900	Declination 1900	Constellation	Appearance
224	M 31	0 36 +49 50		Andromeda	Very brilliant oval nebula, visible to naked eye
598	M 32	1 29 +29 38		Andromeda	A large nebula
869 & 884	H VI 33 34	2 15 +55 45		Perseus	Line double cluster, visible to naked eye
1958	M 1	5 30 +22 0		Taurus	The well known 'Cleft Nebula' of Lord Rosse
1976	M 4	5 31 - 5 27		Orion	Large and splendid nebula visible to naked eye
2070		5 39 -69 19		Dorado	Great 'J' shaped nebula—visible to naked eye
2099	M 37	5 47 +32 30		Auriga	A fine cluster of stars
2168	M 35	6 4 +24 20		Gemini	Magnificent cluster of stars
2628	M 44	8 35 +20 15		Cancer	(called Praesepe, or the "Bee Hive"—visible to naked eye)
3372		10 42 -59 16		Argo	Great nebula surrounding γ Argus
5194	M 51	13 26 +47 35		Canes Venatici	Brilliant spiral nebula
5272	M 3	13 38 +28 45		Canes Venatici	4 pointed cluster of stars
6003	M 13	16 39 +36 35		Hercules	Very fine cluster of stars, visible to naked eye
6464	M 33	17 52 -22 0		Ophiuchus	Ring cluster of stars
6543	H IV 37	17 59 +66 35		Draconis	Bright planetary nebula
6720	M 57	18 51 +32 55		Lyra	Beautiful ring of bright nebulosity
6853	M 27	19 36 +22 30		Aquila	Large nebula formed like a "Dumb Bell" or "Hour Glass"
7089	M 2	21 29 - 2 20		Aquarius	Splendid globular cluster of stars
7076	M 15	21 26 +22 49		Pegasus	Magnificent cluster of stars

There are nebulae called planetary that are small regular in outline, and show a uniform disc. Analogous to these are some which are dark in the centre called annular or ring nebulae. Beyond this the spectroscopic divides the nebula into two great classes. The first spectroscopic observation of a nebula made by Huggins in 1864 showed a spectrum of one bright line only which indicated that these bodies or at least some of them are constituted of glowing gas. Later investigation showed that the spectra of some nebulae are continuous. The nebula with continuous spectrum are called white nebulae in distinction to those with bright line spectra which are green or gaseous. Photography has brought the means of studying the number and form of these objects in great detail and it is found that a large proportion of them are of spiral form. They are the extra galactic nebulae already spoken of (see p. 144). The gaseous green nebulae are in a small minority and are generally diffused and irregular in outline and lie mostly in the Milky Way. The smaller the so called planetary and stellar nebulae do not markedly avoid it as do the spirals which lie in a zone of the sky roughly at right angles to the Galaxy. Globular star clusters also lie outside the Milky Way, but irregular clusters are within its limits. There are also masses of dark nebula in space which may be the earliest form of matter. Though it is not possible to measure their distances directly several lines of argument lead to the conclusion that the spiral nebulae are very far away. The nebulae have been much studied recently as to their form and total brightness and a system of classification has been proposed. The hypothesis is put forward that nebulae of the same class are approximately of the same size and hence that their relative distances may be inferred. Distances of the order of 50,000 parsecs has been assigned to M 31 and M 33 (see table) from observation of the Cepheid variables they comprise (see p. 144) and from this their actual size has been deduced. The diameter of M 31 (the Andromeda) is about 13,000 parsecs.

VARIABLE STARS

Although the stars generally shine with unchanging brightness there are some among them which are exceptions to this rule and of these Algor the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude taking rather more than $4\frac{1}{2}$ hours to do so and after a brief minimum regains its light in the same time. It is thought that this is due to partial eclipse by a dark companion that moves in an orbit round the bright star. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table on page 147. The position of Algor is given by R.A. 3h 41m Declination $40^{\circ} 41' N$.

There are variable stars of types other than those like Algor. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one third of the whole period so that the decrease of light is more gradual than the increase. It has been suggested that this may be due to a pulsation or periodic swelling and contraction of the star. A peculiarity of these stars has been

mentioned (see page 144). Stars of the β I type pass from minimum to minimum in about 6 $\frac{1}{2}$ days but are not of the same brightness at all minima the alternate being equal. There are variable stars with periods ranging between 30 and 500 days whose difference of brightness during a light cycle may be as great as 9 or 10 magnitudes. The spectra of most of these long period variables show bright emission as well as dark absorption lines and a periodic outflow of incandescent gases and vapours is suggested as the cause of the light variation. Mira Ceti (R.A. 2h 16m Declination $5^{\circ} 18' S$) is the most famous of these. It will probably be at maximum in March this year when it will be visible in the early evening. Its magnitude at maximum is between 2 and 5 and at minimum 9 or 10.

There is a group of 8 or 9 stars of a remarkable type known as the ϵ Gemmorum which for most of the time are of uniform or nearly uniform magnitude but undergo periodic outbursts that generally last a few days. The majority of this group are of 12th or 13th magnitude at maximum though ϵ Gemmorum itself is of the 9th and the mean range in magnitude is about 4 $\frac{1}{2}$. The outbursts may be said to happen every 20 or 30 days but this period is frequently much exceeded. 45 Cygni is included in this group though its variation is very erratic. Also there are a few variable stars whose characteristic is the opposite of that of the class just mentioned they are ordinarily bright but sometimes become faint without warning and remain so for a year or more varying very irregularly until they again attain their normal brightness. The star R Coronae Borealis normally of magnitude 6 which gives the name to this class has been observed since the year 1843 and up to the year 1925 forty well marked minima had been recorded ranging between magnitudes 7 and 15 in brightness and from a month to 22 years in duration. A variable star with the remarkably short period of rather more than an hour and a half was discovered a year or two ago.

NEW OR TEMPORARY STARS

The phenomena known as Novae or New Stars can scarcely be classed as variable stars for the rise to maximum so far as is known occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blown out into conflagration but on the other hand the nova position may be merely fortuitous and the phenomenon may be the sudden visibility of a mass of dark nebulous gas which by some means has become igneous. The great brilliancy which occurs very suddenly is short lived for there follows a rapid fall and in a few months the object emits perhaps 1 per cent of its light whilst in a decade it falls to 12th or 13th magnitude or fainter and in some cases shows a decided variability. About thirty bright stars of this kind visible since the time of Hipparchus 134 B.C. are on record. A list of 13 that have been seen since 1848 will be found in previous issues of this Almanack together with an account of the changes in the spectrum that have been generally observed.

No convincing reason for these phenomena has yet been given. The speculation has been put forward recently that novae are explosions of white dwarfs and another that a faint star collects a covering of gaseous interstellar matter. A suggestion that they occur as a

DOUBLE AND BINARY STARS

The large majority of stars when looked at through a telescope appear as single points of light of different degrees of brightness and perhaps differing slightly in colour. Some however are seen to consist of two points so close together that the duplicity is shown only by telescopic examination and the measurement of the relative position of the components forms a branch of observational astronomy. This duplicity would happen if one star lay in space immediately behind the other but there are more double stars than would accrue if this were the only reason and it is evident that the greater number of double stars are formed by components actually near together which it is likely have a gravitational connection. This idea of connection was not held in early days and Sir Wm Herschel who in 1799 was the first to begin their systematic observation, was careful to call these pairs Double Stars not wishing to imply anything more than nearness though by that date it had already been suggested that two stars seen near together were actually contiguous and formed a physical system. Twenty years later observed changes in the relative position of the components of some double stars led Herschel to adopt this idea and he used the word Binary as the name for those known to have physical connection. It is clear that limits of distance must be set, and in general a separation between the components of less than about 30 seconds of arc defines a double star. As to the lower limit it is found possible with a large telescope to measure distances between two stars as small as a fifth of a second. There are in the sky 15,000 to 20,000 stars between these limits that have been measured and catalogued. The number is given vaguely for it is being added to continually. *Ursæ Majoris* (Mizar) the middle star in the tail of the Great Bear is said to be the first double star discovered (1666). Its components of 4th and 5th magnitude are separated by 15 seconds. It has a companion *Alcor*, of 6th magnitude 11 minutes distant that can be seen separately by the naked eye, but this does not come within the definition. *Castor* and *γ Virginis* are other bright stars that consist of two components of about the same brightness separated by a few seconds. *Sirius* and *Procyon* are very bright stars that each have a very faint star as companion, and between these types there are many

other and various combinations of magnitude. Observations of Mizar extending over 150 years, do not show any change in the relative position of the components but from similar measures of the other stars mentioned, it is deduced that the twin components are moving round one another in elliptic orbits. In the case of *γ Virginis* the orbit is completed in about 180 years. Other visual binaries have periods that range from 10 to 250 years but a method (see below) other than direct visual observation reveals the existence of binary stars revolving in orbits in periods that may be a few days or only a few hours.

SPECTROSCOPIC BINARIES

As mentioned on p. 145 it is possible, from certain peculiarities in a star's spectrum to deduce the speed with which any star is advancing towards or receding from the earth. As a result of their motion around one another, the two components of a binary star will, in general, be respectively advancing towards, and receding from, the earth at different rates and when both components are bright enough for their spectra to be visible the spectrum of a binary star shows two distinct sets of lines, which oscillate about their mean position in a period equal to the period of the star. There are many stars of this kind with components so close together that they cannot be seen as two visually, but whose orbit may be determined from observations of their spectrum. Such stars are called Spectroscopic Binaries. One discovered in 1860, known as *Pleiadis* star, *δ δ* 3000, has a period of 14.41 days and is the most massive and brightest star (absolute magnitude) whose elements are known.

Colour of the double stars—The components of close double stars that differ little in brightness show little or no contrast in colour. The components of *α* star are said to be both yellowish green by one observer and by another bright white and pale white. The components of *γ Virginis* are both pale-yellow to one observer silvery white and pale yellow to another. The components of *α Eridani* of magnitude 9.2 and 10.2 are both blue. Following are some examples in the opposite sense. The stars named are all physically connected and have had their orbits computed the magnitudes of their components are shown by the figures—*η* Cassiopeiæ 4.0 7.6, yellow purple, *ε* Hydree 3.0 6.0 yellow, blue *γ* Ophiuchi, 4.5 6.0, yellow, purple, *Procyon*, 2.22, yellow, green, *α* Canum Ven., 5.0 6.5, white, blue, *β* Sirius, 1.0, white, yellow.

THE Sun is one of the millions of stars that make up the Universe and so far as human knowledge goes in magnitude and constitution is not unlike the stars of the night sky. It is surrounded by a family of smaller bodies of which our Faith 14 one and the solar system which is only a minute detail in the structure of the Universe is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun with eight major planets, and minor planets or asteroids that may be counted by thousands circulating round it at varying distances in oval shaped orbits. A moving object discovered in the year 1890 is said to be a ninth major planet (see Pluto p 151). Six of the major planets have smaller bodies circulating round them so that each forms a separate system but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals may be considered to be members of the solar system since they move in elongated elliptical orbits of which the Sun is at a focus. It is likely that their light is reflected sunlight, since they become brighter as they approach the Sun but also that they are partly visible by their own light.

The plane of the Ecliptic in which the Faith moves round the Sun (see p 155) is used as a fundamental plane of reference. The other planets move in planes inclined but little to the plane of the Ecliptic at varying distances from the Sun and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi major axes. Following are given brief notes on each of the bodies which make up the solar system with details of their sizes distances from their primary and periodic times in tabular form (pp 153-154). The time of rotation about its axis or the length of the day of the planet, is added when this is known.

THE SUN

The surface of the Sun seen in a telescope presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered the shape of these being such that they have been called alternatively rice grains or willow leaves. On this surface or amid the material forming it, black spots appear sporadically, and around them are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. Bright and dark streaks unassociated with spots generally called filoculi can be seen in the central parts of the disc with a spectrohelioscope. There are also brilliant clouds of calcium vapour pervading the solar surface that are revealed by a device called a spectroheliograph by which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. Modern views describe the spots as columnar vortices which have a deep-seated origin far below the photosphere and assume that a sun spot is a vast tornado in which electrified particles are rapidly whirled as is proved by the presence of a magnetic field. The spots vary in size and number, and increase and decrease somewhat uniformly in both respects, passing

through a maximum about every eleven years. They increase at a rather more rapid rate than they decrease from measures of their position on the disc and by help of the elements given on page 2 each month the latitude and longitude (heliographic) of the spots can be computed. It is seldom that spots appear in latitudes greater than 30° from the solar equator, but about the time of spot minimum or rather earlier small spots appear in even more extreme latitudes and during the succeeding eleven years the spot regions converge towards the solar equator (*Sun's Law of Zones*) and at time of maximum the spots are largely in solar latitude 12 to 14° N and S. The periodicity was first noted by Schwabe of Dessau in the year 1843 from a comparatively few years observations but records of earlier years and a continuous and complete record made subsequently prove the existence of a period of average length of 11½ years from maximum to maximum though there are large variations from this mean as shown by the table below. The prominences (*infra*) also show a fluctuation in their activity in a period of the same length and the form of the solar corona changes with the sun spot cycle in a most marked way. Not only this but there are some terrestrial occurrences that vary in like phase with these solar, which seems to show convincingly a connection or at any rate a relation between Sun and Earth (see page 156). The Sun rotates on its axis in about 25½ days which is shown by the movement of the spots across the visible disc but because the Earth has moved in its orbit in that time the period of rotation with respect to the Earth the synodic period as it is called is 27½ days and a spot may therefore be on the visible disc for 13 or 14 days. These are approximate mean values for the Sun does not rotate as a whole solid body and the rate of rotation is not the same in all latitudes. A formula derived from the Greenwich record of spots during the period 1878-1923 gives for the time of sidereal rotation in different latitudes either north or south —

	d	h		d	h
Equator	25	1	Lat 15°	25	8
Lat 5°	25	2	20°	25	14
10°	25	5	30°	26	6

These figures refer to both hemispheres of the Sun. The addition of a day gives approximately the period of rotation with respect to the Earth.

DATES OF SUN SPOT MAXIMA AND MINIMA

Maxima		Minima	
1805	1870	1810	1878
1816	1883	1823	1889
1829	1894	1833	1901
1837	1906	1843	1913
1848	1917	1856	1923
1860	1927	1867	

The general decline in solar activity continued in 1932 but was interrupted by the appearance of a group visible to the naked eye in May. The occurrence of small outbreaks in high latitudes both north and south is significant. The next sun spot minimum is expected in 1934.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, appendages called prominences that are generally described as reddish coloured but were white when viewed

from aeroplanes on the occasion of the eclipse of 1907, June 29, are seen projecting from the sun's edge. These consist of masses of glowing hydrogen gas arising from the chromosphere being sometimes of remarkable shape and extending to enormous heights and are occasionally detached from the body of the sun. It is possible to observe these at times other than when the sun is eclipsed. In the lower strata of the sun's envelope are found the vapours of many metals known by their characteristic lines shown in the spectroscope. Another appendage of the sun outside the chromosphere called the corona can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen; the upper is a beautiful mass of silvery white light in form of feather-like plumes, with dark spaces between, sometimes as long as twice the sun's diameter. The corona appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of sun spots which was realised perhaps for the first time at the eclipse of 1898 July 29 when the corona was of the pronounced minimum type with long streamers on either side called the wind vane. Solar eclipses are total only when seen from places on which the shadow of the Moon falls, and an eclipse is seen partial from localities not far from this path of totality because the change in the observer's position places him out of the cone which envelops both sun and Moon. There are more solar eclipses than lunar in the proportion of four to three taking the whole earth into account for any given station the proportion is reversed. (See p 152)

MERCURY

Mercury is the nearest planet to the sun and the smallest in the system. Because it moves in an orbit between the sun and the earth this planet can never be seen far from the sun but is always at a short distance to the West or to the East of that body. In the former case Mercury appears as a morning star and in the latter as evening star. The extremes of these apparent excursions are known as greatest elongations and their times and the distances measured by the angle included between the lines which join the earth to the sun and the planet respectively are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these elongations to vary considerably and they may be as small as 16° or as large as 28°. Eastern elongations when the planet is seen as an evening star occur at intervals of about 116 days as do Western and the best opportunities of seeing the planet are before the Eastern elongations in the spring and after Western elongations in the autumn. This year Mercury is likely to be visible as an evening star in February and March and in the morning in August and in the first part of December. Mercury shows phases to the earth like the Moon in her first quarter if the elongation be in the East and like her last quarter if in the West. (See p 152)

VENUS

Venus which is nearly twice as far from the sun as Mercury its distance from the central body being rather more than two thirds that of the earth is almost exactly the same size as our globe. Her apparent movement with

respect to the sun is similar to that of Mercury except that, being farther from the sun, and nearer to the earth than her smaller neighbour, the angles of elongation exceed those of Mercury and extend to 47°. Writing generally it is believed that the planets rotate on axes as does the earth but this is not known to be the case for the interior planets Mercury and Venus, because of the difficulty in seeing any markings on their surfaces that may be considered permanent. Attempts to discover the rotation period of Venus have shown that it may be about 23 or 24 hours or 24 days or 225 days which is the period in which it completes its orbit round the sun. With this divergence it can scarcely be said that any period is proved. A scheme practised in America of photographing through screens of coloured glass (see Mars below) applied to this planet leads to the suggestion of an outer covering of cirrus cloud and markings seen on the photographs taken in ultra violet light appear to indicate a period of rotation of 30 days. This planet will be little seen this year until its end. It will be brilliant in the evening twilight in December.

MARS

Mars the first planet whose orbit is external to that of the earth is a little larger than Mercury and considerably smaller than Venus and the earth. Details of his distance size and period will be found in the table. Mars is in opposition at intervals of about two years; he cause it moves at a rate not greatly different from that of the earth. It will be in opposition on 1933 March 2. Though the planet will be well situated for northern observers so far as altitude is concerned it will not be a favourable opposition as to its distance its diameter being only 14" as compared with 25" in 1904 when it was in opposition in August. Mars, like Mercury and Venus, exhibits phases but in a much less degree than those planets. Its disc departs from exact circular form or is gibbous only to the extent of one eighth of its diameter. The other superior planets are too far away to show very appreciable phase though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus Mars exhibits many well defined markings which enable its rotation period to be well ascertained. There are white spots at the poles of rotation that appear to be snow or some material that melts since they dwindle or even disappear in the Martian summers. The remainder of the surface of the disc is made up of dark bluish grey areas that were at one time thought to be water but are now regarded as regions covered with vegetation and extensive areas of ruddy or orange hue largely in the northern hemisphere that may be of the nature of sand or rock. These markings may be considered permanent though they suffer small changes apparently due to cloud formation above them. Among these markings are some of such dimensions that they may be properly called canals but certain fine straight markings seen by some observers but not by others have received this name which is certainly unfortunate, as it has been taken to imply that they are of manual construction but for this there is no sufficient evidence or proof. The possibility of communication with Mars which in some minds has been strengthened by the advent of wireless telegraphy is fantastic.

A method of investigating the surfaces of the planets was evolved a few years ago by photographing through "colour filters." The light before it reaches the plate, which is of suitable sensibility, passes through a screen that absorbs some component rays so that one colour only affects the plate (see infra-red photography, p. 126.) The moon, the planets and terrestrial landscapes have been photographed in this way, and comparison of the various results has suggested an interpretation. In the case of Mars the telescopic features as described above come out very strongly in red light, but fade away as the colours approach the violet end of the spectrum except that the white polar cap increases in strength, all of which is interpreted as showing that Mars has an atmosphere of considerable depth and obscuring power, sporadically cloud bearing, and that the white polar spot is an atmospheric phenomenon. The question of an atmosphere on Mars has for long been a matter of discussion, and to this these experiments form a valuable contribution, though they may not supply a final answer. The two satellites of Mars, Phobos and Deimos, were discovered by Asaph Hall in 1877.

THE MINOR PLANETS.

Moving in orbits which in general lie between those of Mars and Jupiter, are a large number of small bodies called minor planets or asteroids. Every year a considerable number of additions are made to the list, two hundred having been discovered in 1931, a hundred and sixty in 1930, and these large and increasing numbers show that there is as yet no prospect of exhaustion. The magnitude of objects shows that the discoverers are finding planets of a smaller class. The orbits are determined as observations accumulate, and a planet with an orbit is given a permanent number and perhaps a name, but until that is done it is known by letters according to a system. At present there are about 1,200 on the permanent list, and perhaps a thousand that are awaiting further investigation. The four largest, found in the early years of the 19th century, are Ceres, 485 miles, Pallas, 364 miles, Juno, 228 miles, and Vesta, 243 miles in diameter. Some of them are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or $4\frac{1}{4}$ years. Some of the orbits are very oval, and the inclinations of their planes to the Elliptic have considerably different values. The inclination of Pallas is 35° , whilst that of Juno is only 13° . As has been said, the orbits in general lie between those of Mars and Jupiter, but there are some that pass those limits. One planet, Hidalgo, travels out as far as Saturn's orbit; another Eros comes within that of Mars, and may be in some circumstances within 13 or 14 million miles of the Earth. Discoveries of two such planets with abnormal orbits were made in 1932. One found by M. Delporte of Uccle, and known now as Amor, has an orbit which, like that of Eros, lies partly within that of Mars, but at its least distance is within about 10 million miles of the Earth's orbit. The other planet, 1932 HA, comes still nearer to the Earth, and was only 64 million miles away when it was observed last May, the perihelion point of its orbit being within the orbit of Venus. The period of this planet is about 1.6 years, which is the shortest in the record. It was considered to

be of magnitude 22.5 in May last. Its diameter is estimated to be about a mile, so that it is one of the smallest of the asteroids.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only $\frac{1}{4}$ th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form is an oblate spheroid, believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree.

Jupiter has four principal satellites, which were the first celestial objects discovered by the telescope. Galileo, who observed them in January, 1610, is said to be the first, but Simon Marius has good claims to be considered an independent discoverer. It has also five much fainter satellites which are far beyond the powers of small telescopes. One of them was discovered with the 36 inch reflector at the Luck Observatory in 1892. The remaining four, which are extremely faint, were detected by means of photography and may be regarded as among the most difficult to see of celestial objects. The two inner of the major satellites are about as large as our Moon, the two outer about 50 per cent larger.

The characteristic surface features of Jupiter are the bright zones separated by dark belts to both of which the names Equatorial, Tropical and Temperate apply in analogy with the zones on the Earth. Examined by telescope these are found to be full of detail and markings which, in many cases, are largely permanent. Of these the best known is the Great Red Spot and its surroundings, situated on the southern edge of the south Equatorial Belt. There are records of an observation of a spot by Hooke in 1664, which may have been an early appearance of this. The Rev W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857, and in 1878 it came under general observation. A curious bay or hollow in the above named belt was noted by Schwabe in 1831, and is still seen. The mean rotation period of this object and of the Red Spot near it has been found to be $9\text{h } 55\text{m } 37\text{s}$.

The rate of rotation of the planet is found by taking transits of spots on, in other words, by noting the exact times when markings are on the central meridian, and differences in the times given by different markings is a matter of interest. Features of the apparition of 1931-32 were markings on the north edge of Jupiter's N. Temperate Belt, which gave a rotation period, $9\text{h } 53\text{m}$, whereas markings on the north edge of the same belt show $9\text{h } 56\text{m}$. There have been earlier occasions on which rapidly-moving dark spots have been observed in that latitude of the planet. Also a number of small dark humps were seen at the S edge of the S Equatorial Belt which give the abnormally long rotation period of $9\text{h } 59\text{m}$. Apart from such unusual cases the surface of Jupiter, like the Sun, does not rotate as a whole, but individual zones of latitude appear to move at different rates. Two systems are in use for defining the positions of markings on Jupiter. In System I, which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9\text{h } 55\text{m } 30\text{s}$. System II applies to the

temperate Zones, and in this the time of rotation is $9^h 55^m 40^s$.

SATURN

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring system which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness in the same plane which is inclined 25° to the plane of the Ecliptic and it is shown that neither of them can be a coherent mass or in one piece either solid or liquid as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter but of not so pronounced a character are seen on Saturn. Photographs of this planet, taken by ultra-violet light show a wide dark belt near the equator which may or may not be an extension of the dusky ring. Saturn shows a bulging at equator the ratio of the polar to the equatorial diameter being as 13 to 15 and a centrality of the ring with respect to the Ball has been suspected.

Saturn has ten satellites situated outside the rings some of the former are visible in telescopes of low power. Titan the largest, is about one and a half times the size of our moon whilst Iapetus is nearly the same size as our satellite.

Titan was discovered by Huyghens in 1655. Iachyus, Dione, Rheanad and Iapetus (see table p. 153) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789 and Hyperion was observed for the first time almost simultaneously by Bond and Lassell, in September 1848. The most distant Phoebe which was first seen in 1898 (photographically by W. H. Pickering) moves in its orbit in retrograde direction like the two exterior satellites of Jupiter VIII and IX. Themis which is called the tenth satellite though it appears not to be the farthest from Saturn has been observed once only since its discovery in 1900 and its reality is doubtful.

URANUS

This planet, discovered by William Herschel at Bath in 1781 is only just visible to the naked eye. It will be in the evening sky in the early months of 1932 and at the end of the year, being in opposition on October 19. In a telescope Uranus is distinguished from the stars around by its disc which is obvious though less than 4 in diameter, and by the quality of its light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787. The two inner by Lassell in 1847. The Shakespearean origin of the names of the two outer Titania and Oberon, is obvious. The names of the two inner, Ariel and Umbriel were taken from Pope's Rape of the Lock. A hundred years ago it was thought that Uranus had six satellites, neighbouring stars having been mistaken for attendants. All four move in a plane which is inclined 45° to the plane of the Ecliptic and in that plane they move retrograde, or in the opposite sense to the revolution of the planets round the Sun. If however, the plane of their movement is regarded as

inclined 98° to the plane of the Ecliptic their revolution may be considered direct. It is generally supposed that the plane in which the satellites move is that of the planet's Equator. A period of rotation has been determined both by spectroscopic observation and from variations of light of the planet, the value, $10\frac{1}{4}$ hours, being sensibly the same in the two cases.

NEPTUNE

This planet is a telescopic object of about the 8th magnitude that was discovered in September 1846, as the result of mathematical deduction from irregularities shown by the observed positions of Uranus. Its single satellite which was discovered by Lassell in October of the same year, moves in a plane inclined 35° to the plane of the Ecliptic in a retrograde direction like the satellites of Uranus. A period of axial rotation of the planet of 71 hours has been inferred from variability of its light, and another of twice that length from spectroscopic observations, which is adopted. Irton has been suggested as the name of Neptune's satellite but is not generally used.

PLUTO

In the early months of 1930 a series of plates taken and examined at the Lowell Observatory showed a moving object not far from the position which Percival Lowell had predicted for an extra-Neptunian planet, but fainter than the object Lowell hoped to find. Search among the photographs of past years stored in various Observatories showed that this object had been recorded on several of them and its position in earlier years thus obtained gave good material for determination of an orbit. The difficulty that arises is to find trustworthy values of its size and mass that would ensure its correct classification. It is doubtful whether a measurable disc can be seen but from its magnitude and distance it is estimated to be at least as large as Mars, and perhaps as large as the Earth. It shows no cometary appearance in the telescope. The period is 248 years. The distance from the Sun at aphelion is nearly 50 astronomical units and at perihelion 26 such units so that it is just within the orbit of Neptune. The body moves in a plane inclined 17° to the Ecliptic. The orbit is said to be so similar to that predicted by Lowell that the resemblance cannot be due to accident. Pluto does not yet appear as a major planet in the British Nautical Almanac.

THE MOON

Neither Mercury nor Venus so far as is known, has a satellite. The one satellite of the Earth is the Moon which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the Earth but every region of the Moon is presented to the Sun in turn, and neglecting hypotheses as to the possible existence of a lunar atmosphere and its effects it seems likely that there are rather remarkable changes of temperature in the lunar day of half a month. It must be heated to an extreme degree, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,200 miles. Her rate of motion through the firmament is 13° to 35° per day, which implies that she travels over a space slightly exceeding her own diameter in one hour.

When the above numbers are less than 0.500 the planet is *horned*, when greater than 0.500 it is *gibbous* until unity is reached, when it is full.

The average time from a New Moon to the next is *29d. 12h. 44m. 3s.*, but individual cases may range 6 hours and more on either side of this. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. The question as to the origin of these formations, whether they may have been caused by volcanic action, or, on the other hand, by the impact of meteors, forms an interesting subject for discussion. The material of which the Moon is composed is probably the same as that of the Earth.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase of a lunar eclipse is seen the same from all places where the Moon is above the horizon at the time. Solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon (See p. 149.)

The Full Moon which occurs near the Autumnal Equinox rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and $3\frac{1}{2}$ - $5\frac{1}{4}$ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 450 miles; highest summit (Huyghens) reaches 28,000 feet.

Arctarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

Mare Crisium.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, *Linus*, formerly suspected of change. This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon, and about 124 miles in diameter. Situated on S. limb.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In

its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

THE AURORA BOREALIS.

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations. This is regarded as showing the outer limit of our atmosphere, and its height has been determined by means of simultaneous photographs taken from two or more stations so to 60 miles apart. It is found that very few aurorae are below 50 miles high, and above that level the number increases rapidly, the most frequent height being at about 63 and 65 miles. Above 65 miles the number gradually diminishes, but some have been measured as high as 400 miles. It is suggested that the aurora is due to electrical discharge caused by charged particles shot into the earth's atmosphere from the Sun. An auroral display generally happens about the time of the occurrence of a terrestrial magnetic storm (see p. 156). There is some evidence of a tendency for a display to be repeated after an interval of 27 days, which is the period of rotation of the Sun with respect to the earth, and they are more frequent at times of sun-spot maximum. A prominent line in the green in the spectrum of the aurora has given rise to much study and has lately been shown by laboratory experiment to be due to a mixture of oxygen and helium bombarded by high-speed electrified particles, but as this line has been found to be present in the light from the night-sky in non-polar regions when no aurora is visible it may be that this line is not directly connected with the phenomenon.

THE ZODIACAL LIGHT.

This is an appearance whose cause is not completely understood, to be seen only from places distant from towns and cities where the air is free from smoke and the darkness of the sky is not affected by the glare from artificial lights. At such places in northern latitudes it shows, when the moon is absent, as a cone of faint light stretching up slantingly from the Sun before sunrise in the autumn months and after sunset in Spring. From high elevations in the tropics it may be seen throughout the year. A distinction is sometimes made between this and the Zodiacal Band which is an even fainter phenomenon and a prolongation of the Zodiacal Light. This is said to extend entirely across the sky, forming a complete ring, and there is at the point exactly opposite to the Sun a patch, a few degrees in diameter, of slightly brighter luminosity called the "Gegenschein" or "counter glow." The Zodiacal Light has been said to be a mere atmospheric effect, but this is inconsistent with some of the chief features of its appearance. It may be the manifestation of a widely scattered appendage of the Sun or sunlight reflected from a vast concourse of meteoric systems.

METEORS

Another class of objects belonging to the Solar system are the meteoric streams which give rise to occasional showers of meteors falling stars or fireballs and are all the same class of object the distinction being only one of size. They are visible in varying number on every night of the year and are sometimes so abundant as to form striking phenomena. This is some reason for the supposition that meteor swarms are the remains of disrupted comets and that Tempel's comet is the parent of the Leonid meteors. A considerable display occurred on October 9, 1905, and a smaller one on Oct 9, 1907 from a radiant at 265° and 55° in Draco which appear to have been derived from Giacobinini comet of 1900 that passed its perihelion on December 11, 1906, and has a period of about 6 $\frac{1}{2}$ years. Its next return will therefore be in 1933 and meteors of the stream may be seen this year. The comet Pons Winnecke whose orbit resembles that of a meteor stream that has supplied a display (1916) at the end of June 14 due at perihelion this year. The real paths of a great number of meteors have been computed, and the average heights are about 70 miles at the beginning and about 48 miles at the end the speeds varying from 10 to 45 miles per second but occasionally these limits are passed. Fireballs or very bright meteors form a very important branch of meteoric astronomy. These objects make their appearance at all times of the year unexpectedly, so that they are often imperfectly noted and computation of their flight is not practicable. On February 18, 1932 at 8.29 p.m. a fireball as bright as the full moon suddenly lit up the sky in Cornwall and Devon and was observed by many people in those counties and in South Wales. When first seen it was at a height of 86 miles over the English Channel, 19 miles N by W of Lizard Head and finally vaporised at a height of 30 miles over a point 25 miles S.W. of Penzance. The length of the visible track was 98 miles, and the speed 29 miles per second. Very brilliant fireballs were observed in England on August 6, 8 and 10, 1932. Meteorites are large meteors which actually reach the surface of the earth, and are much rarer than either shooting stars or fireballs. One of these bodies fell in North Wales on April 14, 1931, the descent being accompanied by thunderous reports and earth

This table gives the angular dimensions of the outer limit of Saturn's outer ring as seen from the Earth. The + sign shows that the North side of the ring is presented to the Earth throughout the year.

quake like rumbles. The meteorite broke up before reaching the earth, and a fragment weighing 5 oz was picked out from the hole it made in the ground, the rest of the pieces being probably lost in the sea.

On the previous page is given a list of the days when meteor showers may be expected, with the radiant points from which the meteors diverge. The dates given are those on which meteors may be expected in fair numbers, but in some cases the range of apparition extends considerably beyond, the Perseids for example have been seen from the beginning of July to the end of August. The radiant in these instances corresponds to the date of maximum COMETS.

Comets that revolve in elliptical orbits round the Sun as focus and return to view at periodic intervals, may be considered members of the Solar system. The periods that have been confirmed by returns range from 3½ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Those that revolve in periods from 3½ to

9 years are specially numerous. Their paths extend outward to the region of Jupiter's orbit and from this circumstance they are termed Jovian comets. It has been supposed that these comets have been drawn into the system by the attraction of Jupiter, but this hypothesis has lately been questioned on statistical grounds and eruption from Jupiter substituted.

Nine of the periodic comets were expected to return to perihelion in 1933 which is an unusually large number and of these five were observed up to October 1. Besides these in the same period seven comets hitherto unknown were discovered two of them, however being little observed. This total of 12 is in excess of that for any previous year.

In 1933 Finlay's comet discovered in 1886 and last seen in 1926, is expected to return to perihelion at the end of February or beginning of March. The perihelion passage of the comet known as Pons Winnecke is computed to be about May 18 and that of Giacobini-Zinner in June, these being each associated with a meteor shower (see p 153). There are other comets whose computed perihelion falls in this year which may or may not be seen.

Alternative names of stars (see pages 140-141): Rigel = β Orionis, Capella = α Aurigae, Betelgeuse = α Orionis, Sirius = α Canis Majoris, Castor = α Gemini, Procyon = α Canis Minor, Pollux = β Gemini, Regulus = α Leonis, Spica = α Virginis, Arcturus = α Bootis, Antares = α Scorpii, Vega = α Lyrae, Fomalhaut = α Piscis Australis, Altair = α Aquilae, Markab = α Pegasi, Achernar = α Eridani, Canopus = α Argus, Mizar = ζ Ursa Majoris.

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900.0 miles and the diameter of the Equatorial circle 7,926.7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5.5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision the centre of gravity of the Earth and Moon moves in this plane and both revolve round the centre of gravity but not precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of $23\frac{1}{2}^\circ$ and it is this tilt which causes the seasons. At some time of the year the Sun is high above the Equator in mid-latitudes both north and south, and not only does the high altitude make the days longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versa*. Since the axis of the Earth is inclined always in the same direction the line of intersection of the Equator with the Ecliptic moves parallel to itself as the Earth travels round the Sun (approximately). The instants when this line passes through the Sun are called the Equinoxes. The Sun and Earth are surrounded on all sides by the stars and because the Earth moves round the Sun the latter changes its position with respect to the stars during the year and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is $18\frac{1}{2}$ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time which is the sidereal day. Because of the movement of the Earth in its orbit the length of the solar day is more than this by about four minutes (see pp 137-137). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity or the North Pole of the Earth moves in a curve roughly spiral about the pole of figure as centre at a distance of a few feet from it.

THE TIDES

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed the analysis will show that the complete tidal movement can be represented by the combination of a

series of periodic terms, and if these terms are each carried forward to some future date their recombination will give the predicted tide taking the mean sea level as datum, writing generally, at any place high water occurs twice in every 24 hours, the interval between successive happenings being 22 hrs 25 mins. High water is at its highest (spring) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon but occur later the interval being known as the *age* of the tide thus at London Bridge, the highest or spring tide occurs 24 days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports. The mean level of the sea remains practically constant but small changes have been detected which may be assigned to various causes.

TERRESTRIAL MAGNETISM

The best known manifestation of this phenomenon is its effect on the needle of a mariner's compass, which except for the variations to be immediately described points continually northward. The north point indicated by a compass needle is not, except in particular cases the North point shown by astronomical observations in other words the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Lines of equal magnetic declination run across the British Isles in directions approximately parallel to that of a line from Land's End to Edinburgh. Along a line joining Cambridge to Littlehampton, the declination (West) is approximately the same as at Abinger. At Dover it is now rather more than a degree less from Newcastle to Plymouth it is nearly $1\frac{1}{2}^\circ$ greater, and along a slightly curved line from Killarney to the island of Lewis the west declination is 5° greater than at Abinger. There are two points on the globe to which the magnetic meridians and lines of equal declination converge, known as the Magnetic Poles. At these points a freely suspended magnetic needle would stand vertically. The position of the North Magnetic Pole adopted in Admiralty charts is lat $70^\circ 50' N$, long $96^\circ W$ which differs nearly a degree in each element from the position found by Sir John Ross in 1831, and agrees more nearly with the position found by Amundsen in 1903-5. The position to be found by the observers now engaged in polar regions (see p 108) will be of interest. The position of the South Magnetic Pole found in 1840 was $73^\circ 30' S$, $147^\circ 30' E$. The position

now adopted quite provisionally $172^{\circ} 69' 155''$ E. The magnetic declination at any place changes gradually year by year. That the compass needle does not in general point true north and south but that it is inclined a certain amount east or west and that the amount varies with the locality was recognised among western nations by the end of the 15th century (Columbus being credited with the discovery). The Dip or inclination to the horizon was first noticed by Hartmann of Nuremberg in 1544, and was measured by Norman, of London, in 1576. That there is a continual change in the magnetic declination was discovered by Gellibrand in 1634.

Magnetic Declination at London

Year	
1580	$11^{\circ} 15'$ East
1665	$1^{\circ} 30'$ West
1765	20° West
1800	24° West

In 1829 the westerly declination at Greenwich was about $24^{\circ} 25'$ which was probably its maximum. The needle has been since moving slowly eastward at that place and in the year 1925 the declination (mean) was observed to be $13^{\circ} 10'$ west. The work of recording earth magnetism was then transferred from the Royal Observatory Greenwich to Abinger near Dorking in Surrey. The values of the elements there found in successive years are given in the following table—

Year	Dip	H _F	V _F	Dip
1925	0°	1860	42946	$66^{\circ} 35'$
1927	$12^{\circ} 58' W$	18575	42932	$66^{\circ} 36'$
1930	$12^{\circ} 54' W$	18542	42924	$66^{\circ} 38'$
1931	$12^{\circ} 13' W$	18544	42923	$66^{\circ} 38'$
1932	$12^{\circ} 30' W$	1854	42924	$66^{\circ} 39'$
1933	$11^{\circ} 54' W$			

The values for 1932 are to be taken as provisional, and the declination given for 1933 is inferred only. V_F signifies vertical force.

The mean difference Abinger minus Greenwich for Dec. H_F and Dip were found to be

1925	+ 12.8	+ 0.0183	- 16.2
1931	+ 13.7	+ 0.0170	- 16.0

The daily movement in declination of the needle at Abinger is 2 or 3 per cent less in amount than that at Greenwich.

The declination varies during the 24 hours for the needle makes a small excursion in the morning from East to West and returns the same at Greenwich being about 12 in summer and 7 in winter. The needle occupies its mean position in the morning about 20^h and again about 18^h throughout the year. It reaches its most westerly position about 14^h and its most easterly position during the night or early morning, at a time which varies during the year. The inclination or dip also varies in a similar manner to the declination. Since these changes of the magnetic elements are greater during the hours of daylight than in the night are much

greater in summer than in winter, and are evidently affected by the solar activity—for the daily range is larger at times of spot maximum than at minimum—it is to be concluded that they depend on the Sun.

MAGNETIC STORMS

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm and may be accompanied by spontaneous electric earth currents which if violent, interfere with telegraph working, and is often synchronous with a manifestation of the Aurora Borealis. A suspected recurrence of magnetic storms after an interval of 27 days that would support the theory that they are caused by radial emanations from the Sun which strike the Earth, the hose pipe theory—has received some proof, and it has been found that the 27 day period is shown by magnetic calms as well as by magnetic disturbances. Investigation shows that this recurrence does not obtain in the case of the most intense storms, but that there is a tendency for a storm of minor degree to be followed by another of its kind after the period named, which is not easily explained. There is frequently, but not always a large spot on the Sun contemporaneous with a large storm leading to the hypothesis of active areas on the Sun that may or may not be marked by a spot.

SUMMER TIME ABROAD

Country	By no.	Is
As in Great Britain		
Irish Free State		
France	1st Sat in March at 23 hours 0 ^h	1st Sat in Oct at 24 ^h
Belgium		
Netherlands	(1932)† May 22	October 1
Portugal	(1932) April 2	October 1
Rumania	1st Sat in April	1st Sun in Oct
Finland	June 20	Sept 30
Greece	(No information as to dates)	
Soviet Union	A permanent advance of 1 hour summer and winter	
U.S.A. and Canada	Adopted in some but not all States by local regulation	
Brit Honduras	October 1	Feb 14
Argentina	September 1	March 31
Brazil	(1932) October 3	March 31
Chile	September 1	April 1
New Zealand	and Sun in October (advanced 1½ hour)	31st Sun in Mar

This list may not be complete

* In France and Belgium an alternative Saturday is chosen if necessary to ensure that Easter day is not between the beginning of summer time in France and in Belgium. In 1932 it is 1 May; the summer time began in France on April 2. This year summer time will begin on March 25.

† The entry (1932) indicates that the dates are those adopted in that year but may be altered in others.

Duration of Light and Darkness—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness or the period of moonlight and sunlight during the twelve hours from 12^h to 6^h. These small diagrams have four divisions each representing three hours and a division is left unblackened if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year

are  which reduce to  in the summer

Greenwich Mean Time

APART from abstract and philosophical considerations time in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars because of the movement of the Earth round the Sun which is not constant because of the ellipticity of the orbit. The length of the Solar day also varies because the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant but that of the apparent or the interval from one transit of the Sun across the meridian to the next varies for the reasons above given and it happens that the longest apparent solar day is about December 22 and the shortest about September 16.

A unit and method of measurement having been established it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun is on some chosen meridian. The time is called the Local Mean Time of any place through which that meridian passes. Usually some standard meridian such as that of Greenwich is chosen and the time of that meridian is used throughout a whole country and hence the expression Greenwich Mean Solar Time or more usually Greenwich Mean Time, arises (see Zone Standard Time p. 158).

Apparent Solar Time

The time shown by a sundial is called Apparent Solar Time and is affected by the two causes mentioned which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, with a precept for its use.

The Astronomical Day

For purposes of Astronomy the day formerly began at noon and the hours following noon were numbered successively from 0 to 23. A change was made in 1925 and the Astronomical Day now begins at midnight the hours being numbered in this way as has been the practice in this Almanack since 1921 (See Note p. 84).

Rhythmic Time Signals

For the purpose of comparing the time shown by a distant clock with that of the Greenwich standard signals issuing primarily from Greenwich are broadcast from the Post Office Wireless Station at Rugby each day at 20h and 28h. In accurate comparison a series of signals of the rhythmic scientific or Vernier type is sent. The zero signal is exactly synchronous with a beat of the standard clock and those that follow are at intervals of 66/61 seconds. The comparison is made by noting the coincidence of a beat of the distant clock beating seconds with a signal. If a tick of the clock coincides with the zero signal, it is clear that the clocks differ by an integral number of seconds. If however

incident does not come at the zero signal but at the n th following the difference of the clocks contains a fraction of a second involving $n/61$.

Sidereal Time

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars and begins at any place when the

First Point of Aries is on that meridian. In observatory practice time is measured and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation. The error and rate of the sidereal clock are found by observing the instant it shows when certain stars known as Clock Stars, cross the meridian and comparison of this with the known time of transit (star + R.A.) will give the error of the Sidereal clock and from this the error of the Mean Solar clock can be found by comparison and computation as below.

The rule for finding the Mean Time of transit of any object from its Right Ascension or, what is the same thing of converting Sidereal into Mean Time may be stated thus. From the given Right Ascension or Sidereal Time subtract the Sidereal Time at 0h (22h) giving Noon and further diminish the result at the rate of 20 sec. per hour or by the table on p. 137. If the R.A. should be smaller than the 24h at noon 24h must be added. The final result will be the mean time reckoned from noon to which 22h must be added to convert into G.M.T. as now used.

Ex—At what time will Sirius cross the meridian on August 31.

R.A. of Sirius + 24h	30 42 12
Sid. Time at Noon Aug 30 (subt.)	20 32 35
Interval of Sidereal 1 from noon	20 9 17
Reduction from p. 137 (subt.)	3 18
Interval of Mean Time from noon	20 5 59
G.M.T. (G.I.) of Southern	8 5 59

For stars that transit after noon it would have been necessary to use the Sidereal Time at Noon for August 31.

Mean Time may be converted into Sidereal Time by reversing this process or otherwise by taking out the G.M.T. of the zero of the Sidereal clock which gives the time to be converted, making use of col. 9 on page 2 of the month + 9 —

G.M.T. (G.I.) Aug 31	8 5 59
From col. 9, p. 111	1 24 53

Interval of Mean 1 from 0h Sid.	6 41 6
Acceleration from p. 137 (add)	3 16

Corresponding Sidereal time	6 42 12
-----------------------------	---------

Summer Time

In 1926 an Act dated May 17 ordained that during a defined period of that year the legal time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time. An Act of 1922 (July 20) specified that the period should begin at a clock G.M.T. in the morning of the day following the third Saturday in April or if that day is Easter Day the day following the second Saturday and should end at a clock G.M.T. in the morning of the day next following the third Saturday in September. The Act renewed in 1924 and 1925 was made permanent (August 7, 1925) and modified by substituting the first Saturday in October for third Saturday in September. The Act applies to Great Britain Northern Ireland the Channel Islands and the Isle of Man. A list of the periods in each year during which Summer Time has been used since its adoption will be found in this Almanack for 1926.

A Summer Time scheme has been tried in other countries with varying success. A list of the countries where it is now used is given on the opposite page.

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian.* Other nations similarly used the time of their own capital but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now almost throughout the world a Standard Time which differs from that of Greenwich by an integral number of hours, either fast or slow, is used. In a few cases the difference includes a half hour.

The Standard Time adopted in various countries is given below. In the United States and Canada five standard times are used, these large territories being divided into zones approximately $7\frac{1}{2}^{\circ}$ on either side of five central meridians. Brazil is divided into three zones in which the times 3, 4, and 5 hours slow on Greenwich are standard respectively. For the North coast of Siberia the hourly zones from 12 hours to 4 hours fast have been adopted.

11½ " S	Western Samoa (British)

In the Tonga or Friendly Islands the time 12h 30m fast on Greenwich is used; the longitude is about 174° 40m W but the Date line (see below) passes to the East of them. The time of Aden is 59½ fast on Greenwich is standard in Aden and British Somaliland. The time of Calcutta is 5½ fast on Greenwich is 3h 45m slow on British Guinea 3h 45m slow. The time 2 hours fast on Greenwich is called First European that 1 hour fast Mid European the time 4 hours slow on Greenwich has been called Maritime, Inter Colonial, or Atlantic Time. The names of the other zones of North America are as shown.

THE DATE OR CALENDAR LINE

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian and is drawn so as to include islands of any one group on the same side of the line, or for political reasons the line is indicated by joining up the following eight points—

- (1) Lat 60° S, long 180°
- (2) " $51\frac{1}{2}^{\circ}$ S, long 180°
- (3) " $45\frac{1}{2}^{\circ}$ S, long $179\frac{1}{2}^{\circ}$ W
- (4) " $15\frac{1}{2}^{\circ}$ S, long $179\frac{1}{2}^{\circ}$ W.
- (5) " 5 S, long 180°
- (6) " 40° N, long 180°
- (7) " $54\frac{1}{2}^{\circ}$ N, long 170° E
- (8) " 65° N, long 169° W.

Then through the centre of Bering Strait to a point lat 70° N, long 180° .

THE AGE OF THE EARTH.

IN the view of science, any date for the "Creation of the World" such as the year 4004 B.C. as adopted by Archbishop Ussher from scriptural chronology is quite untenable. From the assumption that its heat is sustained solely by contraction of its bulk, Lord Kelvin deduced 30,000,000 years as the time that the Sun has existed, but this is too short to be accepted by geologists whose researches require a considerably longer time for the formation of terrestrial strata. The age of the Earth has been deduced astronomically from the eccentricity of Mercury's orbit and from the tidal theory of the origin of the Moon. Geologically by various methods, and, since the discovery of radio activity, from the ratio of the quantities of lead and of radio active elements in rocks in the Earth's surface which are held to result from the transmutation of uranium. All the evidence is more or less consistent with the conclusion that the Earth has existed as a planet for a period between 1,500 and 3,000 million years.

GEOLOGICAL PERIODS

- I AZOIC ('Without Life') containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.
- II Eozoic ('Dawn of Life') characterized by the first appearance of animal life.
- III PALEOZOIC ('Old Life') or PRIMARY, containing traces of extinct animal life —
 - i Cambrian exemplified in Wales (Cambrian), Cumberland, &c. the earliest group which possesses a connected suite of fossils.
 - ii Ordovician exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
 - iii Silurian, named after the ancient British inhabitants (Silures) of S. F. Wales.
 - iv Devonian or Old Red Sandstone from the prevalence of the system as a marine formation in Devonshire.
 - v Carboniferous, including Coal Measures, Millstone Grit and Mountain Limestone.
 - vi Permian, from the Russian province of Perm, where these strata are widespread.
- IV MESOZOIC ('Middle Life') or SECONDARY with intermediate forms of animal life —
 - i Triassic, from the three (tri) divisions of the type formation in Germany.
 - ii Jurassic typically displayed in the Jura Mountains.
 - iii Cretaceous from the chalky nature of its representatives where first studied.
- V CAINOZOIC ('New Life') or TERTIARY, containing forms of existing life —
 - i Eocene, the dawn or beginning of new forms of life i.e. existing species.
 - ii Oligocene containing a few still existing species.
 - iii Miocene containing a minority of existing species—less than 50 per cent.
 - iv Pliocene the fossil remains show a majority of still existing species.
- VI QUATERNARY ('Fourth in Order') or POST TERTIARY —
 - i Pleistocene or Glacial, the greatest number of the remains are those of still existing species. Period of last Great Ice Age.
 - ii Recent or Post Glacial.

Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice sheet (Vol. I). Traces of human life are first found in Vol. IV (See also below).

THE ANTIQUITY OF MAN

Pithecanthropus erectus (Erect Ape man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil Java. These are held to be remains of a creature of Pleistocene times (see Geological Period Vol. I) about midway between the Orangutan and Man in development.

Sinanthropus pekinesis (Peking Man).—A skull found at (Houkoutien, 40 miles S.W. of Peking (China Dec. 2, 1929)), is ascribed to the same period as the Java type, but the brain development is greater than the Trinil skull and the brain case much thinner than that of the Piltown skull.

Australopithecus africanus (Erect Man ape).—A skull was discovered in a limestone deposit at Taung (Western Cape Colony), in 1925, by Professors Dart and Young of Witwatersrand University. In connection with this discovery Sir A. Keith FRS, has declared that traces of human life may yet be discovered in Miocene times (see Vol. I, V, III).

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Muer, Heidelberg in 1907. This is held to be that of a primitive man of the Pleistocene Period.

The Piltown Skull (*Eoanthropus* or Primitive Man).—Discovered in 1922 at Piltown, Sussex and ascribed to primitive man of early Paleolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1856 in the Neanderthal Ravine near Düsseldorf, Rhinish Prussia, and others found at Spy, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long headed) race in Europe living about 50,000 years before the Christian Era. In 1925 a similar skull was found near Iabgha, Palestine.

Homo Primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brax and Bruun, Moravia, and at Galle Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION

The terms employed by ethnologists refer to periods not of time, but of culture, and are of local application only there being no universal synchronous sequence in all parts of the world. Races of Europe, Asia and America had reached the Iron Age of development long before the 18th century A.D. while races in Oceania were still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Bolitic* (or Dawn of the Stone Age) and this

period may have extended to 600,000 years B C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments from the chipped, leaf shape forms, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps from 400,000 to 200,000 B C, to later and more effective flint points, arrow heads and spear heads, flat on one side, known as *Moustrian* (from le Moustier where many such implements and other remains were found). The Moustrian period is held to have lasted until about 10,000 B C, when *Neolithic* (or New Stone Age) weapons, polished and less crudely fashioned were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging the graves being, only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil—Cultivation is believed to have followed the interment of the dead about 10,000 B C and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Iraq) no later than 6,000 B C and in *Egypt*, under the first of the Pharaohs (Amenes) about 5,000 B C. It is not yet known if a similar degree of Eastern civilization had been reached in China or elsewhere during (or before) that of Iraq and Egypt.

The Bronze Age—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements and utensils of cast bronze superseded those of stone, wood, horn or bone. The designs and decorations suggest that this stage of culture was introduced into Europe from Asia and it must therefore be dated in the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, (Chaldea, Assyria and Egypt about 4,000 B C. In South Eastern Europe about 2,000 B C. spreading over the rest of Europe from 1,000 B C. to 100 A D, by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Paleolithic Age. With the Iron Age, was re-introduced interment of human remains in place of Bronze Age cremation, but the bodies were laid in full length in the ground and not huddled up as in the Stone Age.

EPOCHS AND

THE ROMAN CALENDAR

Roman—Roman historians adopted as an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C. and the ordinal number of the year in Roman reckoning is followed by the letters A.U.C. (*Ab Urbe Condita*). The Calendar that we know has developed from one established by Romulus who is said to have used a year of 304 days divided into ten months beginning with March, to which Numa added January and February making the year consist of 12 months of 30 and 29 days alternately with an additional day so that the total was 355. It is also said that Numa ordered an intercalary month of 29 or 30 days in alternate years making 90 days in eight years to be inserted after February 23 but there is some doubt as to the origination and the details of the intercalation in the Roman Calendar, though it is certain that some scheme of this kind was inaugurated and not fully carried out in the year B.C. 465 Julius Cæsar, who was then Pontifex Maximus found that the Calendar had been allowed to fall into some confusion. He therefore asked the help of the Egyptian astronomer Sosigenes which led to the construction and adoption (B.C. 45) of the Julian Calendar and by a slight alteration to the Gregorian now in use. The year B.C. 46 was made to consist of 445 days and is called the *Year of Confusion*. In the Roman (Julian) Calendar the days of the month were counted backwards from three fixed points or days and an intervening day was said to be so many days *before* the next coming point the first and last being counted. These three points were (1) the Kalends, (2) the Nones, and (3) the Ides. Then positions in the months and the method of counting from them will be seen in the Table on p. 160.

THE CHRISTIAN CALENDAR

In the Christian chronological system the years are distinguished by cardinal numbers before or after the Incarnation the period being denoted by the letters B.C. (Before Christ) or more rarely A.C. (*Ante Christum*) and A.D. (*Anno Domini*). The correlative dates of the epoch are the 4th year of the 194th Olympiad the 753rd year from the Foundation of Rome 3761 A.M. (Jewish Chronology) and the 4747th year of the Julian Period. This was introduced into Italy in the sixth century and though first used in France in the seventh it was not universally established there until about the eighth century. It has been said that the system was introduced into England by St. Augustine (A.D. 596) but was probably not generally used until some centuries later. It was ordered to be used by the Bishops at the Council of Chelsea A.D. 826. The actual date of the birth of Christ is somewhat uncertain. December 25 B.C. 4, is supported by several lines of argument.

The Day, Week and Month—Measurements of time are based on the times taken by the earth to rotate on its axis by the moon to revolve round the earth and by the earth to revolve round the sun. From these which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes each of 60 seconds. The hours are counted from midnight up to 24 at noon, and again from noon up to 24 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24 hour

CALENDARS.

reckoning ignores A.M. and P.M., and the hours are numbered 1 to 23 from midnight to midnight. For the *Astronomical Day* see p. 157.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox 365.2422 mean solar days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *Leap Year* and consists of 366 days. The last year of a century is not leap year unless its number is divisible by 400 (e.g. the years 1600 and 1900 had only 366 days).

Old and New Style—In the Julian Calendar all the centennial years were leap years and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years, or, in other words the equinox fell on March 11 of the calendar whereas at the time of the Council of Nice A.D. 325 it had fallen on March 21. In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th and that every fourth centenary year only should be a leap year (*sextus*). This change was adopted by Italy France Spain and Portugal in 1582 by Prussia the German Roman Catholic States, Switzerland Holland and Flanders on Jan. 1 1583 Poland 1586 Hungary 1587 the German and Netherland Protestant States and Denmark 1700 Sweden (gradually) by the omission of eleven leap days 1700 1740 the British Dominions (which included the then North American Colonies) in 1752 by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This *Gregorian Calendar* was adopted by Japan in 1873 China in 1912 Bulgaria in 1914 Turkey and Soviet Russia in 1917, by Yugoslavia and Rumania in 1919 and by Greece in February, 1923. The Russian Greek Serbian and Rumanian Churches did not adopt the Julian Calendar until May 1923, when the Gregorian slightly modified, was adopted. The difference between the Old and New Styles was 11 days after 1700, 12 days after 1800 and has been 13 days since 1900. It should be added that the word *style* actually connotes the date of the beginning of the year. It happened that a change of the latter from March 25 to January 1 was made in England in 1752 the year in which the change from Julian to Gregorian Calendar was made, and the words Old and New Style have been used in a sense which is not strictly correct, but nevertheless expressive.

New Year's Day—In England in the seventh century and as late as the thirteenth the year was reckoned from Christmas Day but in the twelfth century the Anglican Church began the year with the Feast of the Annunciation of the Blessed Virgin (Lady Day) on the 25th March, and this practice was adopted generally in the fourteenth century. The civil or legal year in the British Dominions (exclusive of Scotland), as opposed to the Historical which already began on Jan. 1 began with 'Lady Day' until 1752. But in and since 1752 the civil year has begun with Jan. 1. Dividends are however, still paid by the Bank of England on the last day of Quarters according to a reckoning based on Old Style. The Income Tax year begins on April 6 in accordance

with Act of Parliament (39 Geo III 1798) New Year's Day in Scotland was changed from Mar 25 to Jan 1 in 1800. On the Continent, Jan 1 was adopted as the first day of the year by Venice in 1562, Germany in 1544, Spain, Portugal and the Roman (atholic) Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1599, Protestant Netherlands 1583, Russia 1723, Muscovy 1751.

Golden Number—In the year 432 B.C. Meton, an Athenian astronomer, found that 354 lunations are very nearly though not exactly, equal in duration to 12 solar years, and hence, considering the mean motion only, after 19 years the Phases of the Moon recur on the same days of the month. This discovery was held to be of so great importance that the dates of full Moon in a cycle of nineteen years were inscribed in figures of gold on public monuments in Athens. The cycle of nineteen years is called the *Metonic Lunar Cycle*, and the number showing the position of a year in the cycle is called the *Golden Number* of that Year.

Epaet—the age of the calendar Moon on Jan 1 in each year, formerly used in determining the date of Easter.

Solar Cycle—A period of twenty eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period—Proposed by Joseph Scaliger in 1582. The period is 7980 Julian years, and its first year coincides with the year 4713 B.C. 7980 is the product of the number of years in the solar cycle, the Metonic cycle and the cycle of the

Roman Indiction (28 X 29 X 15) the Julian Day, as used in astronomy, begins at noon.

Roman Indiction—A period of fifteen years, instituted for fiscal purposes about A.D. 300.

The Dominical Letter is one of the letters A-G which are used to denote the Sundays (101st Day) in successive years. If the first day of the year is a Sunday the letter is A, if the second B, the third, C, and so on. In a leap year requires two letters the first for Jan 1 Feb 29, the second from March 1-Dec 31.

Easter Day is the first Sunday after the full moon which happens upon, or next after the first day of March, and if the full moon happens upon a Sunday, Easter day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo II, cap. 23), and explanation is given in the preamble to the Act that the day of full Moon depends on certain tables that have been prepared. These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens, but a hypothetical Moon on whose "Full the date of Easter depends, and the lunations of this "Calendar Moon consist of twenty nine and thirty days alternately with certain necessary modifications to make the date of its Full agree as nearly as possible with that of the real Moon (*Paschal Full Moon*).

By the above ordinance Easter falls on one of 35 days. A proposed reform that would limit it to one of 7 days has received Parliamentary support, but there is no prospect of its adoption.

THE JEWISH CALENDAR

"AND let them be for signs and for seasons, and for days and for years (Genesis i 24). "He appointed the moon for seasons" (Psalm civ 29). There is therefore Divine authority for the use of the Sun and Moon as a basis for our record of the sequence of events or in other words, the calendar. The story that the Flood began on the seventeenth day of the second month (Gen vii 11) that after the end of the hundred and fifty days, the waters were abated and that on the seventeenth day of the seventh month the ark rested on Ararat indicates a calendar of some kind, and that the writers recognised thirty days as the length of a lunation. There is other mention of months by their ordinal numbers in the book of Genesis and in other of the early Scriptures and in establishing the rite of the Passover. Moses speaks of Abib as the month when the Israelites came out from Egypt, which was to be the first month of the year (Exodus xli 4 xlii 2). In the book Kings I three months are mentioned by name. At the second month, Ethan the seventh and Bul the eighth (Chap. vi 1, 37 viii 2, vi 38), but none of these are names now in use. After the captivity in Babylon the Hebrews apparently called the months by the names now in use, for Nisan which is called the first month, and therefore identical with Abib, and six others are mentioned in one or more of the books of Esther, Nehemiah, Zechariah and Malachi. Five of these six are also distinguished by their ordinal number as well as by their modern names, but the remaining five months of the year are not referred to either in the sacred books or in the Apocrypha.

The origin of these names is said by some to be Chaldean but is more probably Syriac. The statement about certain officers of Solomon's household, twelve in number each of whom acted for one month in a year (I Kings iv 7), show that the Jewish year consisted usually of twelve months though others that refer to yearly harvests, and such events imply that the year was solar as well as lunar. There is however, no mention in the Bible of an intercalated month or its equivalent.

The Passover was to begin on the fourteenth day of Abib or the Abib as it is generally called, and other ceremonies were similarly ordained for certain days in other months consequently it was necessary to determine the beginning of the month or, the New Moon, which was done from the first it is believed by actual observation. There is no instruction in the Scriptures as to how this was to be done, but it is likely that the first day of the month was that on which the crescent became visible which was proclaimed by the sound of silver trumpets (Numbers x 10). There is good evidence that after the captivity and in the later years of the Jewish kingdom much care was bestowed on the determination of the New Moon by observation. Men of good repute were chosen as watchers, who looked for the first appearance of the crescent from advantageous positions and reported to members of the Sanhedrin who questioned them as to the shape of what they had seen, and thus determined a date of New Moon that was circulated by runners to places within a certain distance of Jerusalem. It is not known that any attempt was made by these elders to estimate the actual time of conjunction. It is possible, but there

is no evidence on the point, that they were charged with the duty of saying when a month should be intercalated.

The method of determining the days of New Moon above indicated was continued in Palestine, but after the Dispersion Jewish communities in other lands were left in some doubt as to the times of Fasts and Festivals, and this led to the formation of the Jewish Calendar as used today which, it is said by some was done in A.D. 358 by Rabbi Hillel II, a descendant of Gamaliel—though some assert that it did not happen until much later. This calendar is lunar solar, and is based on the lengths of the lunation and of the tropical year as found by Hipparchus (c. 200 B.C.), which differ little from those adopted at the present day (see p. 154). The years are divided into cycles of 19 because 19 of such lunations are almost precisely equivalent in length to 19 tropical years. The normal calendar year called a Common Regular year consists of 12 months of 30 days and 29 days alternately. Since 12 months such as these comprise only 354 days in order that each of them shall not diverge greatly from an average place in the solar year a thirteenth month is occasionally added after the fifth month of the Civil year, or as the penultimate month of the Ecclesiastical, the years when this happens being called Embolismic. Of the 19 years that form a cycle, 7 are embolismic, they occur at places in the cycle indicated by the numbers 3, 6, 8, 11, 14, 17, 19 these places being chosen so that the accumulated excesses of the solar years should be as small as possible. Nisan is the first month of the Civil year. The first of each month is called the day of New Moon though it is not necessarily the day of astronomical New Moon that being the day on which conjunction of Sun and Moon occurs but there is generally a difference of a day or two for reasons depending on circumstances such as those to be immediately stated.

The dates in the Christian calendar of the first days of the months depend on that of the first of Nisan, which therefore controls the dates of fasts and festivals in the Jewish year. For certain ceremonial reasons connected with these, the first of Nisan must not fall on a Sunday, Wednesday or Friday, and if this should happen as the result of the computation it is postponed to the next day in the Christian calendar. Also if the New Moon of Nisan falls on any day of the week at noon or later than noon, then the following day is to be taken for the celebration of that New Moon and is Nisan 1, provided that it is not one of the forbidden days, in which case there is a further postponement of a day. These rules and others have been considered in detail and finally a calendar scheme has been drawn up in which a Jewish year is of one of the following six types—

	Days
Common Deficient having	353
Common Regular having	354
Common Abundant having	355
Embolic Deficient having	353
Embolic Regular having	354
Embolic Abundant having	355

In an Abundant year whether Common or Embolic, Marheeshvan the second month of the Civil year, has 30 days instead of 29; in Deficient years Kislev, the third month, has 29 instead of 30. The additional month in Embolic years which is called Adar I, and precedes the

month called Adar in common years and Adar II or Ve Adar in embolismic, always has 30 days but neither this nor the other variations mentioned are allowed to change the number of days in the other months which still follow the alternation of the normal twelve.

These are the main features of the Jewish calendar which must be considered permanent because as a Jewish law it cannot be altered except by a great Synhedrion. Some minor but important points may be mentioned.

The time used is that of the meridian of Jerusalem which is 2h 21m in advance of Greenwich time.

The Jewish day begins at Sunset but for computations of the Calendar it is assumed to begin at 6 p.m. by time of Jerusalem. When a Jewish day is said to correspond to the Christian day reference is made to the last eighteen hours of the former and to the first eighteen hours of the latter. The first day of the Jewish week corresponds to the Christian Sunday but it coincides with the 24 hours which elapse between 6 p.m. of Saturday and 6 p.m. of Sunday.

In a month that follows one of 30 days, the day preceding its first day is also observed as the day of New Moon. The reason for this is not certain but a suggestion is that since a civil month of 30 days is about 22 hours shorter than a lunation and one of 30 days about 22 hours longer, half the last day of the latter actually belongs to the month that follows it, and must be considered as the day of the Full Moon of the second month equally with the day that follows. It is said that it may be in some way connected with the fact of early history that messengers could not reach distant places in a one day journey but this is somewhat obscure.

In tables that give Ishri in dates of the Christian calendar arranged in cycles, it is seen that dates in parallel years in the cycles are approximately the same but there are differences of a day or two. The occurrence of leap year in the Gregorian calendar is obviously one of the causes of this variation.

The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B.C. or year 954 of the Julian Period, and the epoch or starting point of Jewish Chronology corresponds to October 7 B.C. 3761. Thus the year 1933 A.D. is *Anno Mundi* 5693 94 in the Jewish Calendar.

(Part of A.M. 5693 and A.M. 5694)

Ellul 1 New Moon	Aug 12*

* The previous day is also observed as the day of the New Moon.

Note: The day of the Jewish Calendar begins at sunset on the day previous to that of the dates.

THE MUHAMMADAN CALENDAR

It appears to be certain that from very ancient times till shortly after the beginning of the fifth century of the Christian Era the pagan Arabians made use of a purely lunar year. The pilgrimage to Mecca which was a custom with them was always made in the twelfth month of the year, but inasmuch as the lunar year of twelve months is eleven days shorter than the solar year, the time of the pilgrimage ran through all the seasons which was found to be inconvenient for reasons connected with the harvest and to obviate the inconvenience the Arabians formed a luni solar year by adding a thirteenth month from time to time. This scheme that they had learned from the Jews was adopted in A.D. 422 two hundred years before Islam or the Muslim religion was introduced by Muhammad.

Certain months were with the Arabians treated as sacred and when the Prophet established his religion he pronounced that the luni solar year which involved a transference of the sacred character from one month to another was an infidelity. Consequently return was made to the earlier practice and the Muhammadan calendar was formed about A.D. 632 as it remains to day, on a purely lunar basis and does not depend on the solar year. The year is made up of 12 months, alternately 30 and 29 days in

length, the first month of the year having 30 days. The years are taken as grouped in cycles of 30, each of which would comprise 20 600 days, but since 360 lunations of $29\frac{1}{2}$ and $29\frac{1}{4}$ which is nearly the true length of a mean lunation as was known to the Arabian astronomers amount to 20 631 days it was necessary to increase the length of some of these years to ensure that the date of the first of the month, or the New Moon of the Muhammadan calendar should agree at least approximately with the date of the actual New Moon. This is done by adding a day to the last month which therefore has 30 days in each of 11 years. The years selected for the purpose, called *Kabisah* are numbered in the cycle 2 5 7 10, 13, 16, 18, 21, 24, 26, 29, and consist, therefore of 355 days.

This is the outline of a calendar that has been formed and is used for general and historic purposes. The dates of New Moon, or the first days of the months approximate to those in the Jewish calendar but noting the difference in the methods of formation, it is not surprising that the dates in the two calendars do not always coincide (see p. 164).

Though this computed calendar is available for civil or chronological purposes some adherents of the Muslim faith still look for the appearance of the crescent and take the evening of its first visibility as giving the date of the first of the month.

The Muhammadan Epoch is based on the Hegira or Flight of Muhammad from Mecca to Medina. The first day of the *Hira* is not the actual day of the flight but is 12th July, 622 A.D. The Muhammadan year begins earlier year by year, according to Gregorian dates, by 11 or 12 days. The year 1933 is 1351 50 of the Hegira. The dates of the beginnings of the months are shown below. *Raradan* (the month of abstinence) is in progress when the year opens.

A.D. 1933	A.D. 1933
Shawwal	January 28

Ramadan	December 18
	A.D. 1934
Shawwal	January 17
Dulkanda	February 15
Dilhagga	March 17

OTHER EPOCHS AND CALENDARS

Abyssinian—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, the numeration beginning again on the completion of a cycle. The first year began on 29th August, 284 A.D. (See also: "Coptic" post).

Armenian—The Armenians marked their accession from the Greek Church by adopting it as their epoch. This corresponds to 9th July 552 A.D.

Babylonian—In the eighth century B.C. the Babylonians began a chronology with the era of the accession of the founder of their Empire, Nabonassar, 26th February, 747 B.C.

Biblical—The Christians of Western Europe made many calculations concerning the date of the creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Arch-bishop of Armagh, published his *Annales Veteris Testamenti* and Ussher's Notation was afterwards printed in marginal notes to the Authorized Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Coptic—In the Coptic calendar, which is used by part of the population of Egypt and Ethiopia the year is made up of 12 months of 30 days each followed in general by 5 complementary days. Every fourth year is an intercalary or Leap year and in these years there are 6 complementary days. The intercalary year of the Coptic calendar immediately precedes the Leap year of the Julian calendar. The Era is that of Diocletian or the Martyrs the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic calendar for the year 1649 and part of 1650 is appended—

Year 1649	A.D. 1933	Year 1650	A.D. 1933
Tubah	Jan 9	Bubah	Oct 11
Amshir	Feb 8	Hatur	Nov 10
Barmah	March 10	Kihak	Dec 10
Barmudah	April 9		A.D. 1934
Bashuns	May 9	Tubah	Jan 9
Bunah	June 8	Amshir	Feb 8
Abib	July 8	Barmahat	March 10
Maasi	August 7	Barmudah	April 9
Complement		Bashuns	May 9
ary days	Sept 6 to	Bunah	June 8
Year 1650		Abib	July 8
Int.	Sept 11	Maasi	August 7

Hindu—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyuga* or *Kali* which appears to have been adopted in the fourth century A.D. It began on 18 February 3102 B.C. The chronological system of Northern India known as the *Vikram* or *Vikramat* Era prevalent in Western India began on 23 February, 57 B.C. The year 1933 A.D. is therefore the year 1990 of the Vikrama Era. In Southern India the *Saka* Era with its epoch of 3 March A.D. 78 was probably founded by Kanishka (whose sway was widely extended) and is in general use. The year 1933 A.D. is 1855 of the Saka Era. In the Hills the *Saptarishi* Era dates from the month when the Saptarishi or saints were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The Buddhists reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.) and the epoch of the Jains was the death of Vardhamana the founder of their faith in 527 B.C.

Olympiad—Greek chronology was reckoned in cycles of four years corresponding, with the periodic Olympic Games held on the plain of Olympia in Elis once in four years, the intervening years being the first, second, &c., of the Olympiad which received the name of the victor at the games. The first recorded Olympiad is that of Coroebus 776 B.C.

Persian—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yezdegerd III to the throne on 10th June 632 A.D. The year 1933 is therefore, 1302 of the Parsees. The New Year begins on 22nd March

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7 926½ English miles, and at the Poles 7,900 English miles. The *Equatorial Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles, these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent	Area in Square Miles	Estimated Population
Europe	3 750 000	475,000,000
Asia	17,000 000	1,013,000 000
Africa	11 500,000	143 000 000
North America	8 000,000	146 000 000
South America	6 800 000	64,000 000
Oceania	3 450 000	8 500,000
Polar Regions	5,000 000	
	55 500 000	1,849,500 000

The British Dominions extend over the largest area (14 200,000 sq miles) the Russian Union is second (9 250 000 sq miles) France is third, with 4,336 000 sq miles the United States, with its Insular Jurisdiction &c, covers 3,750,000 sq miles, Brazil 3 200,000 sq miles, and China 3,000,000 sq miles.

THE CONTINENTS

Europe forms about one fourteenth of the land surface of the globe. Its length from the North Cape 71° 12' N and Cape Matapan in the south of Greece, 36° 23' N is about 2,400 miles, and its breadth from Cape St Vincent to the Ural is about 3 300 miles. The political boundary between Europe and Asia extends some distance beyond the Ural to include the mining regions. In the south east it follows the valley of the Manych, north of the Caucasus.

Asia extends over nearly one third of the land surface of the globe. The distance between its extreme longitudes the west coast of Asia Minor (26° E) and the East Cape (170° W), is 6 000 miles. The extreme latitudes Cape Chely uskin (78° 30' N) and Cape Buru (90 miles north of the Equator), are 5 350 miles apart. Asia is bounded by the ocean on all sides except the west. The Isthmus of Suez connects it with Africa. The land boundary between Europe and Asia is formed on the west mainly by the Ural Mountains and the Ural River. In the south west the valley of the Manych, which

stretches from the Caspian Sea to the mouth of the Don, is now taken as the line between the two continents although the Caucasus was formerly considered as belonging to Europe. The islands of the archipelago which lies in the south east between the continents of Asia and Australia may be divided into two groups by a line passing east of Timor, Timor Laut, the Kei Islands and the Moluccas.

Africa is about three times the area of Europe. Its extreme longitudes are 17° W at Cape Verde and 51° E at Cape Guardafui. The extreme latitudes are Cape Blanco in 37° N and Cape Agulhas in 35° S, at a distance of about 5 000 miles. It is surrounded by seas on all sides, except in the narrow isthmus through which is cut the Suez Canal, and may be considered as a great peninsula of the Eurasian continent.

North America including Mexico, is a little less than twice the size of Europe. Its extreme longitudes extend from a little west of 170° W to 55½° W in the east of Newfoundland, and its extreme latitudes from about 80° N lat to 15° N lat in the south of Mexico. It is surrounded by seas on all sides except in the south, where it joins the Isthmian States of *Central America*, which have an area of about 200 000 square miles. The area of the *West Indies* is about 65,000 square miles, a little more than half that of the United Kingdom. They extend from about 27° N latitude to 10° N latitude.

South America is a little more than 1½ times the size of Europe. The extreme longitudes are Cape Branco 35° W and Punta Paima 81° W, and the extreme latitudes, Punta Gallinas, 12½° N and Cape Horn 56° S. South America is surrounded by the ocean, except where it is joined to Central America by the narrow isthmus through which is cut the Panama Canal.

THE RACES OF MANKIND †

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White (3) Black (4) Brown, (5) Red. The main Divisions of the Races are as follows—

Division	Area.	Estimated Number
Mongolian	Asia	680,000,000
Caucasian	Europe & Orient	725,000,000
Negro	Africa	210,000,000
Semitic	North Africa	100,000,000
Malayan	Oceania, &c	104,500,000
Red Indian, &c	America	39,000,000
		1,849,500,000

† It has been estimated that the Earth can maintain a population of 6 000 000 000 a total which will be reached about A.D. 2200 at the present rate of increase.

* The Earth is a *Sphere* with a Northern and Southern *Hemisphere*; here the Ocean surface is the *Hydrosphere* and the gaseous envelope the *Atmosphere* of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology* with the measurement of its surface &c, the study of its surface is *Geography* and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography* of the lakes *Limnology* and of the mountains *Ornography* of the Races of Mankind *Ethnology* of their location *Ethnography* of extinct organic life *Paleontology* and of existing life *Biology*.

An *airship* with a constant speed of 200 miles an hour would take nearly 22 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1 000 miles an hour (24 902·8 miles in 24 hours). The Earth's velocity in its orbit round the Sun is about 66 000 miles an hour (56,000 000 miles in 365 days 6 hours 9 minutes).

OCEAN AREAS AND DEPTHS

The greatest known Ocean Depth (in the Pacific off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas) but the mean depth of the Ocean floor exceeds 12 000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2 300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each —

Name	Area of Basin (sq miles)	Greatest Depth (feet)
Pacific	63 986,000	Off Mindanao, 32 089
Atlantic	31 530,000	Porto Rico Trench, 31 266
Indian	28,350,000	Sunda Trench, 28 968
Arctic	5 541 600	North Polar, 13,900
Malay	3 137 000	Kul Trench, 21 348
Central American	1 770 170	Caribbean, 20 568
Mediterranean	1,145 000	Pola Deep, 28 276
Behring	878,000	Bulldi Trough, 13,422
Okhotsk	528 000	Kunle Trough, 10,554
East China	480 000	about 10 500
Hudson Bay	472 000	about 1 500
Japan	405 000	about 10,000
Andaman	305 000	about 11 000
North Sea	221 000	Skagerrak, 1,998
Red Sea	176 000	20° N 7 254
Baltic	158,000	about 1 200

THE HIGHEST MOUNTAINS

TEMPERATURE AND RAINFALL RECORDS.

GENERAL The maximum temperature on record of the air in shade is 130° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The wettest station in the world is generally allowed to be Cherra Poonjee in Assam, where the official annual average is 424 inches. In Aug. 1841, 264 inches was measured, when 30 inches or more fell on each of five successive days, while on June 14 1876, a fall of 40.8 inches was measured.

BRITISH ISLANDS The maximum temperature of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The lowest temperature of the air recorded

in the shade at 4 feet above the ground is -25° Fahr., or 55° below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The greatest rainfall in a day was at Bruton, Somerset, when 9.56 inches fell in the 24 hours ended 9 a.m., June 29, 1927. This rainfall is equal to 665 tons of water per acre.

The total rainfall for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246.92 inches at Llyn Llydaw (Copper Mill), Carnarvon, and 247.30 inches at the 4tve, Cumberland in 1923, to 9.29 inches at Margate in 1921.

The maximum wind velocity on record in the British Isles was recorded at Scilly on December 8, 1929, when a gust reached the rate of 111 miles per hour.

TEMPERATURE.

The League of Nations.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920. Its Charter, containing 45 Articles, is known as the *Covenant*, which contains clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges). The right to resort to war was hitherto retained in case the League, or the arbitrators, failed to reach an unanimous decision but even so, only after a delay of three months after such failure. And this right has been abandoned by all the 50 States who have signed the Kellogg Pact.

The *Membership* of the League comprises at present 57 nations, or three quarters of the whole World, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation. The only two great countries which hold aloof are America and Russia, and they, particularly America, are co-operating with the League in a number of beneficent activities.

ORGANISATION OF THE LEAGUE

The *Assembly* meets annually at Geneva about September 10, and consists of 3 representatives from every Member State, each State having one vote.

The *Council* meets three times a year. Great Britain, France, Italy, Germany and Japan are permanent members and at present 9 other States are annually elected as temporary members. These are Poland, Czechoslovakia, Mexico, Spain, Panama, China, Guatemala, Norway and the Irish Free State.

The *Secretariat* is the permanent civil service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary General, J. Avenol (French).

Under Secretaries General, Mauguin Paulucci di Calabio (Italian), Herr Ernst Tiedelenburg (German), M. Y. Sugimura (Japanese).

Information Section, Faurie (French), *Director*, Arthur Sweetzer (American), *Assistant Director*.

The *Technical Organisations and Commissions*, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates and the Reduction of Armaments. No week passes without these bodies discussing international questions of wide interest or without some conference being held at Geneva and achieving or pointing the way to their constructive work in international co-operation.

The *Permanent Court of International Justice*, consisting of fifteen Judges and four Deputy Judges chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes referred to it regarding International Law, breaches of International obligations, and the

interpretation of treaties. It has already dealt with 43 disputes, some of which might have led to an open breach between the States concerned. It has already won a great reputation both in the Foreign Offices and in the legal professions of the world. The Court now sits all the year round.

The *International Labour Office* is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The Governing body consists of twelve representatives of Governments, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world, six employers and six workers' representatives. They are assisted by an international Secretariat, which collects and disseminates information and organises conferences. The conferences to which Governments, Employers and Workers' Organisations send delegates, pass Conventions or Recommendations which Governments ratify if they so desire. 33 Conventions have been adopted, ratifications number nearly 500. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made, while losing no opportunity to raise even the best existing standards where practicable. The Director of the International Labour Office is H. B. Butler (British). There is a London Office at 22 Victoria Street, S.W. 1.

Cost—The cost of the League 1922-3 will be about £1,385,000, to which Great Britain will contribute about £170,000.

WHAT THE LEAGUE HAS DONE

The work of the League is many-sided, and is constantly growing. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria, Hungary, and Northern Greece, the outlining of an important new policy of "freer trade, improvements in international traffic and health progress in real control of the traffic in drugs and in women, and child welfare. After many years continuous study of the problem of the Reduction of Armaments the League has enabled the First World Disarmament Conference to meet. By Sept. it had agreed on certain ways of reducing armaments, but the details and figures have yet to be settled early in 1933. The League has been faced with a serious dispute between China and Japan. Up to date, only a measure of success has been reached in handling this first class problem. A Report on the whole position in Manchuria will be considered by a special Assembly.

LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 15 Grosvenor Crescent, S.W. 1.—*Joint Presidents*, Viscount Grey of Fallodon, K.G., and Viscount Cecil of Chelwood, K.C., *Chairman of Executive Committee*, Prof. Gilbert Murray, I.L.D., *General Sec.*, J. C. Maxwell Garnett, O.B.E., Sc.D.

* Any information about the League and its work can be obtained by application at this address.

THE BELGIAN CONGO

The Independent State of the Congo became a Belgian colony by a law of Oct 28 1908. The total area amounts to 909,654 sq miles and the native population estimated (1928) at 10,000,000. The total European population (Jan 1920) was 15,236. By the Anglo-Belgian Agreement of July 1929 the districts of Ruanda and Urundi, portions of the former territory of German East Africa which adjoin the Belgian Congo on the E were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N.W. corner of German East Africa from 5° S lat to the S borders of (British) Uganda and have an area of about 25,000 sq miles, with an estimated population of 3,000,000.

The House of Windsor is in direct descent from (*inter alia*) Robert King of Wessex, Alfred the Great and William the Conqueror also from the Emperor Charlemagne (b 742, d 814), Rodrigo the 1st (b 1030, d 1099), the Emperor Barbarossa (b 1123, d 1190) and St Louis, King of France (b 1215, d 1270)

WELSH SOVEREIGNS AND PRINCES

Wales was ruled by Sovereign Princes from the "earliest times" until the death of Llewelyn in 1282. The first English Prince of Wales was the son of Edward I and was born in Carnarvon town on April 25 1284. According to a discredited legend he was presented to the Welsh Chieftains as their Prince in fulfilment of a promise that they should have a Prince who 'could not speak a word of English and should be native born'. This son who afterwards became Edward II, was created 'Prince of Wales and Earl of Chester' at the famous Lincoln Parliament in February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13 1911.

INDEPENDENT PRINCES, A.D. 844 to 1292

GEORGE III was the eldest son of Frederick, Prince of Wales (eldest son of George II), and of Princess Augusta (youngest daughter of Frederick II, Duke of Saxe-Gotha-Altenburg). His Majesty was born at Norfolk House, St James's Square June 4 1738, succeeded to the Throne Oct 25, 1760, married Princess Charlotte (daughter of Charles, Duke of Mecklenburg-Strelitz) and was crowned with her on Sept 22, 1761. The government was carried on from Feb 5, 1811, until the death of King George III, by his eldest son George, under the title of *Prince Regent*. King George III died at Windsor Jan 29, 1820, his issue being—

1. **GEORGE IV** George Augustus Frederick, *Prince of Wales* born Aug 12, 1762, married Princess Caroline of Brunswick succeeded to the Throne Jan 29 1820 and died without surviving issue June 26 1830.

2. **FREDERICK DUKES of York and Albany** born Aug 16 1763 married Princess Frederica of Prussia was for many years Commander in Chief of the Army and died without issue Jan 5 1827.

3. **WILLIAM IV** William Duke of Clarence born Aug 21 1765 was Lord High Admiral of England married July 22 1818 Adelaide daughter of George Duke of Saxe-Meiningen by whom he had two daughters who predeceased him succeeded to the Throne June 26 1830 and died June 20, 1837.

4. **CHARLOTTE** Princess Royal born Sept 29 1766 married Frederick, King of Württemberg, and died without issue.

5. **EDWARD DUKES of Kent** born Nov 2 1767 married Princess Victoria (daughter of Francis Duke of Saxe-Coburg and widow of Charles Prince of Leiningen) died Jan 23 1820. Their Royal Highnesses had issue a daughter, Princess Victoria born May 24 1819 who succeeded to the Throne as **QUEEN VICTORIA** June 20 1837.

6. **AUGUSTA** born Nov 8 1768 died unmarried Sept 22 1840.

7. **ELIZABETH** born May 22 1770 married Frederick Landgrave of Hesse and died without issue Jan 20 1840.

(6) The Prince John

6 H R H PRINCE JOHN *born July 12, 1905, died Jan 28, 1919*

ORDER OF SUCCESSION TO THE THRONE

The sons of the Sovereign are in the order of succession to the throne and after the youngest son the daughters in the order of their own seniority. Thus after the Prince of Wales and the Duke of York would come the Princess Elizabeth and the Princess Margaret, daughters of the Duke of York the Duke of Gloucester and the Prince George then the Princess Royal and her children then as His Majesty has no brother, his sisters with the children of the eldest in preference to the second sister then the second daughter of the late Duke of Saxe Coburg (his eldest daughter Queen Marie of Rumania, having formally renounced on her marriage all possibility of claim to the British Throne) After traversing the Saxe Coburg branch, we treat similarly those of Connaught and Albany Having thus exhausted the families of all Queen Victoria's sons we turn to her daughters beginning with the house of the late Emperor Frederick but as this line with the ex German Emperor at its head is wholly out of practical bounds it would be profitless to pursue the investigation any further

ANNUITIES TO THE ROYAL FAMILY

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List* which is granted by Parliament upon the recommendation of a Select Committee The Civil List of King Edward VII amounted to £470,000 in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000 The Select Committee appointed on June 14, 1910 reported on July 7 and made recommendations, which were adopted by the House of Commons These recommendations, as modified by subsequent events, are also subject to the voluntary deductions announced by H M the King

Their Majesties Privy Purse	£120,000	Duke of York	£25,000
Salaries of Household	125,800	Princess Louise (Duchess of Argyll)	6,000
Expenses of Household	193,000	Duke of Connaught	25,000
Works	20,000	Princess Beatrice	6,000
Royal Bounty	23,000	King Edward VII's Daughters	12,000
Unappropriated	8,000	His Majesty's Younger Children	25,000
	£470,000		£106,000

Widows in Their Own Right.

PEERAGES IN OWN RIGHT. Peerages are occasionally granted immediately to ladies of distinction on the widows of distinguished men, but frequently the instances falling under this heading are the result of regular inheritance in lines which are open to females in default of males. Thus it results that some of the Peeresses now upon the list have male heirs who will succeed them in the ensuing generation and take their seats by strict right in the House of Lords, while, on the other hand, several peerages now occupied by males will fall to the other sex, and thus for a time take leave of that House. A resolution to admit Peeresses in their Own Right to the House of Lords was defeated in that house in 1830. A Peeress in her own Right retains her title after marriage, and if her husband's rank is the superior she is designated by the two titles jointly, the inferior one last, her hereditary claim still holds good in spite of any marriage, whether higher or lower. No rank held by a woman can confer any title or even precedence upon her husband, but the rank of a Peeress in her own right is inherited by her eldest son (or perhaps daughter), to whomsoever she may have been married.

DUCHESS IN HER OWN RIGHT

Created	Title, Name, &c	Eldest Son or Heir
1900	Kist Alexandria Duchess (H R H Princess Arthur of Connaught), b 1891, s 1912 m	Earl of Macduff, b 1914

Baronets eldest Sons
Eldest Sons of Knights in the same order as their fathers
Younger Sons of the younger Sons of Peers
Baronets younger Sons
Younger Sons of Knights in the same order as their fathers
Naval Military and other Esquires
Women take the same rank as their husband as if as their eldest brothers, but the daughters of a Peer marrying a commoner retain his title as Lady
Honourable Daughters of Peers rank as commoners, and after the wives of their eldest brothers and before their younger brothers wives
Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands, thus the daughter of a Duke marry with a Baronet takes to the rank of Baroness only, but her name may married to commoners retain their rank and take precedence of the Baroness
Merely official rank of the husband's part does not give any similar precedence to the wife
1. Dames Grand Cross and Dames Commanders of the British Empire see p 242
LOCAL FREEMASONS No written code of points or city order of precedence has been promulgated but naturally in the county the Lord Lieutenant stands first and secondly the Sheriff in London and other Corporations the Mayor stands first, after him the Aldermen, Sheriff, Chief Officer and the Mayor of Oxford and afterwards the High Sheriff takes precedence of the Vice Chancellor

THE ORDER OF MERIT (1902)—O. M. Ribbon, Blue and Crimson.

This Order confers no precedence. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 26, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords and the latter oak leaves. Membership is designated by the suffix *om*, which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

Military

Admiral of the Fleet Rt Hon Earl Jellicoe, GCB, GVO

[illegible]

THE KNIGHTS BACHELOR

The Knights Bachelor do not constitute a Royal Order but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor instituted by James I in the 17th century lapsed, and in 1906 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary object of continuing the roll registers dating from 1827 and obtaining the uniform registration of every created knight. In 1905 a design for a badge to be worn by Knights Bachelor was approved and adopted; a miniature reproduction being shown at the time. This badge has been registered and its use as a mark of distinction supplied by the authorities, and can be obtained by application. The Officers of the Society are: President, *Vice Principal*, Commander Sir Trevor Dawson, Bt., &c.; Hon. Registrar, Sir Paul Goff, &c.; Clerk, Hubert Welsborn, *Registery and Library*, at Old Buildings, Lincoln's Inn, W.C.

ORDER OF THE COMPANIONS OF HONOUR (1917)—C H

Ribbon Carmine with Gold Edges

This Order consists of one Class only and carries with it no title or precedence but ranks after the 1st Class of the Order of the British Empire (i.e., K.B.E. and Dame Grand Cross (Mil. and Civ. Div.)). The number of awards is unlimited and is open to both sexes.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies) V A

Instituted in 1856 and enlarged in 1864, 1865 and 1880 but no conferments have been made since the death of Queen Victoria. Badge in the first three Classes a medallion of Queen Victoria and the Prince Consort, differing in the width and jewelling of the border is the Class descended whilst the fourth substitutes a jewelled cipher. All four are surmounted by some form of a crown which is attached to a bow of white moiré ribbon. The honour does not confer any rank or title upon the recipient.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C I

Instituted January 1, 1878 and for a like purpose with the simultaneously created Order of the Indian Empire. Enlarged January 30, 1900. Badge the royal cipher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. The honour does not confer any rank or title upon the recipient.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon, Red, with Blue Edges

Bestowed in recognition of special services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately below the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Ribbon, Crimson, with Blue Centre

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service and consists of the Sovereign, the Prince of Wales and Companions (not exclusively male) to a number not exceeding 700 of whom any may belong to the Home Services, see to the Indian and also to the services of Dominions, Colonies and Protectorates.

OTHER PRINCIPAL DECORATIONS AND MEDALS (in order of Precedence).

A full list of all Orders, Decorations and Medals and Orders regarding the wearing of them will be found in WHITTAKER'S YEARBOOK.

The New Zealand Cross—1860—N.Z.C.—For conspicuous bravery. Instituted March 20 1860. There is only one surviving holder—Benjamin Biddle C.N.

The Royal Red Cross—R.R.C.—For ladies founded 1883. Is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Distinguished Service Cross—1904—D.S.C.—In substitution for the Conspicuous Service Cross 1901. Is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander and on Warrant Officers.

The Military Cross—1904—M.C.—Awarded to Captains, Lieutenants and 1st Class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross—1908—D.F.C.—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross—1908—A.F.C.—Instituted as preceding but for acts of courage or devotion to duty when flying although not in active operations against the enemy.

The Indian Order of Merit—Instituted in 1877 as a reward for personal bravery to Indian officers and men.

The Kaisar-i-Hind Medal (1st Class, gold and Class, silver)—Was founded in 1900 and is a reward for any person of either sex who shall have rendered useful service in or for India.

The Albert Medal—A.M.—Dates from 1866 with extensions in 1867 and 1877 and is a recognition of acts of gallantry performed by any person whatever—for Gallantry in Saving Life at Sea or on Land.

The Medal for Distinguished Conduct in the Field—1904—D.C.M.—Is designed for chief petty officers, petty officers, men and boys of all branches of the R.N. to non-commissioned officers and men of the R.M.A. and to all other persons holding corresponding positions in His Majesty's Service abroad for distinguished conduct in war.

The Conspicuous Gallantry Medal—(C.G.M.)—Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal—(D.C.M.)—Awarded to warrant officers, non-commissioned officers and men of the Army.

The Distinguished Flying Medal—1918—D.F.M.—and the **Air Force Medal—A.F.M.**—for warrant and non-commissioned officers and men for equivalent services as for D.C.M. and A.C.

The Edward Medal—Established by King Edward VII in 1907 is a recognition of heroic acts performed by miners and quarrymen or of others who have endangered their lives in rescuing those so employed.

The King's Police Medal—Instituted in 1909 as a reward only for acts of exceptional courage and skill or conspicuous devotion to duty to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India and His Majesty's Dominions beyond the Seas. The number of medals awarded in any one year shall not exceed 200.

The Medal of the Order of the British Empire, for Gallantry—Awarded in recognition of acts of gallantry. All ranks are eligible for the Medal of the Military Division, there is also a Medal of the Civil Division. *N.B.—All the above Medals are worn before War Medals.*

The Meritorious Service Medal—M.S.M.—Since Sept 1908 granted only to recipients of the Meritorious Service Annuit.

The Volunteer Officers' Decoration—V.D.—Was an honour for rewarding the meritorious services of officers of the Force in question who must have been in commission and have served twenty years.

The Territorial Decoration—T.D.—Established in 1908, is restricted to commissioned officers of twenty years good service in the Territorial Army. Similarly a Territorial Long Service Medal has been substituted for that formerly awarded to Volunteers.

The Royal Naval Reserve and Royal Naval Volunteer Reserve Decoration—R.N.V.R.—and Medal—Instituted in 1900 to reward good and long service by officers and men of these services.

The Imperial Service Medal—May be granted only to Members of Civil Services in the U.K., India, the Dominions (Colonies and Protectorates) other than the administrative and clerical grades.

The Medal of the Order of the British Empire, for Meritorious Service—Is restricted in the Military Division to ranks below that of Warrant Officer and in the Civil Division to persons not eligible for appointment to the five classes of the Order.

The Voluntary Medical Service Medal (V.A.D.—and M.R.H.)—Instituted 1908.

The Badge of the Order of the League of Mercy—Both sexes, was established in 1899 in connexion with the League of Mercy, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London &c.

	Lt Col A W Waite	

Regnal Years—The years of a king's reign are the regnal years and each begins on the anniversary of his accession e.g., Regnal year 23 of the present King began on May 6, 1923. Regnal year 24 begins on May 6, 1923. The system is used for dating Acts of Parliament. The Summer time Act of 1923, for example, is quoted as 23 and 24 Geo V ch 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII began on January 22, so that Acts passed in that reign are, in general, quoted with only one year number, but year 20 of this series ended on May 6, 1910, and Acts of the Parliamentary Session 1910 are headed to Edw VII and 1 Geo V.

Dames Grand Cross and Dames Commanders of the Order of the British Empire.

NOTE—Dames Grand Cross (G B E) and Dames Commanders (D B E) are addressed in a manner similar to that of Knights Grand Cross or Knights Commanders, e.g. 'Miss Florence Smith,' after receiving the honour of G (or D) B E would be addressed as 'Dame Florence, and in writing, as 'Dame Florence Smith, G (or D) B E. Where such award is made to a lady already in enjoyment of a higher title the appropriate letters are appended to her name e.g. 'The Countess of —, G B E. Dames Grand Cross of the British Empire rank after wives of Baronets and before wives of Knights Grand Cross. Dames Commanders rank after the wives of Knights Grand Cross and before the wives of Knights Commanders.

DAMES GRAND CROSS AND DAMES COMMANDERS

Aberdeen and Temair, The Marchioness of, G B E	De Sismac, Annie Elizabeth, Lady, G B E	McCarthy, Dame Emma Maud, G B E

156 Parliamentary Summary, Lords and Commons, 1931-32.

THE NEW PARLIAMENT—A week after the triumph of the National Ministry at the polls, with the Opposition reduced to a handful, the new House of Commons assembled on Nov. 3 when Sir George Courthope moved and Mr Will Thorne seconded the re-election of Captain Edward FitzRoy as Speaker. Tributes to him were paid by Mr MacDonald and Mr George Lansbury, who as the senior survivor of the Labour Ministers had become leader of the Opposition. On the following day the King's sanction to the nomination was accorded and Mr FitzRoy began the task of swearing in members Sir Dennis Herbert and Captain R. C. Bourne were elected Chairman and Deputy Chairman of Committees. The majority of the House had been sworn in when the Session was opened on Nov. 10 by the King, who was accompanied by the Queen, the Prince of Wales being also present.

THE KING'S SPEECH—In the speech from the throne reference was made to the Disarmament Conference and the Ottawa Conference and it was declared that Ministers had received "a clear and emphatic mandate" endorsing their first measures for balancing the National Budget and empowering them to pursue a policy designed fully to re-establish confidence in our financial stability, to frame plans for ensuring a favourable balance of trade and to consider every proposal likely to be of assistance in these matters. No specific legislation was mentioned, but it was stated that the problems involved were already under detailed examination and that decisions would be applied with the least possible delay and any legislation required would be submitted to Parliament. In the Upper Chamber, the address in reply moved by the Earl of Radnor and seconded by Viscount Cowdray, was agreed to on Nov. 10. The Address was moved by Mr G. W. Lloyd and seconded by Mr A. J. Flint in the Commons. During the debate the Prime Minister said that the work of the Government would follow precisely the lines of the manifesto upon which the election was won. The industrial position was showing some very hopeful signs of improvement. With regard to the flow of imports the Government would take whatever action was necessary but must not produce its cure before it had diagnosed the disease. Mr Churchill on the following day declared that the overwhelming wish of the electorate was that there should be definite abandonment of the free trade system and a substantial scientific experiment in general protection. Sir Stafford Cripps in reply moved the official Labour amendment, which Mr J. H. Thomas described as a vote of censure on the Government because there were not included in the King's Speech the very things which the people said they did not want. The amendment was defeated on the following day by 428 to 38 and on Nov. 16 the Address was agreed to without a division.

ABNORMAL IMPORTS—The first step towards the new fiscal policy was taken on Nov. 17, when the Abnormal Importations (Customs Duties) Bill was brought in. It conferred emergency powers on the Board of Trade for a period to impose duties up to 100 per cent of their value on manufactured and partly manufactured articles which were being imported in abnormal quantities. Mr Runciman

said that imports were not only abnormal but were rapidly increasing. The second reading was agreed to on the following day after the defeat by 376 to 47 of a motion for its rejection. On Nov. 19 it passed through committee and was read a third time by 329 to 44 and a day later it passed through all its stages in the House of Lords and received the Royal Assent. The first orders under the Act being issued a few hours later. In the course of a debate regarding a further series of duties under the Act, Mr Runciman on Dec. 4 denied that they were causing friction and said that the discriminatory surcharge made by the French Government had actually been imposed two days before the British duties were announced and was not retaliation. He wished it to be clearly understood that if we were to be hit as we had been hit by the French discriminatory surcharge we could not ignore such action. He hoped that the matter could be settled in a friendly spirit. Mr Horé Belisha on Feb. 3 said that the duties already imposed had saved from the market £5,236,000 worth of goods, and there had been a diminution of our purchases from abroad of £10,000,000 in one month while our exports had not decreased.

PROTECTION IN IRELAND—The full transformation in the nation's fiscal policy was made by the Import Duties Bill, which was outlined by Mr Neville Chamberlain in the House of Commons on Feb. 4, when he moved resolutions on which the measure was based. The Chancellor said that the position had improved since the National Government came into existence and there was a definite though partial improvement in trade. But the nation had not really turned the corner. The unemployment figures remained of colossal dimensions and the main industries were very slow to move. Confidence could not be fully re-established while the trade balance was so heavily against us. An examination of the trade figures showed that a surplus of £100,000,000 in 1929 had been turned into an adverse balance of £113,000,000 in 1931. If allowance were made for the difference in prices it was found that while imports remained practically stationary for the two years the volume of exports decreased by nearly 38 per cent. The Government desired to correct the balance of payments by diminishing imports and stimulating exports and to fortify the country's finances by raising fresh revenue. They proposed by a system of moderate protection scientifically adjusted to the needs of industry and agriculture to transfer to British factories and British fields work which was now done elsewhere and thereby decrease unemployment. The basis of their proposals was a general *ad valorem* duty of 10 per cent upon all imports with certain exceptions. Wherever there was an existing duty the article so dutiable would not be subject to the 10 per cent and there would be a free list to include wheat in grain, meat, raw cotton and raw wool and tea though the latter might be dealt with in the Budget. An independent advisory committee was to be set up to consider what non-essential articles should be subject to additional duties and to make recommendations to the Treasury, which would be empowered to make orders imposing the duties and to revoke and vary duties, subject to confirmation by the House. So far as the Dominions were concerned,

neither the general nor the additional duties would become operative before the Ottawa Conference and all produce from all Colonies, Protectorates and mandated territories would be completely exempt from either the general or the additional duties. The Chancellor said that if foreign countries discriminated against British goods the Board of Trade would be authorised to impose duties up to 100 per cent upon goods from those countries but he hoped it would never be necessary to put that provision into operation. Power to give reciprocal lowering of tariff barriers to foreign countries would also be provided. They had tried to avoid anything which might entail a serious rise in the cost of living and they were satisfied that there was no such danger. Mr Chamberlain concluded with a personal note when he alluded to his father's historic campaign, and declared that the proposals were the direct and legitimate descendants of Joseph Chamberlain's conception. The speech was well received, but the feature of the debate was the criticism directed to the new policy by the Home Secretary. Sir Herbert Samuel who with three other Free Trade Ministers had been unable to accept the Government's plan, but at the Prime Minister's request had remained in the Cabinet. Sir Herbert contended that the scheme would not materially correct the balance of trade and that there was no certainty that an all round tariff was required to raise revenue. As an alternative he proposed that an Industrial Commission should invite industries to frame reorganisation schemes accepting protection on the lines of the Dye-stuffs Act as a means to its organisation but rejecting it as an end in itself. Sir Herbert's opposition aroused considerable resentment among Conservatives both on this occasion and subsequently when it was repeated by those Ministers associated with him. Mr Runciman on Feb 15 supported the proposals and said that he was not going to all ways of the views proper to the conditions of peace days or pre-war days to interfere with that freedom of mind, or to restrict that unfettered discretion which he proposed to exercise. The crisis he said had not yet passed. He thought that the 10 per cent tariff would provide nearly £30,000,000 of revenue without undue harm to the country. Mr Baldwin said that he hoped and believed that the new policy would realise two ambitions which he had long entertained—the closer union of the Empire and the better employment of our people. The resolutions relating to the new duties were carried by 452 to 76 that relating to the additional customs duties by 430 to 73 and another in respect of foreign discrimination by 422 to 68. The Bill was brought in amid Ministerial cheers on Feb 20. Moving the second reading on Feb 25 Major Elliott said that the Bill was an essential insurance against dangers and an essential means towards ends which ought to be apparent to every supporter of the national movement. On the following day a motion for rejection introduced by Mr Lansbury was defeated by 451 to 73 and the Bill was read a second time. The committee stage opened on Feb 28 after a time table motion had been passed, and concluded on Feb 24 slight alterations being made to the free list. The third reading was carried on the following day by 442 to 62 and on Feb 29 the Bill passed through all its stages in the House of Lords and received the Royal Assent.

Mr Chamberlain, on May 4, asking the House to approve a series of further duties recommended under the Act by the Advisory Committee which it set up said that the import duties on iron and steel were intended to be prohibitive because imports had become abnormal, and in order to preserve the *status quo* until a more permanent scheme could be devised. A Labour motion rejecting the new duties was defeated on the following day by 405 to 70, and they were approved.

THE WHEAT QUOTA — Sir John Gilmour on Nov 26 announced the Government's intention to apply the principle of a quota to home produce in the case of milling quality and to introduce legislation in time to enable the scheme to become operative in the following year's crop. He said that no contribution from the Exchequer by way of subsidy would be involved and it was not intended to encourage the extension of the cultivation of wheat to land unsuitable for that purpose. The Government had also decided to introduce a Bill directed to the reduction, through the operation of tariffs of imports into the country of certain non-essential agricultural and horticultural products. He added that other aspects of agricultural policy were receiving close attention. The resolution authorising the proposed duties was carried by 366 to 49 on Dec 30. It imposed emergency duties up to 100 per cent on luxury imports of fruits, vegetables and flowers. Sir John said he estimated that the annual value of the goods subject to the duties was £13,000,000. The Bill introduced on Dec 1 received a second reading on Dec 7 after a motion for rejection had been negatived by 215 to 36. It was quickly passed, receiving the Royal Assent on Dec 11. Sir John on Feb 23 presented the Wheat Bill to provide wheat crops in the United Kingdom with a secure market and an enhanced price for home-grown wheat of millable quality. To operate the system two bodies were to be set up—a Wheat Commission and the Flour Millers Corporation. A farmer would be permitted to sell his wheat in the open market but he must keep a record of every transaction. At the end of the fiscal year he would be entitled to receive from the Wheat Commission a deficiency payment which would be the difference between the standard price of 45s a quarter and the average price paid during the year for all home grown wheat sold on the open market. The standard price would be reviewed in three years in the light of conditions then prevailing. Sir John, moving the second reading on March 1, said that the Bill had been endorsed by all the interests concerned. The Government did not expect that there would be a permanent increase in the price of bread and claimed that the Bill provided the means of implementing the Government's promise to the wheat growers without appreciable cost to the public. Dr Salter moved an amendment declaring that the Bill failed to provide adequate organisation of wheat supplies and would not make for the development of agriculture on lines best suited to the country. This was defeated by 428 to 55 on the following day and the Bill was given a second reading. The committee stage produced no sensations, and the third reading was secured by 398 to 58 on April 7. The Lords increased the representation of the farmers on the Wheat Commission, and the Commons agreed to this.

change, the Royal Assent being given on *May 12*

THE BUDGET—No important change in taxation was made by Mr. Neville Chamberlain when he opened his first Budget on *April 19*, the only alterations being the reimposition of the tea duty and the grant of an increased preference to Colonial sugar. The Chancellor recalled that Lord Snowden in his Budget after the National Government came into power estimated a surplus of £1,500,000, actually the surplus was £364,000, but this had been secured by taking only £12,750,000 from the Dollar Exchange Fund, instead of £23,000,000 so that the country was really £9,000,000 better off than Lord Snowden had anticipated. On the expenditure side £34,500,000 had been saved compared with £52,000,000 which the Government had proposed the final Lechequer figure being £33,300,000. On the Revenue side, there had been an increase of £3,000,000 over the estimate for Customs and Excise, partly due to the receipts from the Abnormal Importations Duties, the Horticultural Products Duties and the ten per cent revenue tariff. There was a large fall in the yield of death duties totalling £18,000,000, and a fall of £3,000,000 in stamp duties. The Budget, Mr. Chamberlain declared, "has been saved by the income tax payer and surtax payer. The income tax at £187,400,000 had given him a surplus of £15,400,000, and the surtax, at £76,000,000, was up nearly £4,000,000. All alike companies or individuals, the surtax payers or people with small incomes showed that sense of duty and of citizenship for which we can always rely on the British people in times of crisis." Explaining that he was including neither receipts nor outgoings for War debts the Chancellor said that the Estimates already presented showed that they anticipated savings of nearly £79,000,000 instead of the £70,000,000 expected in the previous September. (Omitting the self-balancing items of the Post Office and the roads the total of the Supply Services was £447,204,000 and that of the Consolidated Fund Services was £318,800,000 a total estimated ordinary expenditure for 1932 of £766,000,000 including the Sinking Fund. With regard to the estimated revenue for the coming year he said that he was budgeting for £23,000,000 in stamps and for £76,000,000 in death duties but he must anticipate a heavy fall in surtax and income tax £66,000,000 and £260,000,000 respectively. The total for Inland Revenue was £427,000,000, £32,500,000 less than the estimate provisionally put forward in September. From Customs and Excise he expected £264,475,000 an excess of £10,000,000 over the receipts last year. The revenue available under existing taxation was thus £731,475,000 a deficit of £34,750,000. "Where on earth," the Chancellor asked, "could we have found this great sum if we had been debarred from the consideration of import duties?" From the duties already in force he expected a sum of £17,000,000 while he hoped for a further £5,000,000 from additional duties which were shortly to be imposed, making the yield from Customs and Excise £297,500,000. With £427,000,000 from Inland Revenue and revenue from other heads of £39,800,000 he obtained a total revenue of £764,300,000 or a prospective deficit of £1,700,000. Then Mr. Chamberlain came to his proposals. First he

detailed the establishment of an Exchange Equalisation Account, with power to purchase exchange to negative the effects upon trade of fluctuations abroad. Next he outlined some further income tax allowances to industry for wear and tear and a reorganisation of the tax collection system. I have no opportunity of giving relief this year to the income tax payer," the Chancellor said bluntly. "The path of financial stability is not only hard and stony, but long and weary and although we may begin to see the light between the trees, we have far to go before we can emerge into easier ways." Although beer was overtaxed, he could do nothing at present. A small impartial committee was to be set up to investigate the privileged position of co-operative societies with regard to income tax. New rates were fixed for the taxation of motor cycles. Another committee would inquire into the conditions of the United Kingdom sugar industry, the assistance hitherto given being meagre and continued, and an increase of one shilling per cwt. in the preference on all Colonial sugar imported would be given for five years, with an extra shilling per cwt. for a quota of 275,000 tons to be allocated to the Colonies proportionately to their production. These changes left the Chancellor with a deficit of £2,800,000 and to fill this gap he proposed to revive the tea duty. The duty on foreign tea would be imposed again at the old rate an excise duty of 2d would be levied on old statements but the preference given to Empire tea would be increased to 2d a pound. He expected to obtain from the tea duty £3,600,000. His revenue thus became £766,800,000 giving a surplus of £796,000. Hard work, strict economy, firm courage, unflinching patience, said the Chancellor in conclusion "these are the qualifications that are required of us, and with them we shall not fail." Before the resolutions were carried amendments were defeated (by 318 to 65) designed to withhold from the Imports Duties Advisory Committee the power to recommend subtraction from as well as addition to the free list and (by 305 to 72) to instruct the Advisory Committee that wheat and meat were not to be removed from the free list. The Finance Bill was brought in and read a first time on *April 27*. On the second reading on *May 9*, Mr. Chamberlain agreed to ask the Advisory Committee to investigate the silk duties and on the question of monetary policy declared that the Government aimed at a rise in wholesale prices though not to the same extent in retail prices. They did not desire to see sterling rise higher than about its present level he added. A Labour motion for rejection was defeated by 465 to 47 on the following day when the second reading was secured. In accordance with the Chancellor's promise a new resolution was introduced and passed imposing an additional duty on silk and artificial silk goods except raw materials. The Committee stage began on *May 23* and was concluded on the 26th. During the report stage on *June 8*, a Conservative amendment to restore the duty on beet to the level at which it stood before September 1931 was defeated by 302 to 72. The third reading was carried on *June 10* an amendment for rejection being lost by 409 to 34. Mr. Chamberlain denied that either a second Budget or increased taxation was inevitable. He said that there was no reason to expect any material shortfall in direct taxation, and the

yield of tariffs was so far no guide to their ultimate yield this year. The national situation he added was infinitely better, both absolutely as compared with what it was when the Government took office and relatively as compared with the rest of the world. The Bill received the Royal Assent on June 26.

THE FREE STATE DEBTS—As a result of the refusal of Mr. de Valera to arbitrate on the question of the Irish Free State land annuities, following the repudiation of the half-yearly dividends coupled with the suggestion that other payments would be withheld the Government in the closing days of the Session imposed duties on imports from the Free State to relieve the British taxpayer from the burden. Mr. Thomas on July 4 said that the default of the Free State meant that our Budget would be £3,000,000 in deficit and the Government had no option but to collect the money by special duties. He promised to accept it Mr. de Valera accepted an Empire tribunal to arbitrate but would not relax the Government's policy until he did. The financial resolutions were passed and the Bill brought in on the following day. Moving the second reading on July 6, the Dominions Secretary said that the Bill proposed to recoup the whole sum in default but would not be operated longer. A motion by Mr. Lauchbury for rejection was lost by 321 to 41 and the third reading was obtained on July 8 by 225 to 30. Four days later the Bill had passed through the House of Lords and received the Royal Assent.

HEALTH INSURANCE AND PENSIONS—Yet another piece of legislation relating to health insurance was passed in an endeavour to restore the scheme to financial stability. Explaining the National Health Insurance and Contributory Pensions Bill when he moved the second reading on May 11 Sir Edward Hilt on Young said that the last actuarial valuation revealed that National Health Insurance had reached a point at which it was living on past accumulations and unless prompt action were taken the next valuation period would coincide with a breakdown of the system. One of the drains upon the fund was the unexpectedly heavy claims from women especially married women for sickness and disablement benefit. Loss due to this cause must be met either by increasing the women's contributions or decreasing their benefit. He had adopted the latter alternative but even after a reduction the benefits would still be above the pre-war level. There would be a return to the principle that disablement benefit should be one half of the sickness benefit for 6 and 22s. a week respectively. The system of taxing arrears of contributions due to unemployment had proved to be over generous. The cost of this exemption was now £2,500,000 a year of which £2,000,000 was borne by the approved societies. For the immediate future only one half of the arrears on the score of unemployment would be excused but power was given to the Minister of Health if the state of the fund allowed it to make a greater allowance. The measure would reduce the burden on the approved societies by £1,000,000 a year. The stability created would be used to mitigate the position of the unemployed. It was proposed to allow the unemployed continuance of medical benefit until the end of 1933 (the cash benefits

(ceasing) and preservation of pension rights until 1935. Provision was also made for an easier return to benefit of those who had fallen into arrears. The second reading was carried by 245 to 43. The remaining stages were of no particular interest and the Royal Assent was given on July 13 when Parliament adjourned until Oct. 27 power being given for both Houses to be called together earlier in case of emergency.

THE STATUTE OF WESTMINSTER—Early in the Session, the Statute of Westminster Bill, designed to make clear the powers of Dominion Parliaments and to promote the spirit of free cooperation among members of the British Commonwealth of Nations, received the Royal Assent. The Bill which was an attempt to define Dominion status was introduced in conformity with a decision of the Imperial Conference of 1920, and Mr. J. H. Thomas, during the second reading debate on May 10 explained that the condition that each of the Dominions should ask for its passage had been complied with. Mr. Thomas said that the Bill merely expressed that equality of status between the Dominions and the United Kingdom which had been acknowledged by all British statesmen since the Imperial Conference of 1921 and confirmed at every subsequent Conference. He hoped that its passage by removing grounds for controversy in the political field, would be the prelude to increased cooperation in the economic field between the several parts of the British Empire. Mr. Churchill expressed doubts regarding the Irish Free State Agreement Act of 1922, which he suggested should be added to the North America Acts of 1867-1930 as a measure not affected by the Statute. In Committee on July 24 an amendment was rejected by 330 to 50 providing that nothing should be done to authorise the Irish Free State Legislature to repeal, amend or alter the agreement of 1922. Mr. Thomas read a letter from Mr. Cosgrave reaffirming that the treaty could be altered only by consent that good relations must rest upon reciprocal credit for good faith and that any attempt to insist upon good faith by statute would cause the Irish people to disbelieve in the sanctity of the treaty. The remaining stages were quickly secured.

YOUNG OFFENDERS—Several reforms in the treatment of children and young persons were instituted by a Bill which received a second reading on Feb. 12. Mr. Oliver Stanley said the main object of the Bill was to amend the Acts relating to the protection of neglected children and young persons and the treatment of young offenders. It proposed to set up a special panel of magistrates with a knowledge of and interest in the work members of which would sit in Juvenile Courts. The jurisdiction of these courts would be extended over young offenders raising the age from 16 to 17. Certain powers to order whipping would be abolished, but power would remain to send boys of over 14 to Quarter Sessions to be tried on any charge when Parliament had made whipping a statutory punishment. The provisions of the 1908 Act with regard to children who had committed no offence but whose circumstances made it desirable that they should receive protection were also extended from 16 to 17. Reformatory and industrial schools would in future be known as "approved schools," and the courts would not

specify the period of detention, the period being automatic. For a child under 14 it would be for three years or until the child reached that age, for a young person it would be for three years but not in any case beyond 29. The Bill was considered by a standing committee and was read a third time on May 12. The House of Lords gave it a second reading on May 26, and its committee on June 9 by 65 to 22, inserted a provision that a court of summary jurisdiction should have power to order that a boy found guilty of an indictable offence should be whipped. When the measure returned to the Commons on June 30 that Chamber disagreed with this amendment, but the Lords on July 7 insisted upon it by 41 to 33 and the Commons reluctantly decided on July 11 not to insist on disagreement by 133 to 34, and the Bill received the Royal Assent on the following day.

SUNDAY OPENING OF CINEMAS—A considerable amount of Parliamentary time, mostly that of a standing committee, was occupied with endeavours to regularise the position in regard to the Sunday opening of cinemas. The House of Commons on April 13, by a free vote, gave a second reading by 235 to 27 to a Bill similar to that introduced in 1931. Mr Oliver Stanley explaining that only a temporary measure due to expire in October stood between the nation and a return to the strict observance of the Act of 1780, breach of which had been condoned for fifty years until the High Court decision. When the standing committee proceedings opened, an attempt to secure adjournment in the hope of

reaching a compromise failed. An amendment to confine the operation of the Bill to the County of London was carried on May 22, and the measure was withdrawn. In its place a Government measure was brought forward providing that a local authority having power to license cinema performances should be able to license Sunday performances so long as no employee was employed for seven days a week and that such proportion of the profits from Sunday entertainments as the authority determined should be applied to charitable objects. The Bill applied to all areas covered by the temporary Act, and other areas wishing to have Sunday entertainments could obtain the necessary permission by submitting a draft order after it had been approved by a meeting of electors. A motion for rejection was defeated by 237 to 61 on May 27, and the second reading was carried. It was passed by the standing committee, and on report an amendment moved by Mr Stanley to provide for the establishment, under the direction and control of the Privy Council, of a Cinematograph Fund, consisting of a small percentage of the profits of Sunday film performances for the purpose of encouraging the use and development of the cinematograph as a means of entertainment and instruction, was agreed to by 286 to 168. An attempt to bring stage performances within the scope of the Bill was negatived. After the defeat of an amendment for rejection by 146 to 56, the Bill was read a third time on June 29. The Upper Chamber discussed the proposals but accepted them and the Royal Assent was given on July 13.

§ OFFICERS OF THE HOUSE OF COMMONS

<i>Speaker</i> (re-elected Nov. 3 1931), (Capt. the Rt Hon. Edward A. FitzRoy, M.P. for Daventry)	£5,000
<i>Secretary</i> , Lt. Col. Sir Ralph Vaney, C.I.F., C.V.O.	£700
<i>Chairman of Committees</i> , Sir D. H. Herbert, B.B.E., M.I.	£2,500

THE GENERAL ELECTION OF 1931

THE result of the General Election of 1931 is shown in tabular form below. The electorate numbered approximately 30,000,000 and if the votes in uncontested constituencies (2,328,000) are deducted the number of electors who recorded their votes amounted to seven millions of the remainder. In 1832 the electors numbered about 1,000,000 increased to 2,500,000 in 1867, 5,000,000 in 1884, 21,000,000 in 1918 (when women of 30 were enfranchised) and to 28,850,000 in 1929 (women having the vote on the same terms as men).

PARTY AND LEADER	NUMBER OF CANDIDATES			VOTES RECEIVED	MEMBERS REPRESENTED		
	Men	Women	Total		Unionist	Liberal	Total
Government —							
Nat. Union (Mac Donald)	22	0	22	340,000	0	23	13
Conservative (Baldwin)	504	16	520	11,873,000	49	443	472
Liberal National (Simon)	39	1	40	870,000	7	28	35
Liberal (Samuel)	82	4	86	1,332,000	5	28	33
Independent Nationalist	3	0	3	90,000	0	3	3
Total for National Government	650	21	671	14,505,000	61	495	556
Opposition —							
Labour (Healdson)	477	36	513	6,642,000	6	46	52
Liberal (Lloyd George)	33	1	34	346,000	0	4	4
New Party (Moseley)	24	0	24	36,000	0	0	0
Communist	23	2	25	75,000	0	0	0
Independent	24	2	26	100,000	0	3	3
Total against National Government	581	41	622	7,199,000	6	53	59
Grand Total	1,231	62	1,293	21,704,000	67	548	615

Figures following name of constituency denote the number of electors (M = Men, W = Women), C = Conservative, Com = Communist, Ind = Independent, L = Liberal, L Nat = Liberal Nationalist, Lab = Labour, N Lab = National Labour, N P = New Party, Nat = Scottish, Welsh or Irish Nationalist * Denotes a Member of the late Parliament for the same, and † for a different Constituency

England.

"Right Honourable."—Members of His Majesty's Most Honourable Privy Council are entitled to be designated "The Right Honourable," but, in practice, the prefix is sometimes absorbed in other designations, for example, a Prince of the Blood admitted a Privy Counsellor remains "His Royal Highness," a Duke remains "His Grace," a Marquess is still styled "Most Honourable." In the case of Earls, Viscounts and Barons a question has lately been raised whether peers of these three degrees are entitled to be called "Right Honourable" if not Privy Counsellors. While not presuming to make a statement in settlement of the question, the Editor feels bound to direct attention to the recital of Modes of Address of Peers of these three degrees (on pages 197, 201 and 204 of present Edition) The *Style* appearing in these headings has been recited in this manner for more than sixty years in WHITAKER, and appears to be evidence of a long-standing custom; moreover, it is borne out in each instance, in *A Manual of Dignities*, by C. R. Dodd (Whitaker & Co., 1842), and in *The Book of the Court*, by W. J. Thoms, F.S.A., "Dedicated by Command to the Queen" (H. G. Bohn, 1844). Earlier evidence of the courtesy could no doubt be produced. (Chief Magistrates entitled to the prefix are found on p. 605.

Government and Public Offices.

NOTE AS TO SALARIES.

THE salaries shown in the 1933 WHITAKER, in the case of H.M. Judges and of Government Departments, are subject to abatement in accordance with the decisions of His Majesty's Government. These statements, which took effect from Oct. 1, 1931, are set out in Command Paper Number 3952, in various Treasury Circulars, and answers to Parliamentary questions, and may be summarised as follows:

(a) Ministerial salaries—

£5,000 a year and over, 20%, £2,000 a year and over, but under £5,000, 15% under £2,000 a year, 10%.

(The salaries of the Attorney General and Solicitor General have been reduced to £2,000 a year plus fees.)

(b) Other salaries (£2,800 a year and over) —

£5,000 a year and over, an abatement of 20% £2,000 a year and over, but less than £4,000, 10%, subject to the proviso that the remuneration of any officer in receipt of over £4,000 a year, but less than £5,000, shall be 10% less of such larger amount as will suffice to reduce his remuneration to £4,000.

Salaries of £2,800 a year and over, but less than £5,000, such abatement as will suffice to reduce remuneration to £2,800.

THE COST OF LIVING BONUS

IN the year 1920 the Government introduced a *Cost of Living Bonus Scheme*, under which salaried Civil Servants and wage earning Government employees received temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920.

The Government Scheme was adopted generally by Public Authorities, certain modifications being made in particular instances.

The standard cost of living in March 1920, was 130 per cent. In excess of that of July, 1914 and the scheme of increase agreed by the *Wages Council* on the basis of that figure was as follows:—

Where the ordinary rate of remuneration did not exceed 30s per week—130 per cent. increase.

Where the ordinary rate of remuneration exceeded 35s a week but did not exceed £200 per annum—130 per cent. on the first 35s a week (£69 5s per annum) and 60 per cent. on the excess over £69 5s.

Where the ordinary rate of remuneration exceeded £200 per annum, 130 per cent. on the first £21 5s 6d per cent. on the next £208 15s and 45 per cent. on the amount in excess of £200 up to £500.

The standard rate rose or fell *twenty parts* in response to every *five points* rise or fall in the index figure average of prices over a six months period.

In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases were subsequently introduced:—

20 per cent. on salaries from £500 to £700, 15 per cent. on salaries from £700 to £800, 10 per cent. on salaries from £800 to £900, and so on until 60 per cent. was reached in the case of salaries of £1,000 a year.

No bonus was payable so as to bring total remuneration inclusive of bonus above £1,000.

From September, 1931, to August, 1932, bonus was related to an average cost of living figure of 50 per cent. above the 1914 level.

STABILISATION

Under an agreement reached in July 1932 there will be a period of stabilisation until April 1, 1934, during which total remuneration will continue to be assessed at the rates then in operation (100) unless for six consecutive months during the period the official cost of living figure is either below 35 or above 60 in which event a review of the general standard of Civil Service remuneration will be undertaken in the light of all the relevant considerations.

The effect on Civil Service salaries below £1,800 a year shown in the succeeding pages (other than those shown as inclusive) at various salary points is set out in the table below.

Basic Salary	Total Remuneration
£100	£148
150	209
200	271
250	329
300	388
400	505
500	623
600	746
700	834
800	940
900	1,044
1,000	1,146
1,500	1,633
1,750	1,800

Offices other than "Government Offices"

Where bonus is payable to County, Municipal and other Officers on a sliding scale the following rates will obtain from September, 1932, to March, 1933:—

Annual Salary	Bonus % pt 1932	Weekly Wages	Bonus % pt 1932
£	£ s	s d	s d
90	45 0	14 0	7 0
150	59 4	15 0	7 6
200	70 14	17 0	8 6
250	79 8	18 0	9 0
300	88 0	20 0	10 0
400	105 7	30 0	15 0
500	122 13	40 0	18 8
600	126 0	50 0	20 11
700	133 13	60 0	23 3
800	139 13	70 0	25 7
900	143 18	80 0	27 8
1,000	146 9	90 0	29 5
1,750	50 0	100 0	31 8

Commissioners were temporarily transferred to the Charity Commission and in 1899 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act 1899.

Chief Commissioner	F. M. Upson	£1,500
Second Commissioner	H. D. S. Ienke	£1,000 to £1,200

CENTRAL ELECTRICITY BOARD

(Established under the Electricity Supply)

Act, 1926)

Office, Trafalgar Place, & Charing Cross, S W 1

The Board are charged with the duty of supplying
electricity to authorized undertakers in Great Britain.
Their main functions are to construct main transmission
lines (commonly known as The Grid) to concentrate
generation at standard frequency in the most efficient
stations (selected Stations) and to supply electricity
in bulk for distribution. With that object in view, new
schemes have been adopted by the Board and are now
being carried into effect. They embrace the whole or
Great Britain except the north of Scotland. The total
working powers of the Board are £50,000,000 and issues of
stock have been made viz £3,000,000 (4) in May 1926,
£7,000,000 (5) in January 1926, £5,000,000 (4) in Nov
1926, £3,000,000 (5) in Oct and Nov 1925, £7,000,000
(5) in Feb, 1926, and £20,000,000 (4) in June 1926.
The Board publishes Annual Reports and Statements of
Accounts

Chairman, Sir Andrew R. Duncan
Other Members, The Lord Harbington, &c., &c., Sir James
Devonshire, &c., &c., Frank Hodgson, W W Walker, Sir
Duncan Watson, Sir R L Wedgwood, &c., &c., &c.,
W K Whigham

Secretary and Solicitor, Richard H Fox
General Manager and Chief Engineer, Sir Archibald
Page
Chief Accountant D W Conner &c.

EMIGRANTS' INFORMATION OFFICE

(see Overseas Settlement Department, p 287)

EXCHEQUER AND AUDIT DEPARTMENT,
Victoria Embankment, E C 4

This is the Department of the Comptroller and Auditor
General an office created by the Act 29 & 30 Vict c 39
(1866) to replace with extended powers the separate
offices of Comptroller General of the Receipt and Issue of
the Exchequer and of the Commissioners for Auditing
the Public Accounts. This office is appointed by
Letters Patent under the Great Seal and is irremovable

except upon an address from the Two Houses of Parliament. In his capacity of Comptroller General of the Receipts and Issues of the Exchequer he authorises all issues from the Exchequer after satisfying himself that Parliament has given authority for them. He examines the Exchequer accounts and makes an annual report on them to Parliament. In his capacity of Auditor General of Public Accounts he is charged with the duty of examining on behalf of the House of Commons the accounts of expenditure out of monies provided by Parliament, the accounts of the receipt of revenue, and generally all other public accounts including the accounts of Government stores and of trading services conducted by Government Departments. The results of his examination of those accounts are reported to the House of Commons.

Comptroller and Auditor General, Gilbert Charles Upcott, C.B. £3,000

Private Secretary, W. C. G. Critchett

Secretary, F. N. Dixon, C.B. £2,500

Allen, M.C., P. Aherne, F. W. Fry, J. O. Toore, W. A. Brook, J. N. Cooke, M.C., I. Epton, A. Mathison, J. E. Biggs, S. J. Becker, A. Gullford, J. E. Gwyther, J. G. Macnamara, L. F. Armstrong, M.M., F. J. Marriott, A. W. Douglas £550 to £700

There are also 124 Auditors £350 to £500

EXPORT CREDITS GUARANTEE DEPARTMENT.

9 Clements Lane, E.C. 4 (Royal 8771)

BRANCH OFFICES: Manchester—Ship Canal House, King Street (City 9305) **Bradford**—69 Market Street (8912)

The Overseas Trade Acts 1900-1930 empower the Board of Trade to give guarantees in connection with the export of British goods. These powers are administered by the Export Credits Guarantee Department acting in consultation with a statutory Advisory Committee set up for the purpose. The Minister in charge of the Department is the Secretary of the Department of Overseas Trade, who in April 1929 appointed an Executive Committee to control the daily conduct of the business.

Statutory Advisory Committee

FOREIGN OFFICE, Downing Street, S.W. 1

The Secretaryship of State for Foreign Affairs was created in 1720 superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1689). He is assisted by two Under Secretaries (one Parliamentary the other Permanent) two Deputy Under Secretaries and two Assistant Under Secretaries. Legal Advisers, a Finance Officer, a Press Officer, twelve Counsellors, a Librarian and a staff of Clerks. The chief functions in addition to the usual duties are receiving and answering communications from non officials or other Government Departments from Imperial and Consular Agents of this country or others and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £14,927 in 1929-30.

Principal Secretary of State for Foreign Affairs, The Rt. Hon. Sir John Simon, G.C.B., C.V.O., C.B.E., M.C., M.P. £8,000

Private Sec., H. J. Boynton, M.C.

Asst. Private Sec., M. B. Ronald (Diplomatic), H. L. A. Hopkinson.

Parliamentary Private Sec., Edgar Granville, M.P.

HOME OFFICE, Whitehall, S W 1

The Secretaryship of State for the Home Affairs was created in 1792, the duties having previously been assigned to the Southern Secretaryship which embraced the affairs of Great Britain, Ireland and the Colonies and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in a definite way, the names of the two offices forming a running high and low tide in the use of the term. In 1801, when the Home Secretary was until 1794. Was business also in the Colonial Secretary was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure and a channel of communication with the Sovereign and his ministers. It is the maintenance of the law and the enforcement of rules made for the internal well being of the community and the exercise of the prerogative of mercy.

POLITICAL HONOURS SCRUTINY COMMITTEE

The Royal Commission on Honours 1922 recommended that a Committee should be appointed to consider the names submitted to the King the names and particulars of persons recommended for appointment to any dignity or honour on account of political services and also such matters as they think fit to report to the Prime Minister whether so far as they believe such persons in the whole (circumstances are fit and proper persons to be recommended to the King.
Secretary James Rae (Treasury, S W 1)

IMPERIAL ECONOMIC COMMITTEE, Queen Anne's Gate Buildings S W 1

This Committee was established in 1925 following the recommendation of the Imperial Economic Conference 1924 for the purpose of considering the possibility of improving the methods of preparing for market and marketing within the United Kingdom the products of the various parts of the Empire with a view to increasing the consumption of such products in the United Kingdom and in view of the importance of foreign countries and to promote the interests both of producers and consumers. The Imperial Conference of 1925 further widened the reference to the Committee in the following terms of reference—

- (1) To investigate the marketing of Empire foodstuffs in the United Kingdom
- (2) To undertake inquiries into the production for export and the marketing in various parts of the world of raw materials of the Empire
- (3) To prepare a statement of the conditions of the Commonwealth and of any branch of Empire trade and marketing
- (4) To carry out certain investigations adopted by the Imperial Conference 1925
- (5) To facilitate references among those engaged in various industries in various parts of the Empire
- (6) To examine and report on any economic question which the Governments of the Empire may agree to refer to the Committee

The Committee has published twenty four reports the first a general report and reports on meat fruit dairy produce fish poultry and honey functions and work of the Committee to the Imperial Agricultural Machinery, and the position in the trade of the British Empire and the manufacture of goods hides and skins progress report (1929) tea coffee cocoa wine and spirits the wheat situation (1929) Imperial Industrial Co-operation and Constitution and work of the Committee (1929)

*Chairman Sir Horatio Wilson K.C.B. C.B.
Secretary, Sir David Chadwick, C.B. C.B.*

IMPERIAL SHIPPING COMMITTEE, Great George Street, S W 1

Set up in 1922 (1) To enquire into complaints from persons and bodies interested with regard to ocean freight facilities and conditions in the Imperial trade or questions of a similar nature referred to them by any of the nominating authorities and to report their conclusions to the Governments concerned (2) To survey the facilities for maritime transport on such routes

as appear to them to be necessary for trade within the Empire and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type size and speed of ships depth of water in docks and channels construction of harbour works and similar matters and in so doing to take into account facilities for air transport on the routes in question. Like the Imperial Economic Committee it derives authority from and reports to all the Governments represented at the Imperial Conference.
*Chairman Rt Hon Sir Halford Mackinder
Secretary V. Graham, M.P.*

INDIA OFFICE, Whitehall, S W 1.

Prior to 1925 Indian affairs were conducted by the East India Company under the supervision of a Government Board of Control whose President was responsible for Indian affairs in Parliament. On the transfer of India to the Crown in 1925 a Secretary of State assisted by a Council was entrusted with the administrative duties formerly discharged by the Company and a Board of Directors of the Government of India.

THE METEOROLOGICAL OFFICE.

The control is vested in a Director and Committee appointed by the Air Council. The General Committee of the Royal Society is an Advisory Committee for general subjects. The work of the Office includes—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observations for the study of weather with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the British Rainfall Organisation was transferred to the Meteorological Office in July 1929.

Chairman of Meteorological Committee, The Under Secretary of State for Air

Director of Meteorological Office, G. C. Simpson, M.C.

METROPOLITAN WATER BOARD.

273 Sevenoaks Avenue, E.C. 2

The Board serves an area of 533 sq. miles. The charges are levied on net annual value at a rate not exceeding 8½ pence, as the Board may fix. The net water rental for 1932-33 was £4,938,722. The capital debt on May 1st 1933 amounted to £54,269,667. The interest paid was £2,747,519. The number of servants being 1,308,650. The annual supply was 222,765,000 gallons (equivalent to 43,800,000 tons) a daily average of 260 7/8 million gallons. One of the sources of supply is the New River Company's undertaking, inaugurated in the reign of James I (1606) by Sir Hugh Myddelton to bring water from Amwell and Chadwell Hertford to London.

Chairman of the Metropolitan Water Board, Sir W. Price, Bt, M.C., D.C.

1st Vice Chairman, R. W. Jones, M.A., M.P. (M.P.)

2nd Vice Chairman, R. W. Jones, M.A., M.P. (M.P.)

THE ROYAL MINT, Tower Hill, E.C. 2.

Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon to Fri.

The Royal Mint, as now constituted, may be said to date from 1877 and the buildings from 1910, the latter being completed in that year at the cost of over £500,000.

The first known Master (or Warden) of the Mint dates from Henry I and the last Warden was Lord Maryborough (1824-29) the last Master being Professor Thomas Graham who died in 1866. In 1870 the (omage Act abolished the ancient post of Master of the Mint as such and combined it with that of the Chancellor of the Exchequer. The estimated administrative expenses amount to £200,000 for 1932-1933. Appropriations in aid £200,000 leaving a net cost of £150,000.

Master and Wife, The Chancellor of the Exchequer

THE BRITISH MUSEUM

Bloomington, W.C.

Open free daily 10 a.m. to 6 p.m., Sundays 2 p.m. to 6 p.m. *Lecture tours* on weekdays at 12 noon and 3 p.m. *Reading room* open daily to readers, from 9 a.m. to 6 p.m., and Newspaper Room (at Colindale), from 10 a.m. to 5 p.m. throughout the year, except Good Friday and Christmas Day, and Sundays (closed for cleaning first six week days in May). Tickets of admission, for purposes of research and reference which cannot be carried on elsewhere, are granted on written application beforehand to the Director. The applicant must state abode, business or profession and full particulars of purpose, and must send a recommendation from a person of recognized position.

The British Museum may be said to date from 1753 when Parliament granted the sum of £20,000 to purchase the collection of books & of br. Hano. Some the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1824 and the original collection has increased to its present dimensions by gifts and purchases and by the operation of the right of purchase in 1802. The collections include sculpture & a collection of specimens of early printed books, bindings, manuscripts, autograph letters and prints and drawings of Egyptian, Assyrian, Greek, Roman, Chinese, Japanese, British and medieval and other antiquities, coins, gold ornaments, gems, china, glass, ethnographical objects, & monuments of Indian, Chinese & the Mohammedan. The collections of the British Museum were first arranged in 1756 and in 1793, 32 and were met by a vote under Education, Science and Art, Class 11 of the Civil List.

Assistant Miss M. T. Orms, £300

THE BRITISH MUSEUM (NATURAL HISTORY).

Cromwell Road, S.W. 7

Open free on week days (except Good Friday
 and Christmas Day) 10 to 6, and on Sundays
 from 10 to 6.

An Official Guide lecturer conducts visitors
 round some portion of the collections at 12 noon
 and at 3 p.m. daily (except Sundays) free of
 charge, and his services are available at other
 times for special parties (also free of charge)
 by arrangement with the Director. Students
 are admitted daily for the special study of the
 collections, and to make drawings and take
 photographs of specimens, under special regu-
 lations to be obtained from the Director. The
 Museum issues a large variety of publications,
 comprising scientific monographs and cata-
 logues, the "Natural History Magazine"
 (quarterly), popular guide books and manuals,
 instructions for collectors, economic pamphlets,
 and picture post cards, both monochrome and
 in colour.

The Natural History Collections in the British Museum
 were removed to South Kensington and remained
 there in 1883 as the new museum being opened to the
 public in 1887. The collections comprise all kinds of
 natural history. A morphological series in the
 central hall a collection of domesticated animals a
 series of insects illustrating economic zoology galleries
 of mammals including whales birds and their nests
 fishes, reptiles insects shells corals sponges &c.
 galleries of fossils of all kinds a botanical gallery and
 an extensive gallery of minerals rocks and meteorites
 with series of specimens forming individualities. The
 daily. The administrative expenses were estimated at
 £68,530 in 1923-24.

Technical Assistant (Higher Grade), J. O. Burdon, £300 to £400

Keeper of Mineralogy, L. J. Spencer, M.D., F.R.S., £1,000
Deputy Keeper, W. Campbell Smith, M.Sc., £500
Assistant Keepers (Second Class) F. A. Hannibal, M.A., M. H. Hey, M.A., M.Sc., £450 to £440
(Chief Higher Grade) F. F. Vincent, £300 to £400
Keeper of Botany, J. Burdett Smith, O.B.E., M.A., £1,000
Deputy Keeper, A. J. Wilmott, M.A., £500
Assistant Keepers (Second Class) A. W. F. Hall, M.A., G. Tandy, M.A., J. L. Dandy, M.A., G. T. Taylor, M.A., A. H. G. Abston, M.A., £450 to £440

THE SCIENCE MUSEUM.

South Kensington, S.W. 7

Open daily except Good Friday and Christmas
 Day, 10 to 6, Sunday, 10 to 6. Admission
 free. *Science Museum Library*, Imperial Insti-
 tute Road, S.W. 7. Attached to the Science
 Museum. The National Library especially de-
 voted to pure and applied Science. 285,000
 volumes, 12,200 periodicals, a set of British
 patent specifications. Subject matter index to
 articles in periodicals, 1,000,000 aids. Biblio-
 graphies supplied—Open on weekdays, 10 to
 5.50. Admission free. Books lent to Govern-
 ment Departments, Universities and approved
 Research Institutions.

The Science Museum was instituted in 1883 under the
 Science and Art Department as a part of the British
 Museum and opened in 1887. It was added in
 1883 to the collections of the Patent Museum. In 1909 the
 administration of the Science Collections was separated
 from that of the Art Collections which were transferred
 to the Victoria and Albert Museum. The collections in
 the Science Museum illustrate the application of science
 to industry and the development of scientific
 and industrial mechanisms, apparatus and machinery.

The divisions are (a) Industrial Engineering, (b)
 Mechanical Engineering, Land Transport and Con-
 struction, (c) Water Transport and Air Transport,
 (d) Science and Scientific Instruments.

Director and Secretary, Col. Sir Henry G. Lyons, D.Sc., F.R.S., £1,500
Staff Chief, S. I. Kelly, £400 to £500

Industrial Machinery Division.

Science Division II.
(Physics and Geography &c.)

Deputy Keeper, H Shaw, F.R.S. £600 to £700
Assistant Keepers (Second Class), W G Pincherne
and F A B Wud, F.R.S. £250 to £400

Library.

Keeper, S C Bradfield, F.R.S. £1,000
Assistant Keeper (First Class), E Lancaster, F.R.S. £400 to £600
Assistant Keeper (Second Class), H T Pledge, F.R.S.
and H P Syme, F.R.S. £250 to £400

THE VICTORIA AND ALBERT MUSEUM

South Kensington, S.W. 7.

Open on weekdays from 10 a.m. to 6 p.m. except Good Friday and Christmas Day. Admission free. Persons desiring the use of the Library must apply for a ticket. The Indian Section, containing collections illustrating the arts and industries of the Indian Empire, is situated in the Imperial Institute Road, open free every day same hours as above. On Sundays the Indian Section and all other Departments of the Museum with the exception of the Library and the Circulation Department, are open from 2.30 p.m. till 6 p.m. Casts of various objects in the Museum, and also from Sculptures in the British Museum, can be obtained on order on application to the Department for the Supply of Casts.

The history of the Museum may be said to begin in 1855 when the Museum of Ornamental Art was founded at Mulborough House. The collection consisted of certain objects which had been purchased at the 1853 Exhibition on account of the excellence of their art and workmanship at a cost of £55,300 (together with other specimens purchased to the use of the various Schools of Design since 1837 and dispersed among them). Additions have since been made by purchase gift and bequest. The Museum contains nine departments: viz.—Architecture and Sculpture (Carving Engraving Illustration and Design Metalwork Paintings Woodwork Textiles Library (books on art and Book Production and the Department of Circulation). The older parts of the building were erected between 1850 and 1860, the new buildings were completed in 1909. The administrative expenses were estimated at £120,000 in 1932-33 and were met by a vote under Education, Science and Art. The branch museum at Bethnal Green (a tentative expense of 1932-33 £50,000) was opened in 1872. The buildings were removed from South Kensington and are erected on land purchased for the purpose locally.

Director and Secretary, E R D Macgregor, C.B.E., F.R.S. £1,800 to £2,500

IMPERIAL WAR MUSEUM

Imperial Institute Road, S.W. 7.
Open free daily (except Good Friday and Christmas Day), 10 a.m. to 6 p.m., Sundays 2.30 p.m. to 6 p.m.

The formation of a collection connected with the War was approved by the War Cabinet on March 5, 1917. The Imperial War Museum Act received the Royal Assent on July 2, 1916 and a Board of Trustees was appointed. The Museum was opened by H.M. the King on June 9, 1917 at the Crystal Palace. The tenancy of the Crystal Palace having expired on March 31, 1926, the Museum was removed to the galleries known as the Western Galleries in the Imperial Institute Road. The aeronautical collection was transferred to the Science Museum on loan. The Museum was re-opened to the public on Nov. 2, 1924. The collection includes Naval and Military trophies and relics, ordnance, small arms and ammunition, ship and other models, works of art, photographs (comprising over 250,000 subjects), prints of which may be purchased, and a reference library containing 60,000 books and pamphlets available for study to the public. The reference sections are not open on Saturday afternoon or Sunday. All the attendants are men who served during the Great War (Major and Sec, Charles John Boult, C.B.E., F.R.S.).

NATIONAL GALLERY

Trafalgar Square, W.C. 2.

Open 10-4.5 or 6, according to season. Paying days (6d), Thursday and Friday. Open free other days, Sunday, from 2 to 4.5 or 6 (closed on Good Friday, Christmas Eve, and Christmas Day).

The National Gallery is the result of a Parliamentary grant of £500,000 in 1824 for the purchase and exhibition of the Angerstein collection of pictures. The present building being opened in 1838 and enlarged in 1868, 1887, 1912, 1922 and 1930. The cost of administration of the National Galleries (Trafalgar Square and Millbank) in 1932-33 was estimated at £30,000.

§ NATIONAL DEBT OFFICE, 29 Old Jewry, E C 4

The National Debt Commissioners were appointed under Act 111 (c. 32) 1896 by which a permanent Sinking Fund was to be established and a sum of £200,000 issued quarterly to be applied towards the reduction of the National Debt being commonly spoken of as Mr Pitt's Sinking Fund. In 1899 this was superseded by appropriating the surplus income of the year as the Sinking Fund and this was commonly known as the Old Sinking Fund. In 1899 the New Sinking Fund was set up by Sir Stafford Northcote and in 1902 another New Sinking Fund was set up by Mr. Baldwin. These with other funds detailed on p. 636 now mainly operate in reducing the Debt. The Commissioners are at the present time the Speaker the Chancellor of the Exchequer the Master of the Rolls the Lord Chief Justice the Accountant General of the Supreme Court and the Governor and Deputy Governor of the Bank of England. The net administrative expenses of the Board were estimated at £1,687 in 1932-33.

MANCHESTER OFFICE.
Keeper of Cotton Marks, 9 Mitton £450 to £500
Staff Officer, H Bottomley £350 to £450

PAYMASTER GENERAL'S OFFICE.

Whitehall, S W 1

The Paymaster General's Office was formed by the consolidation in 1865 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Other offices were incorporated in 1868. Its function is that of paying agent for the different Government Departments other than the Revenue Departments. The majority of its payments are made through banks (to whose accounts the necessary transfers are made at the Bank of England) but cash payments are also made, and the payment of pensions is an important feature of its work. The establishment expenses were estimated at £50,000 in 1933-34.

Paymaster General, The Lord Rochester, C.B., unpaid
Assistant Paymaster General, Roland Wilkins, C.B.

Private Sec., E G Hawwood £1,500
Principal Clerk, J Mahood £850 to £950, J H W Webster, P. S. Owen £750 to £850
Heads of Divisions, S Stephens, A H May, J W Beard, M E Martin, W Luck, H L Bottomley, J H Ashworth, J C McIntyre, R C S Lloyl £550 to £700

MINISTRY OF PENSIONS

28 Great Smith Street, Westminster, S W 1

The amount required to defray the salaries and expenses of the Ministry and for sundry contributions in respect of the Administration of the Act was estimated at £47,243,800 for 1933-34.

Minister of Pensions, Maj Rt Hon G C Tryon, M.P.

Offices

General Manager, Sir David J. Owen
Solicitor and Secretary, J. D. Ritchie, M.A.

POST OFFICE.

Chief Office, St Martin's-le Grand, E.C. 2

A House of Commons report in 1844 states it is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects. The first Master of the Posts was appointed in 1536 but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue producing departments and while efficiently discharging its multifarious duties it has a large annual profit. It also receives large sums of duties and taxes on behalf of the Inland Revenue Department for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commission and the Board of Trade. The Post Office also pays Widows' and Old Age Pensions and Naval Military and Air Force Pensions and Allowances. The Penny Post was inaugurated in 1840 the Book Post in 1855 the Post Office Savings Bank in 1861 the Post Office Telegraphs in 1870 the Money Order Office in 1872 Postal Orders in 1880 the Parcel Post in 1883 and the Telephone Service in 1886. The expenses of the Post Office (Salaries, Wages, etc. only) were estimated at £35,500,000 in 1932.

Postmaster General, Rt Hon Sir Kingsley Wood, M.P.

Private Secretary, H. Naylor, £2,500

Assistant Master General, Sir Eric Bennett, M.P., £1,500

Permanent Secretary, C. O. L. Leigh Clark, £1,500

Permanent Secretary to the Post Office, Sir G. Evelyn P. Murray, K.C.B., £3,000

Private Secretary, Comdr B. V. Sturdee, M.P., £2,500

Second Secretary, F. Raven, C.B., £2,500

Director of Postal Services, Sir Gen. F. H. Williamson, C.B.E., £2,500 to £2,500

Director of Telegraphs and Telephones, L. Simon, C.B.E., £2,500 to £2,500

Assistant Secretaries, J. J. Bell, C.B.E., A. R. Kinnear, £1,500, W. J. Parnham, H. D. Wakeley, £1,500, Phillips, £1,500, H. S. Grant, C. I. K. Peck, H. F. Sambock, £1,500 to £2,500

Secretary's Office.

Principals, G. O. Wood, E. H. Nichols, W. E. Weston, A. C. Belgrave, W. H. Wightman, E. C. G. Linn, L. A. Jones, W. R. Birchall, G. E. Forbes, J. Scholes, O.M., W. D. Waterfall, H. G. Welsh, E. R. PRIVY COUNCIL OFFICE Whitehall, S W

The Privy Council office of vernal origin. A Council the number of which was at one time was instituted by Alfred the Great and it discharged the functions of State now confined to members of the Cabinet in the Middle Ages the Chief Adviser of the King who was prominently about him formed the Privy Council. Having become unwieldy it was reconstituted in 1579. At present it consists of certain eminent persons whose names are given in 128. Members of the Council must be Privy Counsellors and they principally form the acting Privy Council. The Council is summoned as such to act with the King upon the demise of the Crown and many matters referred by the Sovereign to the Committee of the Council some of which are standing committees and others constituted to deal with particular cases of the Judicial Committee the Board of Trade &c. The Lord President of the Council is the fifth Great Officer of State and as such is always a prominent member of the Cabinet.

Geological Survey of Great Britain and Museum of Practical Geology

Head Office, Tennyson Street London SW 1 and Southpark 7, George Street Edinburgh (Branch Office at Manchester Newgate on Tyne and York)
The Geological Survey and Museum was commenced in 1830. It was under the Science and Art Department from 1833 till 1900 when that Department became merged in the Board of Education. On 1st July 1909 the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the survey includes the preparation of geological

maps and memoirs dealing with the general survey of the country and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world and especially Great Britain.

Chairman of Geological Survey Board, Dr. T F Sibbly, £800 to £900

THAMES CONSERVANCY.

2 Norfolk Street, Strand, W C 1

The Conservancy of the River Thames was granted to the Lord Mayor of London in 1487 and delegated to 22 conservators in 1569, the powers being reconstituted in 1804. The Port of London Act 1808 took over as from March 31 1809 all rights powers and duties of the conservators in respect of the river below Teddington. Under the Lind Drainage Act 1892 the Conservators were reconstituted as from April 1 1892 and appointed the Drainage Board of the Thames (at present Area) (chaired, Rt Hon Lord Desborough K.C., CVO Vice Chairman, Charles G Field, J Secretary, E W Geary.

BOARD OF TRADE.

Great George Street, S W 1.

Headquarters, Great George Street, S W 1 Bankruptcy Dept., 20, Great Smith Street S W 1
General Receiver and Record Office of Shipping and Seamen Tower Hill, E C 3, Standards Dept., 6 & 7, Old Palace Yard, S W 1

(See also Dept of Overseas Trade and Patent Office)

A Council for Trade and Plantations was instituted by King Charles II in 1660. This paid Council was abolished in 1706 and in 1706 a Committee of the Council on Trade (which unlike the other Council Committees had a President of its own) was set up. The President of the Board of Trade, as at present constituted, controls the Department principally responsible for matters relating to trade and industry. The Board is concerned with international commercial and industrial policy and administers certain statutes including those relating to merchant shipping and seamen bankruptcy, joint stock companies, gas, key industries, merchandise marks, cinematograph films, weights and measures, patents, designs, trade marks and copyright and mines and quarries. It administers the (outward) and also exercises control over the principal lighthouse authorities of the country and over the construction of works on tidal lands. It collects and publishes statistics of the trade and industry shipping and navigation of this country its Dominions and Protectorates and foreign countries, as well as particulars of customs tariff regulations &c and publishes a weekly journal of commercial information. The Board Council is attached to this department. The Department arranges the provision of all sea transport required for the conveyance of personnel and stores by the fighting services and other Government Departments. In addition it under takes duties arising out of the War, the most important now remaining being those of the clearing Office for Enemy Debts. Jointly with the Foreign Office it controls the Overseas Trade Department.
President, Rt Hon Walter Runciman, £5,000

TREASURY, Whitehall, S.W. :

The **First High Treasurer of England** is the Third Great Officer of State the office having been in commission (with certain intervals) since 1855. The Commissioners of the Treasury of the United Kingdom consist of the first Lord who is usually Prime Minister the Chancellor of the Exchequer and some Junior Lords with certain Secretaries and a staff of officials.

The duties of the first Lord are mainly political as also are those of the Parliamentary Secretary and the Junior Lords the duties of the Chancellor of the Exchequer are mainly financial in that he performs the ancient duties of the Under Treasurer and, after agreement with the heads of the great spending departments arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget which the Chancellor opens and expounds to the House these plans being accepted modified or rejected by the House.

PRIME MINISTER AND FIRST LORD OF THE TREASURY. The Rt Hon James Ramsay MacDonald, M.P. £5,000

TRINITY HOUSE, Lower Hill, E.C. 3.

Trinity House the first General Lighthouse and Pilotage Authority in the Kingdom was a body of importance when Henry VIII granted the Institution its first charter in 1534 *inter alia* for the relief increase and augmentation of the Shipping of this Realm of England. Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day the principal duty of the Corporation at Trinity House as a Public Department is the administration of the Lighthouse & Service of England and Wales with certain statutory jurisdiction in regard to Lighthouses and other marks in Scotland Ireland the Channel Islands and Gibraltar whilst the Corporation are also the chief Pilotage Authority in the United Kingdom and in their capacity as a private corporation or guild they administer certain Charitable Trusts specially dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

THE JUDICIAL COMMITTEE OF THE

PRIVY COUNCIL

Office, Downing Street, Whitehall, S W 1

THE Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Judicial Committee of the Privy Council consists of the Lord Chancellor, Lord President, ex Lords President, the Lords of Appeal in Ordinary (see col 2), and such other members of the Privy Council as shall from time to time hold or have held "high Judicial Office" within the meaning of the Appellate Jurisdiction Acts, 1876 and 1887. Among the last are included Viscount Halsbham, Viscount Buckmaster, Lord Warrington of Clyffe and Lord Salvesen. Sir John Wallis is a member by virtue of section 30 of the Judicial Committee Act, 1833, Sir George Rivers Lowndes and Sir Dinshah F. Mulla (Appellate Jurisdiction Act, 1899), and the following judges from the Dominions beyond the Seas (various Acts, 1895-1928) — Sir Charles Fitzpatrick (*Canada*), Sir James Rose Innes (*S. Africa*), Sir Justice Lyman Poore Duff (*Canada*), Sir Isaac Alfred Isaacs (*Australia*), Chief Justice Francis Alexander Anglin (*Canada*), Chief Justice Sir William Mulock (*Ontario*), Sir Jancelot Sanderson (*Bengal*), Chief Justice Sir Michael Myers (*N Z*), and Chief Justice Sir Frank Gavan Duffy (*Australia*).

Registrar of the Privy Council (and Registrar of Ecclesiastical Causes), Sir Charles Nissh, K B E, C B, Barrister at Law £1,500

Chief Clerk (Judicial), W. Reeve Wallace, C B E £800

Second Clerk, D G Lys £450

In Scotland the principal local court is the Sheriff Court. The Judge Ordinary is the Sheriff Substitute, and the Sheriff is an Appeal Judge. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of practically all serious crime except murder, treason and rape, but the power of punishment is limited to fine and imprisonment, it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

Prosecutions are conducted by Crown officials at the public expense, the Lord Advocate and his deputies prosecute in the High Court, the Procurators Fiscal in the Sheriff Court.

The Convener of the Sheriffs is Sheriff Alexander L. McClure, Aberdeen.

The Address of the Secretary of the Sheriffs-Substitute Assoc. is County Buildings, Ayr.

ADOPTION OF CHILDREN

In *England and Wales* the adoption of children is regulated by the Adoption of Children Act, 1926. An Order of Court is necessary to legalize the adoption and the Act provides a number of safeguards. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock in all matters of custody, education and maintenance but does not alter the child's rights in property of his real parents (e.g., on intestacy) nor give the child rights in respect of the adopter's property. The Act provides for a register of adopted children. Applications are made to the High Court (Chancery) County Court or Magisterial Bench. Orders will not usually be made for a man to be sole adopter of a girl, and applicant must be twenty five years of age or older.

Scotland—The Adoption of Children (Scotland) Act, 1930, makes similar regulations for Scotland as from Oct. 1, 1930 and directs the Registrar General for Scotland to establish and maintain an Adopted Children Register. Applications are made to the Court of Session or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application.

BIRTHS (REGISTRATION)

(For Certificates, see p. 343.)

WHEN a birth takes place personal information of it must be given to the local Registrar of Births and Deaths and the register signed in his presence by one of the following persons: 1. The father or mother of the child. If they fail 2. The occupier of the house in which the birth happened. 3. A person present at the birth. 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The registration must be made within 42 days of the birth. Failure to do this without reasonable cause involves liability to a penalty of forty shillings. If at the end of 42 days the birth is not registered the Registrar may require any one of the above mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days) unless the Registrar is requested to attend at a residence or at the house where the child was born when he may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar and on payment of fees amounting to five shillings to him and the Registrar. After twelve months no birth can be registered without the Registrar General's consent and on payment of further fees amounting to ten shillings. In *Scotland* after the lapse of three months it can only be registered on the authority of the County Sheriff. The regulation that no birth in *England* and *Wales* could be registered after seven years was revoked in 1925 but late registration cannot be allowed unless satisfactory evidence is supplied to the Registrar General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts under the Notification of Births Act 1907 (as extended by an Act of 1915) notice of every birth must be given by the father or person in

attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A Stillbirth must be registered accompanied by either a certificate of doctor or midwife or a declaration that no doctor or midwife was present at the birth, and that the child was not born alive.

The registration of the birth of a person under the Legitimacy Act, 1926 is provided for in that Act (see p. 362).

Birth at Sea—The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth abroad—Consular Officers are authorized to register births of British subjects occurring in their districts.

BRITISH NATIONALITY

The law as to British Nationality is mainly to be found in the British Nationality and Status of Aliens Act 1914 as amended by certain Acts passed in 1918 and 1925. It is important to notice that the Act of 1914 which defines a natural born British subject does not affect the status of any person born before Jan. 1, 1915.

The following are deemed to be British Subjects namely:

1. Any person born within His Majesty's dominions and allegiance.

2. Any person born out of His Majesty's Dominions before Jan. 1, 1915, whose father's father was born within His Majesty's Dominions, provided that the grandfather was at the time of the father's birth a British subject.

3. Any person to whom a Certificate of Naturalization has been granted or who has acquired British nationality by reason of annexation of territory or by special Act of Parliament.

4. The wives (whatever their nationality of origin) of British subjects save in certain cases where the man changes his nationality after marriage.

5. The children of naturalized British subjects born out of His Majesty's Dominions provided that they comply with one of the following conditions:

(a) in the case of a child born before January 1st 1915.

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age; or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915 and his name is included therein.

(b) in the case of a child born after January 1, 1915.

(i) if before his birth a Certificate of Naturalization had been granted to his father or his mother; or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

6. Any person born out of His Majesty's dominions whose father was at the date of the

birth a British subject, and who fulfils any of the following conditions—*s. 9*, if either

- (i) his father was born within His Majesty's allegiance or
- (ii) his father had a certificate of Naturalization, or
- (iii) his father had become a British subject by reason of any annexation of territory, or
- (iv) his father was, at the date of the birth in the service of the Crown, or
- (v) his birth was registered at the British Consulate within one year or, in special cases two years or, in the case of a person born on or after January 1, 1925 who would have been a British Subject if born before that date, within 22 months after August 1, 1925

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty, &c. His Majesty exercises jurisdiction over British subjects

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21 and abandons any other nationality he may have acquired

7 A person born on a British ship

LOSS OF BRITISH NATIONALITY.—A British subject loses his British nationality—

- (a) if by any voluntary or formal act he becomes naturalized in a foreign country
- (b) if, in certain cases, he makes a declaration of allegiance. These cases are—
 - (i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance on board a British ship and is also by birth or becomes during minority a subject of any foreign State,
 - (ii) where a person is a British subject but was born out of His Majesty's Dominions, and
 - (iii) where a Convention has been made between this country and any foreign State to the effect that any subject of that state who has been naturalized as a British subject may divest himself of that Status.
- (c) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality
- (d) in the case of a woman, if she marries an alien,
- (N.B.) A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization
- (e) in the case of a person to whom a certificate of Naturalization has been granted if the Secretary of State revokes the Certificate.
- (f) if the territory of which he is an inhabitant is severed from the Crown, *e.g.*, the cases of the inhabitants of Hanover and Heligoland

ACQUISITION OF BRITISH NATIONALITY.—An alien may acquire British nationality—

- (a) by special Act of Parliament

(b) by the conquest, annexation, or cession of the territory of which he is an inhabitant,

(c) in the case of a woman, by marriage with a British subject, and

(d) by naturalization

Naturalization—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870 and December 31, 1924, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire

Under the British Nationality and Status of Aliens Act 1922, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after January 1, 1925, is a British subject not only in that part of the British Empire where the Certificate is granted but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession

Persons naturalized prior to January 1, 1925, may, after that date apply for a fresh Certificate of Naturalization under the new conditions

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must—

- (a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown
- (b) be of good character and have an adequate knowledge of the English language, and
- (c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application for a certificate which may be obtained (price 6d.) from H.M. Stationery Office

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £20 of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application is not returnable whether or not a Certificate is granted

N.B.—In the case of a woman who was a British subject previously to her marriage to an alien and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed

STATUS OF ALIENS—Franchise may be held by an alien in the same manner as by a natural born British subject but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom or qualify him for any franchise

Aliens are not entitled to be tried by a *jury de medietate lingue*, but are triable in the same manner as if they were natural born subjects

ADMISSION SUPERVISION AND DEPORTATION OF ALIENS—Under the Aliens Order 1920 any alien coming from outside the United Kingdom must obtain the leave of an Immigration Officer to land in the United Kingdom and such leave

is refused in many cases, e.g., where the alien is without means, or (if he is seeking employment) is unable to produce a Permit issued by the Minister of Labour. Provision is also made (Article 6 of the Order) for the registration of resident aliens and (Article 12) for the deportation of aliens by order of the Secretary of State which can be made on various grounds. The Aliens Order, 1920, was made under the Aliens Restriction Act 1914, as amended and extended by the Aliens Restriction (Amendment) Act 1929.

BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT 1916

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp 424-425 of the 1929 'WHITAKER'. The Office of the Registrar of Business Names is at Somerset House W.C.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales—Certificates of Births, Deaths or Marriages can be obtained at the General Register Office Somerset House on payment of fees amounting to 3s. 7d. viz. 2s. for search 2s. 6d. for the certificate and 1d. for the stamp affixed thereto. (When application is made by post the charges are 3s. 8d.) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act 1896 Birth or Death 2s. Factory and Workshop Act 1901 and for purposes of Elementary Education Birth 6d. Savings Banks Act 1887 Birth Death or Marriage 1s. National Insurance Acts 1911 and 1913 Birth 6d., Marriage 1s. Industrial Assurance Companies Act 1896 and Trade Unions Amendment Act 1896 death of child under 10 years of age 1s. but only from the local registrar.

English Registers—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the Society of Genealogists at 5 Bloomsbury Square London W.C.

Scottish Registers of Births, Marriages and Deaths—Parish registers were instituted for these in 1553 but until the Registration of Births &c. (Scotland) Act 1854 they were not properly kept in many cases. Extracts may however be obtained from them on payment of 2s. 6d. for each entry but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar General H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar General and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1929 are now in his possession. There is a general index to the registers which may be searched on payment of 2s. A search of the index of a particular parish is 1s. A fee of 2s. is payable for a search of all the Scottish registers and 1s. is payable for a search of a particular parish.

An extract of an entry may be obtained on payment of 2s. 6d. The office of the Registrar General is open on weekdays between 10 a.m. and 4 p.m.

COPYRIGHT

The law of copyright is contained in the Copyright Act 1911, under which copyright subsists automatically without registration in every original literary, dramatic, musical and artistic work. The provisions of the Act were explained on pp 425-426 of the 1929 'WHITAKER'.

Voluntary Registration at Stationers' Hall—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued the fees being 5s. for a Book and 2s. 6d. for Fine Art. Certified copies 5s. in either case (Office open on Wednesdays only, 12 a.m. to 2 p.m. and 2 to 4 p.m.) Such entries are of value in proving the existence of a work on a given date in the case of infringement.

DAYS OF GRACE

Bills of Exchange or Promissory Notes payable at any time after date have *three days of grace* allowed, thus a bill dated 1 Jan. at two months date is not due until March 4. If a bill or note is payable by instalments to be paid punctually, this does not exclude the days of grace (*Schawenston v Morris* 37 T.L.R. 366). Bills drawn *at sight* or *on demand* must be paid on presentation without days of grace. In the United Kingdom bills falling due on Sunday are payable the previous Saturday and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holiday are payable the day after.

DEATHS

(For Certificates see pp 121 & 131)

In England and Wales—When a death takes place personal information of it must be given to the local Registrar of Births and Deaths and the register signed in his presence by one of the following persons: 1. A relative of the deceased present at the death or in attendance during the last illness. If they fail 2. Some other relative of the deceased. In default of any relatives 3. A person present at the death or the occupier of the house in which the death happened. If all the above named fail 4. An inmate of the house or the person caring for the body to be buried. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death or within the same time written notice of the death sent to the Registrar accompanied by a certificate of the cause of death signed by a registered medical practitioner if any such attended the deceased during his last illness. If notice is sent information must nevertheless be given and the register signed within fourteen days from the death. It is important that every death should be registered and a certificate obtained before the funeral and delivered to the clergyman or other person who performs the funeral or religious service. If at the end of fourteen days the death is not registered the Registrar may require any one of the above mentioned persons to attend to register at a

stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above mentioned periods unless the Registrar is requested to attend at a residence, when a fee of one shilling is payable. After twelve months no death can be registered without the Registrar's General's consent and on payment of fees amounting to ten shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1906, ss. 1, 2*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child (*See under Births (Registration), p. 342*).

Death at Sea—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad—Consular Officers are authorized to register deaths of British subjects occurring in their districts.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days, (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births &c. (Scotland) Act, 1854, within 7 days, (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

CORONERS' INQUESTS—Coroners inquests are held in cases of violent and unnatural deaths such as the case of a person slain or drowned, or dying suddenly and of any person dying in prison. Coroners do not intrude into the houses of persons for the purpose of holding inquests but are sent for by the peace officers to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. With a view to avoiding duplication of proceedings it is now provided that if some person has been charged before examining Justices with murder, manslaughter or infanticide the Coroner shall adjourn his inquest until after conclusion of the criminal proceedings (*Act of 1906 s. 30*). On application by the Attorney General the High Court may order a new inquest if the interests of justice so require. A jury is only essential in the five cases specified in the Coroners (Amendment) Act, 1906, but may be summoned in any other case if the Coroner thinks fit. The jury is to be composed of not more than 12 nor less than 7 "good and lawful men" (sex disqualification now removed). If the minority is not more than two the Coroner may accept the verdict of the majority of the jury. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a witness is bound to attend. The fine for defaulting *pro symon* or witness is any sum not exceeding £5 (*See, generally, the Coroners Act, 1887, and the Coroners (Amendment) Act, 1906.*)

In Scotland there is no Coroner. In ordinary

cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see p. 340*). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public inquiry is held before the Sheriff and a jury.

BURIALS.

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will, or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should be immediately taken to ascertain the deceased's wishes from the above sources. If *Cremation* is desired it is advisable for deceased to leave instructions in writing to that effect. Cremation may not take place if deceased has prohibited that form of burial. Under the Cremation Act, 1902, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards. A person may legally leave directions for the anatomical examination of his body. As to place of burial—unless closed by order in Council—the parish churchyard is the normal burying place for parishioners or any person dying in the Parish but this will only nowadays apply in villages and the smaller towns. In the more populous districts cemeteries have long been established either by the local council, or a private company and burials will take place there in accordance with the Cemetery Regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by a County Council or County Borough Council and as to place of burial, *see* *Poor Law Act, 1930 ss. 75 to 78*. A person being found drowned on the sea shore is to be buried by the Overseers of the Parish. As to the necessity for registration of a death before burial *see* *Notes under Deaths, p. 343*.

DIVORCE.

Preliminary—Matrimonial suits may be conveniently divided into three classes, viz. (1) those in which a declaration against marriage is sought, (2) those in which the marriage is sought to be upheld and (3) those in which the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage*—Marriage is void ab initio if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, if one of the parties was insane or if one of the parties was under the age of consent, *see* *Age of Marriage Act, 1909*. Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugial Rights*—This is a form of relief generally sought by a spouse who

has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion; and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce*—The third class of suit includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful, dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

Divorce—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely: (x) those which are offences under ecclesiastical law, e.g., cruelty, adultery, and unnatural offences, (y) those which are offences by statute, e.g., incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. In the case of a wife it was formerly not sufficient that she prove mere adultery, but now, by an Act which came into force on July 28, 1923, she may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, or rape or certain other criminal offences or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce. *a mensa et thoro*, or of adultery coupled with desertion. Cruelty is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty wilfully and recklessly to communicate a venereal disease, and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Powell v. Powell* (1922) para. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights but now desertion without cause may enable the

deserted spouse to obtain a decree of judicial separation, and if coupled with adultery, a divorce.

When the decree will be refused—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent, (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion), (iii) condonation, i.e., complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation (*Crocker v. Crocker* (1922) P. 25). There are also certain discretionary bars, as, e.g., where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

Intervention by Kings Proctor—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *est* is made absolute, the Kings Proctor may intervene to show cause against making a decree absolute.

Decree Absolute—Every decree of dissolution or nullity is in the first instance a decree *non est*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children—When a suit has been commenced, the children should not be removed from the person in whose custody they are at the time. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

Alimony—A wife may in any cause file a petition for alimony (i.e., means of support) pending suit provided evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties otherwise one-fifth of the joint incomes is generally allowed. An order for permanent alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

Costs—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for

dissolution of marriage. If a suit be decided against a wife who has separate estate she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

SEPARATION BY AGREEMENT

Husband and wife may agree with or without consideration, to separate and live apart, but the agreement to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

SUMMARY JURISDICTION

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard the wife may obtain relief from a Court of Summary Jurisdiction. By an Act which came into force on Sept. 30, 1925 the following grounds for an application were added to those already existing: (a) cruelty to her children, (b) that her husband insists on having marital relations while suffering from a venereal disease, (c) that he has compelled her to submit herself to prostitution. A husband may apply on the ground that the wife has been cruel to his children. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her and the husband may be ordered to pay a weekly sum not exceeding £5. Where the husband applies, the custody of all the children of the marriage may be given to him and the wife may be committed to an institution. If the wife has been guilty of adultery no order will be made on her application unless there was condonation and if having obtained an order she commits adultery the order may be discharged but not if the court is of opinion that the husband condoned the adultery by failing to make payment of the separation allowance. An order may be altered varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

DOMESTIC SERVANTS

A Domestic Servant signifies, in law, a person employed in and about a residence, e.g., cook, butler, gardener, &c. but does not include a governess or tutor. By general custom one calendar month's notice, given at any time on either side, is required to terminate the contract of domestic service, but the Courts have recognized a custom for termination at the

end of the first month if notice is given at the end of the first fortnight.

Dismissal without notice is justified in the event of wilful disobedience to a reasonable order, gross misconduct, dishonesty, incompetence, or permanent incapacity. A character however unfavourable is a privileged statement so long as given without malicious intent.

The Workmen's Compensation Acts impose serious liabilities upon an employer in the event of death or disablement of a servant from an accident in the course of employment and prudent employers will protect themselves by a Policy, which can be obtained through the leading Insurance Companies for a small annual premium.

THE FRANCHISE

The Representation of the People (Equal Franchise) Act 1928 considerably amended both the qualifications for the franchise and the mode of registration of electors, and assimilated the franchises for men and women both for Parliamentary and Local Government elections.

PARLIAMENTARY

The qualifications for the franchise are now the same for men and women. A person is entitled to be registered as a Parliamentary elector who is 21 years of age and not subject to any legal incapacity and

(a) Has the requisite residence qualification, or (b) has the requisite business premises qualification, or (c) is the husband or wife of a person having a business premises qualification.

Residence is the actual inhabitation of premises where a person's home is and where he sleeps. The residence must have been during the whole of the qualifying period, i.e., three months in the constituency or in another constituency in the same Parliamentary borough or Parliamentary county. If not it is essential that the residence should have been successive from a Parliamentary borough or Parliamentary county contiguous to that borough or county. The Administrative County of London is treated as a Parliamentary borough.

Business premises means land or other premises of at least £50 yearly value. The business premises must be occupied for the purpose of the business, profession, or trade of the person to be registered.

Universities.—A person of full age and not subject to any legal incapacity who has received a degree is entitled to be registered as a Parliamentary elector for a University constituency also a woman who has passed the final examination and fulfilled the conditions required of women by a University which did not at the time the examination was passed admit women to degrees.

LOCAL GOVERNMENT

The qualifications for the Local Government franchise are now the same for men and women. A person is entitled to be registered as a Local Government elector who is 21 years of age, and not subject to any legal incapacity and (a) is on the last day of the qualifying period occupying as *owner* or *tenant* land or premises in the electoral area, and (b) has during the whole of the qualifying period occupied as *owner* or *tenant* any land or premises in that area, if that area is not an administrative County or a County borough, then in any administrative

(County or County borough in which the area is situated, or (c) is the husband or wife of a person who is entitled to be registered in respect of premises in which the person entitled and the husband or wife reside. There is also a *service qualification* for the Local Government franchise. A person (man or woman) who inhabits any dwelling house by virtue of any office, service or employment is deemed to occupy the dwelling house as *tenant* and so obtains the Local Government franchise provided the dwelling house is not inhabited by the employer.

REGISTRATION

Each parliamentary borough and Parliamentary county is an electoral registration area and for each registration area there is a Registration Officer. Normally, the Town Clerk is the Registration Officer for the Parliamentary Borough and the Clerk to the County Council for the Parliamentary County. It is the duty of the Registration Officer to compile the register of all persons entitled to vote as parliamentary electors in local government elections in his area. It is also his duty to comply with any directions given by the Secretary of State as to the arrangements to be made by the Registration Officer in carrying out the registration.

The electoral lists when prepared are published by the Registration Officer. A copy can always be inspected at his office and generally at the chief post offices and other convenient places in the area including Church Porches, Public Libraries, and Local Council Offices. The lists should be examined to see if the entries have been correctly made. If not, claims and objections may be made as by notice directed.

The Index letters showing the nature of the qualifications of an elector are —

FOR MEN

- R = Residence qualification
- B = Business premises qualification
- O = Occupation qualification
- D = Qualification through wife's occupation
- NM = Naval or military voter

FOR WOMEN

- Rw = Residence qualification
- Pw = Business premises qualification
- Ow = Occupation qualification
- Dw = Qualification through husband's occupation

RIGHT TO VOTE

Every person registered as a parliamentary elector is entitled to vote at an election of a member to serve in Parliament. But at a *General Election* a person shall not vote for more than one constituency for which he or she is registered by virtue of a residence qualification or for more than one constituency for which he or she is registered by virtue of other qualifications of any kind which means that a person (man or woman) may if qualified lawfully vote twice at a General Election, but one vote must be in respect of a residence qualification, and each vote must be recorded in a different constituency.

ILLEGITIMACY AND LEGITIMATION, ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish,

and the Justices on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding one week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. An unmarried domestic servant found to be pregnant may be peremptorily dismissed without notice but any attempt to examine without her consent a servant supposed to be pregnant renders the employer liable to an action.

LEGITIMATION — By the *Legitimacy Act 1926* which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry or have married whether before or after that date, the marriage if the father is at the date thereof domiciled in England or Wales, renders that person, if living legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born.

How to Secure Legitimacy — A person claiming that he, his parent, or any remote ancestor has become legitimated, may petition the High Court under the *Legitimacy Declaration Act, 1858* or the County Court for the necessary declaration.

Rights of Legitimated Persons to take Interest in Property — A legitimated person may take property under an intestacy occurring after the date of legitimation or under any disposition (e.g. a will) coming into operation after such date, as if he had been legitimate.

Rights and Duties of Legitimated Person — He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Persons Legitimated by Ecclesiastical Law — Broadly speaking, the Act provides that persons properly legitimated abroad shall be recognized as legitimated in England and Wales.

SCOTLAND.

Illegitimate Children (Scotland) Act, 1930 — The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually is in the Sheriff Court. Where in any action of affiliation and aliment the Court finds that the defender is the father of the child, the Court shall in awarding any sum in name of alimony expenses, or in name of aliment, have regard to the means of the pursuer and the defender, and the whole circumstances of the case. The Court may upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody

of such child and the right of access thereto of either parent having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by international law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

JURY SERVICE

Preliminary. The juries with which the public are most concerned are the grand juries summoned to try causes in the High Court at assizes and county courts and those summoned to try criminal cases at assizes the Old Bailey and courts of Quarter Sessions and coroners' juries.

Qualifications. All natural born subjects of the King and aliens domiciled for ten years or more, being men or women between 21 and 60 are liable to serve as jurors.

The sex disqualification was removed in 1929 and women are now liable to serve, but a judge may order that the jury shall be composed of men only or of women only or may on an application made by a woman, grant her exemption in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried.

The qualification of a juror is a *property* one—that is to say he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100, a resident in a county or borough owning £20 a year in real estate or rent charge or £50 in leaseholds or a householder in a county or borough occupying property whose net annual value is assessed at not less than £30 a year in Middlesex and the County of London or £20 in other counties and occupiers of houses with not less than fifteen windows are all compellible to serve as jurors unless exempted or disqualified.

Exemptions and Disqualifications. Aliens (subject as above) felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of Protestant dissenters and Jews whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs, officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents &c., of lunatic asylums, doctors and pharmaceutical chemists (if actually practising), dentists, officers and men in Navy, Army, Air and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

Special exemption.—A judge and by virtue of § 3 of the Juries Act 1922 the sheriff may for good reason excuse attendance on any particular jury.

Jury Lists. Lists of juries are now prepared in accordance with the Juries Act 1922, the names of persons apparently qualified as jurors being so marked on the Electors Lists (exhibited at Town Halls, Public Libraries in church pews, &c.). Persons who deem themselves to be entitled to be exempted should communicate with the registration officer for all those names appear on the Jury List as finally settled are liable to serve.

Grand Juries.—The function of the grand jury is to make presentments on oath to judicial bodies or personages mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *prima facie* case against the accused against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill" if not they "ignore the bill" and the accused is discharged.

Juries in Criminal and Civil cases.—An accused person against whom a true bill has been found is tried by a jury sworn. A panel of jurors are summoned to attend the court on a particular day and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England* Vol 28 p 246). In a criminal case the prisoner has a right of challenge which is of two kinds: a challenge to the array, i.e. the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, i.e. to individual jurors which may be peremptory or for cause. Peremptory challenge or challenge without cause exists only as of right in treason and felony and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury (challenge for cause sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous).

Except upon trials for murder, treason and treason felony juries after being sworn may separate e.g. for lunch and at night the verdict must be given in open court in the presence of all the jurors and in cases of treason and felony in the presence of the defendant. It must be unanimous except that in civil cases the parties may agree to take a majority verdict.

Special Juries.—Special Jurors are selected from persons having larger property qualifications e.g. the occupier of dwelling house in a large town rated at not less than £200. Trial is generally by Common Jury but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

Payment of Jurors.—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 2s on each case tried in the High Court or a County Court and on Circuit, 8d. In Criminal cases the jury is entitled to and in fact receives nothing. At Inquests held before Coroners the jurors are

entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £10 while non appearance at a county court may involve a fine of £5.

Coroners Juries — (See Deaths — Coroners and Inquests page 344)

LEGAL AID FOR THE POOR

Civil Cases

A system now exists for giving legal aid to poor persons in civil proceedings—including divorce administered by the Law Society (Chancery Lane W.C.), and through various Provincial Law Societies. Under this system committees are now established throughout England and Wales. Any one desiring this form of aid may apply to the nearest Poor Persons Committee for a Poor Persons Certificate, and if this is granted a solicitor and counsel will be allotted to act without remuneration. The certificate can be given if the poor person is not worth £50 (excluding wearing apparel and trade tools) and the usual income does not exceed £a week. In special circumstances above figures may be £100, and £4 a week. The committee may require the poor person to deposit a sum not exceeding £5 (in the first instance) to cover out of pocket expenses of the conducting solicitor.

Divorce proceedings under the Poor Persons system may be commenced at the Divorce Registry in London or in one of the numerous District Registries in the Provinces now authorized for the purpose and the trial or hearing may be in London or at the Assize at one of the many towns at which Divorce business may now be taken under the Rules of the Supreme Court.

Criminal Cases

The Poor Prisoners Defence Act 1930 provides for free legal aid in criminal proceedings in specified cases and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an *Indictable offence* the person charged may have free legal aid if Justice or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient such Certificate may be granted in cases where desirable and must be given for a murder charge. In Courts of Summary Jurisdiction assuming insufficient means a Defence Certificate may be granted to a person if considered desirable to do so owing to gravity of charge or exceptional circumstances.

Scotland—In every town there are Solicitors for the Poor and in the Court of Session there are counsel for the Poor all of whom act gratuitously. Any class of litigation may be undertaken for poor persons but the operation of the Poor's Roll is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation in summary application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed, and each application depends on its own circumstances. The Poor's Roll was established in 1454.

MARRIAGES.

BY BANNS OR LICENCE

BANNS OF MARRIAGE—The Marriage Act, 1863 prescribes audible publication according to the rubric on three Sundays preceding the ceremony after the second lesson. While the parties reside in different parishes the banns must be published in both the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. Under the Marriage Measure 1930, banns may be published and marriage solemnized in the parish church which is the usual place of worship of the persons to be married or either of them although neither of such persons dwells in such parish, but this publication of banns is in addition to any other publication required by law. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the place in England in which the party resides and according to the custom in Scotland in the place where the other party reside. It may be noted that by Scottish law only omission to publish the banns does not invalidate the marriage because it would still stand as an irregular marriage carried out by consent before witnesses (see sub tit. Marriages in Scotland post). The names by which the parties are known are sufficient for publication of banns so that a variance from the strict baptismal name is not important. Where wrong names are designedly given for the purpose of concealment or otherwise the case is different and the marriage may be null and void (*Widdows v Wood* 30 1 J (P.M.A.) 57) but if a wrong and fraudulent name is given by one party and the other party is innocent the validity of the marriage is not affected.

After the lapse of three months from the last time of publication the banns become useless, and the parties must either obtain a licence or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age or that the consent of parents is obtained and it is usually on the score of insufficiency of age that banns are forbidden. By the Marriage Act 1836 a marriage may be performed in church on the superintendent registrar's certificate without banns provided that the incumbent's consent is obtained. One of the parties must be resident within the Ecclesiastical parish of the church in which the marriage is to take place.

MARRIAGE LICENCES are of two kinds—(a) a Common or Ordinary Licence dispensing with the necessity for Banns granted by the Archbishops and Bishops through their Surrogates for marriage in any church or chapel duly licensed for marriages; (a) a Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 264). It is a *plenary* for any clergyman to marry the parties in the absence of banns or licence and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By virtue of the Marriage Act 1866 the hours for marriage are now from 8 a.m. to 3 p.m.

GENERAL NOTE—The minister should be careful that there are two or more witnesses

present and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may refuse to marry a divorced person whose marriage has been dissolved for his or her adultery but must allow another clergyman of the diocese to perform the service.

A MARRIAGE CERTIFICATE is nothing more than a copy of the entry in the church register, and the customary fee is 2s 6d and a stamp duty of 2d. Searches in the register books may be made on payment of small fees viz 2s for a single year and 6d additional for every other year. There are small fees, regulated by custom on the certificate given of banns in one parish for marriage in another. MARRIAGE FEES are not uniform and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it it is usual to pay a guinea to the clergyman and 5s to the clerk and the usual fees are paid although a stranger clergyman be invited to perform the service.

INFANTS cannot be lawfully married without the consent of certain persons (vide Guardianship of Infants Act 1925, s. 9 and Schedule). Where both parents are living both must consent, where one is dead, the survivor or if there is a guardian appointed by the deceased the guardian and the survivor. The Age of Marriage Act 1929 prohibits any marriage where either party is under 16 years of age.

MARRIAGE LICENCES FOR ESTABLISHED CHURCH

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office (23 Knight Rider St. Doctors Commons E.C. 4) at the Vicar General's Office (2 The Sanctuary Westminster W. 1) and at the Bishop of London's Diocesan Registry (2 Deane Court, Doctors Commons E.C. 4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishop's Registrars but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued. Those procured at the Faculty Office are available for London and all England and Wales; those procured at the Vicar General's Office (hours in both offices 10 to 4, Saturdays 10 to 2) are available for London and all England except the Province of York. No instructions either verbal or in writing can be received except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married and the licence is delivered to the party upon payment of fees amounting to thirty shillings in addition to the cost of stamp 2s 6d. No previous notice is required and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies according to the diocese from £2 15s to £2 10s 6d. By the 4th George IV c. 76 it is enacted in order to avoid fraud and collusion in obtaining licences for marriage that before any such licence be granted one of the parties shall make an affidavit that there is no legal impediment to the intended marriage and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence.

within the parish or ecclesiastical district in the church of which the marriage is to be solemnized. In the country there may generally be found a parochial clerk (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some Dioceses it is necessary for the Surrogate to procure the licence from the Bishop's registry.)

A licence continues in force for three months from its date.

SPECIAL LICENCES are granted by the Archbishop of Canterbury under special circumstances for marriage at any place with or without previous residence in the district (1) at any time &c. but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knight Rider Street, Doctors Commons E.C. 4 (tel. 6834 Central). Fees for licence stamp &c. 5s.

BEFORE A REGISTAR AND IN NON CONFORMIST BUILDINGS

Marriages can take place in a District Registrar's Office or in a Nonconformist building registered for marriages (a) by Certificate (a) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages or the deputy of such officer. A marriage at a registered office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar at a marriage at a registered building, takes place in the presence of the Registrar of Marriages unless it is held under the provisions of the Marriage Act 1928 respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE

If both parties reside in the same registration district they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification the notice must be given in the district in which the residence has been fulfilled and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE)

After the lapse of twenty one clear days from the date of the entry of the notice in the notice book the Superintendent Registrar may, provided no impediment is shown issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice

ISSUE OF CERTIFICATE AND LICENCE

After the lapse of one week day (not Christmas Day or Good Friday) from the date of entry of the notice the Superintendent Registrar may, provided no impediment is shown issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE

(a) Marriage by Certificate —

- a If both parties live in the same district — The certificate of the Superintendent Registrar of that district
- b If they live in different districts — A certificate from the Superintendent Registrar of each district

(a) Marriage by Licence — The certificate and licence of the Superintendent Registrar of the district in which the notice is given

PLACE OF MARRIAGE

The marriage must generally take place at a building within the district of residence of one of the parties but if the usual place of worship of either is outside the district of his or her residence it may take place in such usual place of worship provided that it is not more than two miles distant from the boundary of the district in which the notice is given and if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong it may take place in a registered building of the required denomination in the nearest district

MARRIAGE CEREMONY

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m. with open doors Each of the parties must declare as follows

I do solemnly declare that I know not of any lawful impediment why I & B may not be joined in matrimony to C & D and each of the parties must say to the other I call upon these persons here present to witness that I & B do take thee C & D, to be my lawful wedded wife [or husband] A wedding ring may be, and is generally, used at a marriage at a register office

MARRIAGE ACT, 1898

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act The Act (which does not apply to Scotland or Ireland or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an authorised person (a person usually the minister or an official of the building testified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage If the presence of a Registrar is required at a

marriage at a building at which the provisions of the Act have been adopted the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained

The parties must at some time during the ceremony make the following declarations —

"I do solemnly declare that I know not of any lawful impediment why I & B, may not be joined in matrimony to C & D

Also each of the parties must say to the other

I call upon these persons here present to witness that I & B do take thee C & D, to be my lawful wedded wife [or husband]

I & B do take thee C & D, to be my wedded wife [or husband]

FEES OF SUPERINTENDENT REGISTRAR

For entering notice of a marriage by certificate in the marriage notice book	1 0
For entering notice of a marriage by licence in the marriage notice book	1 0
For a certificate for marriage without licence	1 0
For a certificate for marriage by licence	1 0
For a licence for marriage	30 0
Stamp duty on a licence for marriage	10 0
For a marriage by certificate in the presence of a Registrar	5 0
For a marriage by licence in the presence of a Registrar	10 0
Exclusive of the fee for a certificate of the marriage ("marriage lines") the total fees for a marriage by certificate when the parties live in the same district amount to 7s if they live in different districts 11s 6d	
For a marriage by licence the total fees are	£s 12s 6d

NAVAL MARRIAGES ACT 1908

Any officer seaman or marine borne on the books of one of His Majesty's ships at sea who wishes to marry may if the marriage is to take place at a register office or a Nonconformist registered building give notice to his commanding officer who after the lapse of twenty one clear days can issue a certificate for the marriage The other party must give notice in the usual way to a registration officer in the district in which she resides

If the marriage is to take place by ceremony of the Church of England the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays he can then issue a certificate of publication of banns The banns must also be published in the church in which the marriage is to take place

No marriage by licence can take place under this Act

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES

"Naval Military and Air Force Chapels — The use of such Chapels for solemnization of marriages either according to the rites of the Church of England or otherwise and for the publication of Banns Act is now regulated by the *Marriage Act* (Naval Military and Air Force Chapels) Act 1932

In Wales and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh as provided by Section 23 of the *Marriages and Registration Act, 1837*

If both parties are *Jews*, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling house at any hour the marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (*Quakers*), or if not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting house, the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

Relaxations have been made by *Marriage (Prohibited Degrees of Relationship) Acts 1907 to 1932*, which successively permitted the following marriages, —

With a deceased wife's sister	Act—1907
" deceased brother's widow	Act—1908
" deceased wife's brother's daughter	Act—1932
" deceased wife's sister's daughter	do
" father's deceased brother's widow	do
" mother's deceased brother's widow	do
" deceased wife's father's sister	do
" deceased wife's mother's sister	do
" brother's deceased son's widow	do
" sister's deceased son's widow	do

No clergyman can be compelled to solemnize any of the foregoing marriages but he may allow his church to be used for the purpose by another minister.

During the lifetime of a person upon whose *deceased* a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for such a marriage to be contracted.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days should apply to the session clerk to publish banns, as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1893. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

- That both parties are British subjects, or,
- If only one of the parties is a British subject, that the other is not a subject or citizen of the country, or,
- If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country, or,
- If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

- That the marriage will be recognized by the law of the country to which the foreigner belongs, or
- That some other marriage ceremony in addition to that under this Act has taken place or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs, or,
- That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the Act.

It is necessary for one of the parties to the intended marriage to sign a notice stating the name surname, profession (condition and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom or (b) in a colony or India (a) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars,

and in Scotland must be given by proclamation of banns, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor General of India in Council, or in like manner as if the party were about to be married in that place.

If the non resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

- (a) that he or she believes that there is no impediment,
- (b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding or if they have not both resided there during three weeks then that one of them has so resided and stating the place where the party who has not so resided has within three months immediately preceding had for three (or in five weeks his or her usual place of abode and the notice that has been given in that place or if neither party has resided there stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered then if no lawful impediment to the marriage is shown and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district, two or more witnesses are required to be present.

The following fees for marriages under the

Foreign Marriage Act are payable to His Majesty's Government —

For receiving notice of an intended marriage	£ s d
For receiving notice of a caveat	0 10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	1 0 0
For certificate by a Marriage Officer of notice having been given and posted up in case of one of the parties residing outside the consular district in which the marriage is to take place	0 5 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1 0 0

Marriages may be solemnized 8 a.m. to 3 p.m. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorized Marriage Officer is however necessary to render the marriage valid. If the ceremonial be that of the Church of England it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are in the absence of any treaty stipulations strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid v Braid* 1899 25 11 E 646).

Marriages may also be solemnized under the "Foreign Marriages Act 1895" before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF 1906 — Under the *Marriage with Foreigners Act, 1906* any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by rite which is valid by the law of the domicile in a foreign country will be

recognised as valid by the English courts (*re Green Noyes v Putkin*, 1909, 25 F.L.R. 222)

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 24 years of age and a female over 21. Marriages may be 'regular' or 'irregular'.

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 95 days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk, Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s 6d. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878 a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate. *Sec. 2.* 6d. Such certificate of publication is only valid for three months. Under the Naval Marriages Act 1908 banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in medieval times. Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages. Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de presenti*), (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise *subsequente copula*) the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*) i.e. the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland). *Green Noyes* marriages were abolished in 1896 by the Act 19 and 20 Victoria, Chap. 96.

Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5s 2d. The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

MOTOR LAW

The modern Charter of Motor Law is the Road Traffic Act 1930 and Regulations made thereunder by the Minister of Transport. This Act not only consolidated the law by repealing some thirty earlier Acts but made numerous amendments and new provisions to keep abreast with the rapid development and modern universal use of motor vehicles. The following provisions of the law have been selected for special reference in these notes.

Driving Licence. As to fee &c. see p. 650. No person to drive without a licence nor employ a person to drive who is not licensed. To be produced to police on demand, but no conviction if licence produced at a police station within five days. On application for licence a declaration must be made as to any physical disability &c. certain disabilities will involve refusal of licence.

Speed Limits. The Act prescribes Speed Limits for various classes of Motor Vehicles but for ordinary passenger motor cars (adapted to carry not more than seven excluding driver) there is now no speed limit. But heavy penalties may be incurred for driving recklessly or at a speed or in manner dangerous to the public having regard to all the circumstances, nature and condition of road, amount of traffic at the time &c.

Pillion Riding.—Only one person (pillionaire) on a motor cycle in addition to driver and then only on proper seat securely fixed behind the driver.

Third Party Insurance. No person may use or permit to be used a motor vehicle unless covered by a Policy of Insurance in respect of third party risk. There is to be a 'certificate of such insurance' and this certificate of insurance must be produced by a driver to a constable on demand. Under the Regulations of Transport Ministry an applicant for a car licence under the Finance Acts must with his application produce to the Licensing Authority his Certificate of Insurance.

Highway Code. The Minister of Transport has compiled a Highway Code as authorised by the Act. It is issued with driving licence and copies may be obtained from H.M. Stationery Office or booksellers, price 2d. The code is intended as a guide to persons using the road and may be revised from time to time. Failure to observe any provision of the code is not an offence of itself, but it may be relied on as tending to establish or negative the liability of

a party in any proceedings—whether civil or criminal.

Accidents—In the case of an accident causing damage to any person, vehicle or animal, the driver of the motor vehicle must stop and on request of any person having reasonable grounds for so requiring give his name and address and identification of his vehicle. If this is not done on the spot then the accident must be reported at a police station or to a constable as soon as possible and in any case within 24 hours.

Reflecting Mirrors—Every motor vehicle but not motor cycle, must now be fitted with a reflecting mirror.

PASSPORTS

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application) and enclosed in a cover addressed to The Passport Office, 1 Queen Anne's Gate Buildings, Dartmouth Street, Westminster S.W. 1, or to The Branch Passport Office, 36 Dale Street, Liverpool. The charge for a Passport is 2s. Passports are issued in London between the hours of 10 and 4 (Saturdays 10 to 1) and in Liverpool 9.30 to 4 (Saturdays 9.30 to 1). The Passport Offices are closed on Sundays and Public Holidays (except in London between the hours of 10 a.m. and 1 noon for cases of *special emergency only*). Passports may be obtained through the post if a Postal Order for 2s., which should be crossed, made payable to the Passport Office, is forwarded with the application. Cheques, Treasury notes or postage stamps should not be sent in payment. Application should, if possible, reach the Passport Office not less than five days before that on which the Passport is required.

Foreign Office Passports are granted (1) to natural born British subjects, (2) to the wives and widows of such persons, and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

The wife of an alien is deemed to be an alien.

Passports are granted (1) in the case of natural born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations verified by a Declaration made by a member or official of any Banking Firm established in the United Kingdom, or by any Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister at Law, Physician, Surgeon, Solicitor, Notary Public or Chartered Accountant, resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers. (2) in the case of children under the age of 16 years requiring a separate Passport upon production of a Declaration made by the child's parent or guardian in a Form (B) to be obtained upon application to the Passport Office. (3) in the case of persons naturalised in any of the British self governing Dominions upon production of a letter of recommendation from the High Commissioner or Agent General in London of the State concerned. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a British subject by naturalisation the Certificate of Natu-

ralisation must be forwarded to the Passport Office with the Declaration or letter of recommendation. British subjects by naturalisation will be described as such in their Passports which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named thereon but may be endorsed for additional countries. The possession of a Passport so endorsed does not however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries or from the necessity of obtaining a visa where required.

Passports endorsed as valid for the British Empire are also available for travelling to territory under British protection or mandate not, however, including Palestine or Iraq, for which countries special endorsements must be obtained.

Foreign Office Passports are available for five years from the date of issue unless otherwise stated. On the expiration of their period of validity they may be renewed for further consecutive periods of one to five years. In no circumstances are they available beyond ten years from the date of issue thereafter, or if at any time the Passport contains no further space for visas, application must be made for the issue of a new Passport.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad. Such person should apply in a foreign country to the nearest British Mission or Consulate, or, within the British Empire to the nearest Passport Issuing Authority.

Persons resident in the Irish Free State should make application for their Passports to the Passport Department, Ministry of External Affairs, Dublin.

CERTIFICATION OF PHOTOGRAPHS

Note—It is essential that one of the two photographs of the applicant (and wife if he be included on the Passport) should be certified on the back as shown on the Application Form.

Safe Custody of Passports.

Passports, when not in use should be kept in a secure place. At the expiration of the period of validity a Passport should be returned to the Passport Office.

PAWNBROKERS' REGULATIONS

For the TICKET

On goods pledged for 10s. or less 3d
On goods pledged for more than 10s. 2d

Note—In addition to the above, an additional charge of 1d for each 5s. or part of 5s. lent is authorized (*Pawnbrokers' Act, 1928*).

For INTEREST—

On pledges not exceeding 40s. for every 10s. or part of 10s., per month 3d

On pledges exceeding 40s., for every half crown or part of half a crown per month 1d

And after the first month any time not exceeding 14 days to be charged as half a month.

REDEMPTION—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10s. if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny and receive any surplus produced by the sale. Should there be a deficit, the pawner or the person producing the ticket is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawn broker against surplus on another.

If any pledge is destroyed or damaged by fire the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—i.e., the loan and profit and 25 per cent on the amount of the loan.

If any ticket is lost, mislaid or stolen the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s or under the charge on form of declaration is one halfpenny when the loan is above 5s, one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s provided that—

(1) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn ticket signed by the pawnbroker.

(2) The duplicate of the special contract pawn ticket shall be signed by the pawner.

The pawnbroker may also charge—For ticket profit per calendar month, for storage of the pledge and payment to inspect account of sale such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale and loss of ticket as in the case of ordinary pledges for more than 20s.

POOR LAW

The Poor Law in England and Wales is now administered through Public Assistance Committees, constituted for Counties and County Boroughs, which take the place of the old Boards of Guardians. The law is consolidated in the Poor Law Act, 1930.

RECEIPTS

RECEIPTS should be kept for six years from the date of payment after which period no action can be brought concerning the goods &c. received.

VACCINATION

In England and Wales vaccination is compulsory within six months from birth, the obligation to comply with the law being imposed on the parent or other person having custody of the child. The local Public Vaccinator (appointed in the local authority) will be of charge. Penalties are incurred in default of compliance with the law, which may be obtained if a parent,

within four months from the birth, makes a declaration that he conscientiously believes that vaccination would be prejudicial to the health of the child.

WARD OF COURT

By appropriate legal process an Infant may be made what is termed a Ward of Court in the Chancery Division of the High Court. In this way judicial control of the Infant may be secured the court assuming and exercising wide powers in respect both of the person and property of Wards of Court. Legal advice will obviously be necessary as to the circumstances in which an order might be made in any particular case.

WILLS

REASONS FOR MAKING A WILL. Every man having a wife and family should make his will. However small his estate it is an imperative duty in most cases and is safer in every case to protect the interest of the survivors by a will and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate having foolishly put off making a will until it is too late their negligence may deprive those for whom they were most anxious to provide. The help of a lawyer in making a will is not in every case essential but it is always advisable particularly where there is a dispute on a testator's part to provide for his property being settled as it is called, or the income being paid to his widow and the capital being ultimately divided among his children for this requires the skill of a practised lawyer. Assuming, a lawyer is not employed a person having resolved to make a will must not regard it as a light matter to be got rid of in a few minutes but one demanding the most serious attention. It is only after a person is dead and cannot explain his meaning, that his will can be open to dispute. It is the most necessary therefore to express what is meant in language of the utmost clearness avoiding the use of any word or expression that admits of another meaning than the one intended. It is better to be prolix than to leave the smallest room for doubt or uncertainty although the same name or word be often repeated. Sounding phrases are entirely out of place. Avoid the use of legal terms such as *heirs* and *issue* when the same thing may be expressed in plain language. If in writing the will a mistake be made it is better to rewrite the whole. Before a will is executed that is *signed by the testator in presence of two witnesses* an alteration may be made by striking through the words with a pen but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate it is better to make a new will revoking the old one or to add a codicil to the first which must be duly executed and attested in the same manner as the original will. A will should be written in ink and very legibly on a single sheet of paper. Although of course forms of wills must vary to suit different cases the following directions may be found useful to those who, in cases of emergency are called upon to draw up wills either for themselves or others—

TESTATOR OR TESTATRIX—The person who makes the will is the testator, or if the will maker be a woman, the testatrix.

ESTATE—By this word is to be understood property of all kinds both real and personal. Real property includes tithes and advowsons as well as freehold land and houses, while personal property includes debts due arrears of rents money, leasehold property, house furniture goods assurance policies stocks and shares in companies and the like.

RESIDUARY LEGATEES—It is well in all cases to leave to some person or persons the residue of my estate and effects, although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

TO BEGIN A WILL A form in which a will may be commenced is—This is the last will of me Thomas Smith of Vine Cottage, Silver Street Reading in the county of Berks.

TO END A WILL—After disposing of the property, the will may be ended as follows. And I hereby appoint the said — sole (or joint) executor(s) of this my Will and I revoke all former wills and codicils. Dated this — day of — 19—

EXECUTION OF A WILL AND WITNESSES The testator should sign his name at the foot or end of the will in presence of two witnesses who will immediately sign their names in his and in each others presence. A person who has been left a legacy or share of residue in the will or whose wife or husband has been left a legacy should not be an attesting witness. Then attestation would be good but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses provided neither is a legatee. If a solicitor be appointed executor it is lawful to direct that his ordinary fees and charges shall be paid but in this case he (as an interested party) must not be a witness to the will.

Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient.

I sign by the testator for testatrix is the case may be] in the presence of us both present at the same time with him [her] presence and in the presence of each other have hereunto set our names as witnesses.

William Jones of Vine Cottage Silver Street Reading 1st Mar. Henry Morgan of North Street Reading 1st Mar.

It is desirable that the witnesses should be fully described as they may possibly be wanted at some future time. If the testator should be too ill to sign even by a mark another person may sign the testator's name to the will for him in his presence and by his direction and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded. Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same.

If the testator be blind the will should be read aloud to him in the presence of the witnesses and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present then the attestation should be. The testator acknowledged his signature already made as his signature to his last will and testament in the joint presence, &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

CODICIL—When any change is required to be made in the disposition of property as stated in the will the change should be embodied in a codicil. A codicil should begin—This is a codicil to the will of me Thomas Smith of Vine Cottage Silver Street, Reading in the county of Berks the said will bearing date &c. A codicil must be dated at the end and signed and witnessed with exactly the same formalities as the will.

EXECUTORS It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full as follows. I appoint John Jones of number twenty one London Street Ipswich and Edward Matthews of number seventeen Market Street Lincoln executors of this my will. An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor or one of two executors. The addresses of the executors are not necessary but it is desirable here as elsewhere to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES The form of appointment of executors will also serve when the estate is left in care of trustees except that the persons should be designated executors and trustees. The Public Trustee may be appointed executor or trustee of a will. See PROBATE LITIGATION post.

TRUSTS OF THE WILL When the estate is wholly for the children the will may read after the appointment of the executors and trustees.

I give and devise all my estate and effects real and personal of which I may die possessed or entitled to unto the said John Jones and Edward Matthews upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death such last mentioned children or child to take the share or shares which their parent would have taken if living at my death and so that no grandchild of mine shall take whose parent is living and capable of taking. Where the widow is to have a life interest use the following words upon trust for my wife during her life (or during her widowhood) and after her death (or second marriage, which first happens) upon trust in equal shares for all or any my children or child &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY.—A minor cannot make a will. A married woman (married since January 1, 1863) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (2)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1906, it is expressed to have been made in contemplation of marriage (Law of Property Act 1925 s. 277), so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of test due lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1890, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

DUTY OF EXECUTORS.—After the death of the testator, the duties of the executor are briefly as follows:—The first duty of the executor, or of one of them, is to see that the funeral takes place in a suitable and becoming way, then to make lists of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. (For scale of duty see Index, "Estate Duty.") Under the

Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Principal Probate Registry, Somerset House, or to the local District Probate Registry, or to a solicitor, and prove the will. Collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. All the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act; one alone is competent to prove a will and carry out its provisions. In small estates probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before Jan. 1, 1863, the date on which the Court of Probate Act, 1867 (26 & 27 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Probate Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1863 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1863 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date, the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year. The reader may not copy any part of the will except the

names and addresses of the executors and the date and private number of the will. If he desires a copy he can order one to be made, for which he will pay according to the length of the will at the rate of sixpence a folio (ninety words) for an ordinary copy and ninepence a folio for a certified copy which can be produced and read in any court of law. The 29 District Probate Registries established by the Act of 1897 are at Bangor Birmingham Blandford Bodmin Bristol Carlisle, Carmarthen Chester, Durham Exeter, Gloucester Ipswich, Lancaster, Leicester Lewes Lincoln Liverpool Llanelli, Manchester Newcastle upon Tyne, Norwich Nottingham Oxford Peterborough Shrewsbury, Taunton Wakefield, Winchester York.

SAFE CUSTODY OF WILLS

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited personally or through the Registrar of a District Registry who will transmit the will to London in a registered letter. The fee is 2s. with an additional 5s. if forwarded by a District Probate Registrar. A will once deposited will not be given up to anybody but must remain in the Registry until the testator dies. Any will appointing the Public Trustee as Executor may be deposited with him for safe custody (*see PUBLIC TRUSTEE post*).

PROBATE OF WILLS

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR

The entrance to the office for personal applications is in the south east corner of the Quadrangle of Somerset House Strand Room 44. The applicant should bring the registrar's certificate of the death of the deceased or an official certificate of burial and the will if there be one and full details of the property and debts of the deceased.

If there be no will or no executor be appointed or the executor will not act two sureties must be obtained to enter into a bond for the faithful administration of the estate unless the whole personal estate does not exceed £500 when one surety only will be required. They need not attend upon the first visit.

In no case can any correspondence be entered into nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Application may be made at a District Probate Registry instead of at Somerset House.

Where the whole real and personal estate without the deduction of debts or funeral expenses does not exceed £500 application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will and the whole personal estate does not exceed £500 the widows or children if residing at more than three miles from any Probate Registry may apply to the Registrar of the County Court.

Scotland.—Confirmation is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in

the commissariat of Edinburgh. Executors are either nominate or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (s) in the case of intestacy or (a) where the deceased had failed to name an executor in his will. In the former case the deceased's next of kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 200 Scots (£26 6s. 8d. sterling)). A will may be either (x) *holograph*, written by the testator himself in which case no witnesses are necessary, (a) *testis* which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session in the Central Register House Edinburgh for preservation. The original deed may be inspected in the Central Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

TRUST FUNDS AND INVESTMENTS.

By the *Trustee Act, 1925* (which came into force on Jan. 1, 1926) a trustee may invest trust funds in (a) any parliamentary stocks or Government securities of the United Kingdom, (i) on real or heritable securities of the United Kingdom, (c) in stock of the Bank of England or Ireland, (f) in India 7½, 4½, 3 and 2½ per cent stock or other stock issued by the Secretary of State for India charged on Indian revenue, (j) in securities the interest of which is guaranteed by Parliament, (f) in Consolidated Stock of the Metropolitan Board of Works or of the London County Council or Debenture Stock of the Receiver of Police or Metropolitan Water Stock, (g) in Debenture Guaranteed Preference Stock of any railway in the United Kingdom incorporated by special Act and having paid a dividend of not less than 3 per cent on its Ordinary Stock for 10 years, (h) in United Kingdom Railway Stock when the railway is leased in perpetuity to any railway such as that mentioned in (g) *supra*, (i) in Debenture Stock in Indian Railways, (j) in 'B' annuities of the

Eastern Bengal East Indian, the Scinde, Punjab and Delhi Great Indian Peninsula and Madras Railways and in Deferred Annuities in the register of holders of Class D Annuities comprised in the register Class C of the East Indian Railway Company, (b) in the stock of any Indian railway upon which a fixed or minimum dividend is guaranteed by the Indian Government, or upon the capital of which the interest is so guaranteed (c) in the Debenture or Preference Stock of any Water Company supplying water for profit and incorporated by special Act or Royal Charter which has paid a dividend of not less than 5 per cent on Ordinary Stock for 25 years, (m) in the nominal or Inscribed Stock of any Municipal Borough in the United Kingdom having a population of more than 50,000 or of any County Council (n) in the Nominal or Inscribed Stock of any commissions supplying water by statute and having power to levy rates over an area embracing not fewer than 50,000 persons provided the rates for 25 years have not exceeded 80 per cent of the amount authorised to be levied (o) in Stocks authorised under the Colonial Stock Act 1900 (p) in local bonds issued under the Housing (Additional Powers) Act 1929 (q) in any Stock or Securities issued in respect of any Government loan in Northern Ireland (r) in Stocks &c authorised for the investment of cash under the control of the Court. All such investments may be varied. As regards railway investments the I & N F Ry the S Ry the L M & S Ry and the G W Ry are to be treated as if they were a company which had in each of the ten years before amalgamation paid a dividend of not less than 3 per cent on its Ordinary Stock. All the Stocks above mentioned may be purchased although they are redeemable and the price exceeds the redemption value but as to the investments in paragraphs (g) (i) (k) (l) (n) (o) (j) and (j) *supra* if any of them is liable to be redeemed at par or at some other fixed rate a trustee may not purchase (g) at a price exceeding 15 per cent above par or such other fixed rate nor (l) if the stock is liable to be so redeemed as at 1901 within 15 years of the date of purchase at a price exceeding its redemption value §§ 3 to 11 of the same Act contain various important provisions as to the rights of trustees in the matter of investing trust monies.

As to the investments permitted by *The Rules of the Supreme Court 1883* see *WHITAKER* for 1927 p. 294 where *The Trusts Amendment Act 1884* (Scotland only) *The Colonial Stock Act 1900* and *The Housing (Additional Powers) Act 1929* are also noted.

THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as executor and as Trustee under a Will or as Trustee under a Settlement whether new or old and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1929, was £3,268,053 6s 4d.

The facts of any trust, new or old in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act his appointment is effected in the same simple way as in that of a private trustee or he can be appointed

by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will. Or the appointment may be a joint one with friends or relations. In the case of a Will already made the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with or without the Will annexed.

The Public Trustee being a permanent trustee the expense of fresh appointments is saved. His integrity is guaranteed by the State while the public demand for his services should ensure a valuable experience and skill in the execution of his office, and a wide knowledge in the work of investment.

As regards investments the Public Trustee like a private trustee is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts or under the general law. See *Trust Funds Act*. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust in simple form are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to defray the expenses of the Department and no more. A profit is not intended.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee Kingsway W.C. (Tel. Holborn 4,300) or at any Post Office.

There is a branch office in Arkwright House Parsonage Gardens Manchester.

WIRELESS RECEIVING LICENCES

HEAVY penalties are prescribed by the *Wireless Telegraphy Act 1904*, on conviction of the offence of establishing a wireless station or installing or working wireless apparatus without the Postmaster General's licence. Licences for receiving broadcast programmes and messages sent for general reception can be obtained at any post office in payment of the fee of 20s.

* Estimated

The succession to the property of a person dying intestate on or after January 1, 1926, is regulated by The Administration of Estates Act, 1925, which repealed the old law and established one new Code applicable both to Real Estate (land, &c.) and Personal Estate (leaseholds, chattels, investments, &c.) The Act abolished the rule of Primogeniture (inheritance by eldest son), the rights of dower (widow's third) and of curtesy (husband's life interest), and all special customs (e.g. gavelkind and Borough English). As to Personal Estate Parents were placed on an equal footing, a mother regained her ancient preference over an intestate child's brothers and sisters, relatives of the whole blood obtained priority over those of the half blood, and relatives more remote than first cousins were excluded from the distribution. "The widow's £500 under the Intestates' Estates Act 1890, was increased to £1,000, whether there be issue or no issue, and given also to a husband, whilst the widow or husband now also takes all the "personal chattels."

TABLE OF EXAMPLES

Important—NOTE—By Section 46 of the Administration of Estates Act, 1925, a surviving husband or wife takes absolutely (i) the "personal chattels" and (ii) £1,000 free of death duties and expenses. The residue is then distributed as indicated in the table.

"Personal chattels" are—Articles of household use or ornament, &c. (not used for business purposes)

In each instance it is supposed there are no nearer relations than those named

If the Intestate leaves

The Estate is distributed as follows—

- | | |
|--|---|
| 1 Widow (or husband) and children | { One half to widow (or husband) for life, and then to children equally. Other half to children equally at once. |
| 2 Widow (or husband), and father and mother | { Widow (or husband) for life and then to father and mother equally. |
| 3 Widow (or husband) and either father or mother not both | { Widow (or husband) for life and then to father or mother absolutely. |
| 4 Widow (or husband), and brothers or sisters of whole blood | { Widow (or husband) for life, and then to brothers and sisters equally. |
| 5 Widow (or husband) and brothers or sisters of half blood | { Widow (or husband) for life, and then to brothers and sisters equally. |
| 6 Widow (or husband) and nephews or nieces | { Widow (or husband) for life and then to nephews and nieces <i>per stirpes</i> . |
| 7 Widow (or husband), and grandparents | { Widow (or husband) for life and then to grandparents equally. |
| 8 Widow (or husband) and uncles or aunts | { Widow (or husband) for life and then to uncles and aunts equally. |
| 9 Widow (or husband) but none of above relations or descendants | { All to widow (or husband). |
| 10 Children and grandchildren (issue of deceased child) | { Amongst children in equal shares the grandchildren taking equally their deceased parent's share. |
| 11 Father and mother | { Father and mother equally. |
| 12 Father or mother not both | { Father or mother. |
| 13 Brothers or sisters of whole blood and of half blood | { Brothers and sisters of whole blood equally. |
| 14 Brothers or sisters and nephews or nieces (children of deceased brother or sister) | { Amongst brothers and sisters in equal shares the children of deceased brother or sister taking equally their deceased parent's share. |
| 15 Brothers or sisters and grandparent | { Brothers and sisters equally. |
| 16 Grandparents paternal or maternal | { Grandparents equally. |
| 17 Grandparent and uncles or aunts | { Grandparent. |
| 18 Uncles or aunts of whole blood and of half blood | { Uncles and aunts of whole blood equally. |
| 19 Uncles or aunts and deceased uncles or aunts' children | { Amongst uncles and aunts in equal shares the children of deceased uncle or aunt taking equally their deceased parent's share. |
| 20 Uncles or aunts and nephews or nieces | { Nephews and nieces <i>per stirpes</i> . |
| 21 Cousins i.e. deceased uncles or aunts' children or grandchildren | { Cousins <i>per stirpes</i> . |
| 22 Any other relation than those named in preceding examples (e.g. great grandparents) and no widow or husband | { The Crown. |

NOTES—The life interest of a husband or wife may be redeemed by payment of a lump sum.

In ascertaining the persons entitled, regard must be had to the rule that the relative must have attained or attained the age of 21 or have married or marry under that age.

Taking *per stirpes* is taking, by descent or representation. Thus in Example 6 nephews and nieces take amongst them the share which their deceased parent would have taken if he or she had survived the Intestate.

Since January 1, 1927, in certain circumstances the mother of an illegitimate child, and an illegitimate child may succeed to real or personal property on the intestacy of the other (Legitimacy Act 1926, s. 9).

I—MOVABLES.

In each instance it is supposed there are no nearer relations than those named

By the Intestate Husband's Estate (Scotland) Act 1912 the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value if over that amount she takes £500 out of the heritable and movable estate rateably before any division is made and after that the share in the remainder to which she was entitled before the passing of the Act

<i>If the Intestate die, leaving</i>	<i>His representatives take in the proportions following —</i>
<i>Widow only</i>	Half to widow, half to next of kin or if none then to the Crown
<i>Husband only</i>	Half to husband, half to wife's next of kin
Widow or husband and child or children by one or more marriages	One third to widow or husband one third to children surviving deceased <i>equally</i> one third to surviving children <i>per capita</i> * and issue of predeceasing children <i>per stirpes</i> *
Widow and father	Half to widow half to father
Widow and mother no father	Half to widow, one half to mother
Widow, brothers or sisters	Half to widow, half equally amongst brothers and sisters whether of the whole or half blood consanguinean If a deceased brother or sister has left issue such issue take amongst them their deceased parent's share
Widow, mother nephews or nieces	Half to widow, one half to mother
Father and mother	Whole to father
Father mother brothers and sisters	Half to father half to brothers and sisters equally
Father and mother and their grandchildren	Half to father half to grandchildren <i>equally per stirpes</i> *
Father brothers and sisters	One half to father one half equally amongst brothers and sisters
Mother brothers and sisters	Mother one half brothers and sisters one half equally
Mother but no other kin	Whole to mother
Child children or grandchildren by deceased children	Amongst children in equal shares the grandchildren by deceased children taking amongst them their deceased parent's share
Brothers or sisters and nephews or nieces	Amongst brothers or sisters in equal shares the children of deceased brothers or sisters taking amongst them their deceased parent's share
Brother or sister and grandfather	All to brother or sister
Brother or sister and uncles or aunts	All to brother or sister
Grandfather no nearer relation	All to grandfather
Father's father and mother's mother	All to father's father
Grandmother uncles and aunts	All to uncle and aunts if paternal
Great grandfather uncles and aunts	All to uncles and aunts if paternal, if not then to paternal grandfather
Uncles and aunts	All equally
Uncle and deceased uncle's child	All to uncle
Uncle by mother's side and deceased uncle or aunt's child	Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle
Aunts nephew and niece	Nephew and niece
Cousins	Equally <i>per capita</i> *
Nephew by brother and nephew by half sister	All to nephew by brother

NOTE A Illegitimate children do not succeed to their father or mother as heirs in intestacy

NOTE B In Scotland a lease on intestacy and in the absence of any destination descends to the heir at law

NOTE C When a person dies intestate leaving heritable estate as well as movables the heir to the heritable if he is also one of the next of kin is not entitled to any of the movables if he takes the heritable. He may however collate the heritable, i.e. share it with the other next of kin and thus get an equal share of the mixed estate

* *Per stirpes* means by the head *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived

II.—HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property wits, other than ' to heirs and successors

In each instance it is supposed there are no nearer relations than those named.

If Intestate die leaving

Heritage would descend to —

(1) Wife only no blood relations	One third to wife for life rest to Crown as <i>ultimus hæres</i>
(2) Wife and child or children and children of a deceased child	One third to wife for life Fee to eldest son or his heir male If no son then to daughters equally The eldest son of a deceased daughter taking his mother's place
(3) Wife and father	One third to wife for life, rest to father
(4) Wife and mother	One third to wife for life Fee to nearest heir male
(5) Wife brother or sister and children of a deceased brother or sister	One third to wife for life Fee to immediate younger brother and his heir male if none then to immediate elder brother
(6) Wife mother, nephews and nieces	One third to wife for life, rest to nephew (eldest) or nieces equally if brother left no son See No 2
(7) Wife mother brother, sisters and nieces (children of deceased brothers and sisters)	One third to wife for life rest to younger brother and his heirs If the only heirs are nieces they will take equally If no younger brother then to immediate elder brother and his heirs in the same way If sisters but no brothers the sisters take equally and if the sisters have predeceased leaving only daughters they succeed equally
(8) No wife or child or issue of a deceased child	to brother as in (5) whom failing to lineal ancestor paternal and his heirs
(9) Children by one or more wives and the issue of deceased children	All to eldest son or his issue If no male issue then to female issue as in (2)
(10) Husband and child or children	Liferent of whole to husband Fee to eldest son
(11) Mother, but no wife or child or issue of a child father brother sister nephew or niece or more distant descendants of father	Nearest paternal collateral (uncle or his heirs) If none, then to grandfather and his heirs
(12) Mother and brothers and sisters	All to youngest brother whom failing to immediate elder brother
(13) Mother and sisters	All to sisters equally
(14) Father and brothers and sisters	Fee as in (5)
(15) Child and grandchild by deceased child	(See No 2) 'Rest to eldest son or his issue under head, Wife and child &c
(16) Brother and grandfather	All to brother
(17) Brother's grandson and his children or sister's daughter	All to great nephew, if grandson of brother (conforming to Nos 2 and 7) All to brother's daughter, if child of eldest brother.
(18) Brother and two aunts	Brother all
(19) Brother and wife	One third to wife for life rest to brother
(20) Grandfather (no nearer)	All to grandfather
(21) Father's father and mother's mother	All to father's father
(22) Grandmother and uncle or aunt on father's side (no nearer)	All to uncle or aunt
(23) Uncle and deceased uncle's child	If deceased uncle was younger brother then to child If both brothers older than intestate then to the younger of them or his heir male
(24) Uncle by mother's side and deceased uncles or aunts' child	Child of deceased uncle on father's side or (if none) child of deceased aunt on father's side
(25) Two aunts' nephew and niece children of deceased brother	Nephew
(26) Uncle or aunts' children and brother's grandchildren through a son	Brother's grandson or if granddaughters between then equally (conforming to Nos 2 and 7)
(27) Nephew by brother and nephew by half sister	Nephew by brother
(28) Nephew by deceased brother and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother

NOTE.—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again

SOLICITORS' CHARGES

These are now usually regulated in conveyancing and non-contentious business by the Solicitors Remuneration Act, 1882, and the Scale thereunder, but the Act allows an option to a solicitor of declining to adopt it. It chiefly relates to sales, purchases and mortgages and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor, s, purchaser, s, or mortgagee's (not mortgagee's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £1,000 is 1 per cent.

It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. Charges are now subject to an increase of 33½ per cent.

Scotland. Solicitors' fees for conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in the "Parliament House Book" and in the "Scottish Law Directory." When a solicitor sues for payment of a professional account it is committed to the Auditor of the Court for taxation of his charges.

MEDICAL FEES

The following are the charges usually made by General Practitioners—

GENERAL PRACTITIONERS	RENTAL (OF PATIENTS' HOMES)		
	£50 to £75	£75 to £100	£100 to £200
Ordinary Visit	5s to 7s 6d	5s to 10s 6d	7s 6d to 12s 6d
Night Visit	15s to 20s	20s to 25s	25s to 30s
Mileage beyond two miles from Home	2s 6d	3s	4s
Detention per hour	5s to 7s 6d	5s to 10s 6d	7s 6d to 12s 6d
Letters of Advice	5s to 10s 6d	10s to 15s	15s to 20s
Attendance on servants	5s	5s	5s to 7s 6d
Midwifery	25s to 50s	25s to 40s	40s to 75s
Administering Chloroform	25s	25s to 40s	30s to 40s
CONSULTANTS			
Advice or Visit alone	3s to 5s	3s to 5s	3s to 5s
Advice or Visit with another Practitioner	2s to 4s	2s to 3s 6d	2s to 3s 6d
Mileage, by and to, from Home	2s	2s	2s

Special visits, of which due notice has not been given before the practitioner starts on his daily round are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

It is anticipated that the increase of 33½ per cent will be reduced by voluntary action by the profession in accordance with suggestions made by the Lord Chancellor (Viscount Bankes) in May 1923. The Lord Chancellor considered that there was a difference between non-contentious work and litigation and he suggested, as his personal opinion, that the 33½ per cent on litigation costs might be reduced to 25 per cent, and the 33½ per cent in respect of non-contentious work including scale charges might be reduced to 20 per cent. The Lord Chancellor was most anxious that the movement for a reduction should be a voluntary one coming from the solicitors themselves.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation, he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

STOCKBROKERS' CHARGES

The Rules and Regulations drawn up by the London Stock Exchange "Committee for General Purposes" are very voluminous and technical. The customary scale of brokerage is 5s per £100 on British (with some exceptions) or Foreign Government or American dollar stocks, and 20s per £100 on British Railway registered stocks. On shares not exceeding 15s the brokerage is 1d per share not exceeding 30s, 3d per share not exceeding 40s, 4½d not exceeding 60s, 6d per share, and 9d on their own minimum charges of 10s on less than £100 and £1 on over £100.

ACCOUNTANTS' CHARGES

The following scale of fees is generally applicable, but for special work fees are usually a matter of negotiation—

Company Audits—Fees fixed by Shareholders in General Meeting.

Preparing Balance Sheets, Investigating Accounts, &c.—Principals time, per day of seven hours, 5s to 10s. Managing Clerks (if chartered or Incorporated Accountants), 3s to 5s (not chartered or Incorporated Accountants), 1s to 2s (as other Clerks, 1s 6d and upwards). If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

Receivers, Liquidators and Trustees in Bankruptcy—Usually by percentage on realisation of assets and dividends paid.

Voluntary Liquidators—Usually fixed by the Company in General Meeting.

ARCHITECTS

Fees on New Works—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment and passing and certifying accounts, a percentage on the total cost of all executed works as follows—

(a) If the contract or order exceeds £5,000, the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £5,000, the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £5,000 as the special character of such works may render appropriate.

Alterations and Additions—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works—In addition to the percentage on the total cost of executed works the Architect is to be paid in respect of all works included in the tender or order but not executed, two thirds of the charge which would have been due upon them had they been carried out.

Partial Service—If the project or part of it be abandoned or if the services of the Architect cease or are dispensed with before a contract is entered into or order given the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows:—

(a) For making approximate estimate of cost by cubic measurement or otherwise one fourth of the percentage on the estimated cost of such works.

(b) For making approximate estimate of cost by cubic measurement or otherwise and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained two thirds of the percentage on the estimated cost of such works.

Installments—On a contract being entered into or order given for the works the Architect shall be entitled to an installment of two thirds of the charge (calculated on the total amount of the contract or order) and no part of such payment shall be liable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by installments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In all cases where work is executed wholly or in part with old materials or where material labour or carriage is provided by the Client the percentage shall be calculated as if the works had been executed throughout by a contractor and with new material.

Services Not Included in Percentage—The foregoing percentages do not cover the following services for which and for any other services not covered by any payment herein provided for additional charges may be made in accordance with the amount of work involved:—

Advancing as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels and making surveys, measurements and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in or addition to the Client's instructions or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings and other services involved in consequence of variations or additions desired by the Client after the commencement of the

works. Making extra drawings for the Clients or Contractors use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities or others and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire, flood or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

Housing Schemes and Laying Out Estates—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries and the Scottish Board of Health.

Approval of Plans—For approving plans submitted by a licensee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled and certifying a license when required the charge is as follows:—

For each £100 or part of £100 of the total cost up to £500 2½ per cent. (minimum fee £3 3s.)

For each £100 or part of £100 from £500 to £5,000 1½ per cent.

For each £100 or part of £100 above £5,000 1 per cent.

Litigation and Arbitration—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel attendances in Court or before Arbitrators or other tribunals and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

Land Surveying and Levelling—For surveying and making a plan of a town, village, street or road estate or grounds or any part thereof for taking levels, setting out streets or roads and for other services in connection with land not otherwise specifically provided for the charges are by time in accordance with Clause 22.

Sanitary Surveys—For inspecting, reporting and advising on the sanitary condition of premises the charge is by time in accordance with Clause 22 the minimum fee being £3 3s. in addition to the cost of assistance and appliances.

Fees—The above mentioned fees are in all cases exclusive of the cost of copies of documents, lithography, travelling and hotel expenses and all other disbursements which are to be charged in addition.

QUANTITY SURVEYORS

I.—ARCHITECTURAL WORK

Note—In cases where any of the materials used in construction are supplied by the building owner the percentage charge is based upon the estimated or actual value thereof.

Lump Sum Contracts

(a) Taking out and preparing Bills of Quantities—2½ per cent. upon the estimated cost of the work up to £5,000, 1 per cent. above £5,000.

(b) Pricing out estimates—½ per cent.

(c) Measuring and making up account of varia-

tions upon contracts including pricing — $\frac{1}{2}$ per cent upon the amount of the gross additions, and $\frac{1}{4}$ per cent upon the amount of the gross omissions

(d) Preparing approximate estimates — $\frac{1}{2}$ per cent upon the estimated cost

(e) Surveying work in progress taking particulars, and reporting for Interim (certificates — $\frac{1}{2}$ per cent upon the amount of the valuation)

(f) Taking particulars on site and writing specifications for works of alterations or repair including supervision if required — $\frac{1}{2}$ per cent on the amount expended or alternatively a charge based upon the time involved

Schedule Contracts

(a) Preparing, pricing and agreeing a schedule of prices — $\frac{1}{4}$ per cent upon the cost of the work

(b) Measuring, bringing to account and valuing work done — $\frac{1}{4}$ per cent upon the gross amount of the account

II — ENGINEERING WORK

Lump Sum and Schedule Contracts

Percentage charges half those for architectural work but the same scale in respect of charges based upon time

III — LITIGATION AND ARBITRATION

For qualifying to give evidence, settling proofs, conferences with solicitors and counsel, attendance in courts or before arbitrators or other tribunals and for other services in connection, the charge is based upon the time involved, with a minimum of 5 guineas per day

The above charges are exclusive of the cost of printing lithography and fair copies of accounts and in all cases travelling and other out of pocket expenses are payable in addition to the fees

CONSULTING ENGINEERS

On *Constructional Work* the payment is usually a commission upon the estimated or actual cost of works covered by the Engineers' Specifications and (or) Drawings, or alternatively an agreed fee. The total commission is normally 5 per cent unless such cost be less than £10,000 when remuneration is at a higher rate or by an agreed fee. Additional fees (usually 3 per cent increase) are payable for Reinforced (concrete work).

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyors' work) the usual charge is $\frac{1}{4}$ to $\frac{3}{4}$ per cent or an agreed fee

A copy of Professional Rules and Practice and Scale of Fees may be obtained (price 1s) from the Hon Sec of the Association, 22, Victoria Street Westminster, S.W. 1

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS

1 Sales by Auction

Freehold Leasehold and Copyhold Properties, including the preparation of particulars, and advising as to reserves — On the first £300 5 per cent, on the next £4,700, $\frac{1}{2}$ per cent on the residue $\frac{1}{4}$ per cent.

In addition to the above charges — On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber and Tenant right* under the conditions of sale, in addition to the purchase money of the property — $\frac{1}{2}$ per cent on £500 and $\frac{1}{4}$ per cent on residue, to include inventory and valuation

Where the division of an Estate into a number of lots involves substantial additional work, increased remuneration as arranged between the Vendor and Auctioneer

Sale before Auction

After issue of advertisements, the same scale as by auction

Non Sale

In the event of non-sale at the auction, a fee the amount of which is a matter of arrangement is payable

Sale after Auction

In the event of the property being sold within three months after the auction, the charges for non sale would merge into the ordinary commission then payable

Furniture Trade Stocks, and Chattels, on the Vendor's Premises — 5 per cent on the amount realised exclusive of preparation of catalogues

Plant and Machinery — 5 per cent on the amount realised, exclusive of preparation of catalogues

Live and Dead Farming Stock (except Horses Pedigree Live Stock, and Milk Recorded Cattle) — $\frac{1}{2}$ per cent on live stock and 5 per cent on dead stock on the amount realised

Horses Pedigree Live Stock and Milk Recorded Cattle — 5 per cent on the amount realised

On Lots referred to in the last four paragraphs *referred or bought in by or on behalf of the vendor* — One half the commission on sale, calculated on the amount of reserve or buying in price

2 Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases — On the first £300, 5 per cent, on the next £4,700, $\frac{1}{2}$ per cent on the residue, $\frac{1}{4}$ per cent, and a commission, in addition on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks, and other Movable Effects, Timber, and Tenant right*, of 5 per cent up to £500 and $\frac{1}{4}$ per cent on the residue to include inventory and valuation

NOTE — In Sales by Auction and Private Treaty Sales — Where two Agents are co-operating at the request of the owner the commission shall be at the rate of a scale and a quarter

3 Purchases.

Freehold and Copyhold Estates and Houses and Ground Leases — One half of the scale for sale by private treaty, calculated upon the amount of the purchase money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected the usual scale for valuation should be charged one guinea per cent on first £1,000, half a guinea on next £9,000, and a quarter of a guinea per cent beyond on the value of the property. Minimum fee, £5 5s

4 Lettings

Business Premises, Unfurnished Houses, Flats, &c. on or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise — If the annual value be £100 or less 5 per cent on one year's rent, where the term is for one year or less, and $\frac{1}{4}$ per cent on one year's rent where the term is for more than one year. If the annual value be over £100 the above scale shall apply to the first £500 and on the excess rental over that amount where the term is for three years or less 5 per cent on one year's rent, where the term is for more than three years, $\frac{1}{4}$ per cent on one year's rent in the case of *leases requiring the lessee to repair the demised premises* the commission is 10 per cent on one year's rent whatever the term. Upon the premium or consideration (in all cases), 5 per cent up to £1,000 and $\frac{1}{4}$ per cent on the residue, and the commission on any

sum obtained for fixtures furniture, or effects of any kind, of 5 per cent up to £500, and $\frac{1}{2}$ per cent on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property which an agent has been instructed to let or sell, is let by him with an option to purchase, and the tenant afterwards exercises his option the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent—5 per cent on the first year's rental and $\frac{1}{4}$ per cent for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation—Half the commission payable for a letting.

For Making or Checking Inventories of Furnitures and Effects—A minimum fee of two guineas per day, exclusive of expenses.

On Letting Land on Building Lease—(a) On ground Rents up to £50 one year's ground rent. (b) on Ground Rents exceeding £50 and not exceeding £100 as in (a) on first £50 plus 75 per cent on the residue. (c) on Ground Rents exceeding £100 and not exceeding £1,000 as in (b) on first £100, plus 50 per cent on the residue. (d) on Ground Rents exceeding £1,000 as in (c) on first £1,000 plus 25 per cent on the residue, together with 5 per cent on the first £1,000 of the premium and $\frac{1}{2}$ per cent on the residue.

On Assigning Building Agreements at a Premium—One half of the scale for Letting, Land on Building Lease, together with 5 per cent on the first £1,000 of the premium and $\frac{1}{2}$ per cent on the residue.

5 Collections or Receiverships

10 per cent upon gross rental of weekly property 5 per cent upon gross rental of other property or litters, $\frac{1}{2}$ per cent upon the gross rental for the management and collection of rents on agricultural estates, $\frac{1}{2}$ to 5 per cent on ground rents according to the amount of the rents and the number of collections.

6 Laying Out or Development of Estates

For Road Construction, 5 per cent upon the outlay, exclusive of expenses.

7 Valuations

1 Valuation of Freehold Copyhold or Leasehold Properties—A guinea per cent on the first £1,000 half a guinea per cent on the next £9,000, and a quarter of a guinea per cent beyond on the value of the property subject to a minimum fee of five guineas.

2 Of Property taken under Compulsory Powers—(a) For qualifying to give evidence the charge is on Ryde's Scale. (b) to the value preparing the case (including negotiation for a settlement where required) on third additional to Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3 Valuing for Annual Rental—(a) *Agricultural Property*— $\frac{1}{2}$ guineas per cent up to £50 5 guineas per cent on the next £50 and $\frac{1}{2}$ guineas per cent beyond. (b) *Business and Residential Property*—5 guineas per cent up to £300 and $\frac{1}{2}$ guineas per cent beyond. Minimum fee 5 guineas.

4 Valuation of Furniture Fixtures, Trade Stocks, and Effects—5 guineas per cent up to £500 and $\frac{1}{2}$ guineas per cent on the residue.

5 Valuation of Plant Machinery and Trade Stocks— $\frac{1}{2}$ guineas per cent on first £500, $\frac{1}{2}$ guineas per cent on the next £4500 on the next £5,000 2 guineas per cent over £10,000, by arrangement. Valuation to include inventory. Minimum fee, 5 guineas.

6 Valuation of Live and Dead Farming Stock—5 guineas per cent on first £500, and $\frac{1}{2}$ guineas per cent on the residue. *Valuation of Tenant Right*—5 guineas per cent on first £100 $\frac{1}{2}$ guineas per cent on next £900 and $\frac{1}{2}$ guineas per cent on residue. *For Settling Dilapidations*—5 guineas per cent on the amount of the settlement.

7 Valuation of Hotel and Public House Fixtures Fittings and Contents—5 guineas per cent on the amount of the valuation as settled.

8 Valuation for Probate and Estate Duty Purposes—(a) *For hold Copyhold and Leasehold Property*—One guinea per cent on the first £1,000 half a guinea per cent on the next £4,000 and one quarter guinea per cent on the remainder. Minimum fee £5 5s. (b) *Of Furniture and Effects*—5 guineas per cent on the first £100 and $\frac{1}{2}$ guineas per cent on the next £400, and $\frac{1}{2}$ guineas per cent of the remainder of the amount of valuation to include inventory. Minimum fee £5 5s.

9 Valuations for Rating purposes and Assessment Appeals—This scale applies to single Properties which have to be valued for Ratepayers Rating Authorities Assessment Committees or County Valuation Committees but does not apply to the preparation of new Valuation Lists or the assessment of Special Properties or all Licensed Premises in a Rating Area. Where the net annual value does not exceed £1,000 2 guineas per cent plus 5 guineas not exceeding £5,000 3 guineas per cent with minimum fee of 25 guineas not exceeding £10,000 4 guineas on first £5,000 and 2 guineas on residue not exceeding £30,000 5 guineas on first £5,000, $\frac{1}{2}$ guineas on next £5,000 and $\frac{1}{2}$ guineas on residue exceeding £30,000 2 guineas on first £5,000 $\frac{1}{2}$ guineas on next £5,000 $\frac{1}{2}$ guineas on next £10,000 and 2 guineas on the residue.

In addition to the foregoing for attending before Assessment Committees 5 guineas per day and before Quarter Sessions 10 guineas per day together with travelling expenses.

10 For carrying out of Dilapidations and settling the amount if required—5 guineas per cent on the amount. Minimum fee £5 5s.

11 Marking Valuation and Sale of Timber and Underwood—5 guineas per cent on amount realised. When valuing only, 5 guineas per cent on first £500, and $\frac{1}{2}$ guineas per cent on the residue.

Where one valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

SHIPBROKERS' CHARGES

A scale of Minimum Agency Charges became operative for Members of the Institute of Chartered Shipbrokers (Office, 24 4t Mary Axe, London E.C. 3) from Aug. 1, 1927. Copies may be obtained from the Secretary.

The Royal Navy.

construction

NON EFFECTIVE

Iron Duke (Battleship) has been rendered
unfit for warlike service but is kept for training
purposes Under the London Agreement,
cruisers reach the age limit in sixteen years
On Dec 31 1932 there were nine cruisers on the
list of 52 that were out of date, thus reducing
Effective list to 43 These aged ships are
mostly C's

NAVAL AIR WORK

Catapults have been, or are being, fitted to
20 capital ships and cruisers In 1932 3, *Hawker*
Nimrod (single seater) and *Hawker Osprey* (two
seater fighter reconnaissance) are replacing the
Flycatcher (1923) type for sea work

THREE POWER AGREEMENT 1930

Capital Ships (Number)	15	15	15
8 in gun cruisers	15	15(a)	15(b)
(tonnage)	146,000	120,000	108,400
6 in (tonnage)	192,200	143,500(b)	100,450
Destroyers (tonnage)	150,000	150,000	105,500
Submarines (tonnage)	52,700	52,700	52,700

Total tonnage 541,700 526,200 367,050

Notes: (1) U.S.A. undertake not to complete more
than 14 8 in gun cruisers before 1935
(2) U.S.A. retains option to treat in above figure for
8 in gun cruisers and to increase 6 in gun cruisers to 120,000
tons making parity with Brit Empire at 541,700 tons
If option is not exercised the 16th 17th and 18th 8 in
cruisers will be laid down in 1933 1934 and 1935 and
Japan will then be at liberty to claim at conference in
1935 an increase in its 8 in gun cruiser tonnage

FRENCH NAVY

Programme for 1932 designed to bring tonnage
to total of 670,000 towards desired total of 721,000
tons — Capital ships 175,000, Aircraft carriers
60,000, Cruisers and destroyers, 390,000 Sub
marines 65,000 New construction in 1932
Estimates — 4 Cruisers, 7,800 tons, 8 × 6 in
4 other vessels Post war Cruisers — 3 of 7,500,
7 of 10,000 (not all finished), 6 of 7,800 tons
(ordered and projected)

ITALIAN NAVY

Last (*Bolzano*) of the series of seven 10,000
Cruisers under the Washington Agreement was
launched at Milan, August, 1932

GERMANY'S "POCKET BATTLESHIPS"

Germany is building 5 "Pocket Battleships"
of 10,000 tons displacement, heavily armoured,
50,000 h.p., with 6 × 11 in guns (670 lb projectile),
8 6 in guns, and 4 3.5 in guns, with 6 torpedo
tubes "A" (*Ernst Reuss*) was laid down
at Kiel early in 1930

FLEETS OF THE MARITIME POWERS (Jan. 1933).

NOTE.—As a result of the London Naval Conference (Jan. 21–April 25, 1930) the British Empire, the United States and Japan undertook to proceed at once with the reduction of their capital ships, and all five Powers agreed to waive (during the years 1931–1936 inclusive) the right granted by the Washington Treaty to replace obsolescent ships.

PORT AND STARBOARD

In accordance with the provisions of the International Convention of 1929, the Admiralty have ordered from January 1, 1933, that the previous steering orders of "starboard" and "port" are to be used in the "direct sense," i.e. opposite to the previous meanings attached to those words. For a transitional period of six months, the orders will be given as "Wheel to starboard" or "Wheel to port" so that the men may become used to the new meanings before reverting to the single words. Under the new instructions an order of "Wheel to port" the wheel, ship's head and after end of the rudder blade will all go to port. The word "helm" is not to be employed.

NAVAL CASUALTIES IN THE WAR.

Casualties to all ranks of Royal Navy and Royal Naval Reserve including Mercantile Marine Reserve while serving in H M ships and merchant ships but excluding casualties of the Royal Naval Division and British Mercantile Marine losses —

Territorial Army

Territorial Army Nursing Service

Militia Units in Bermuda, Channel Islands and Malta

Officers Training Corps

THE MILITIA

In 1907 the Old Constitutional Force known as the Militia was transformed into the Special Reserve but the following Militia units were retained—the Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1922 the terms 'Special Reserve (and Extra Reserve) Battalions' were abolished, and 'Militia' restored but no appointments are at present made to the force. *Militia in the War*—At the outbreak of the Great War all units were embodied, the majority being included in Defence Schemes. One or two units served abroad, but, generally speaking, the units were employed as training and reinforcing centres for the Armies in the field.

THE TERRITORIAL ARMY

In 1907 the Yeomanry and the "Volunteers" were transferred into the Territorial Force which included English, Welsh, and Scottish Cavalry, Royal Horse Artillery, and Royal Garrison Artillery, Royal Engineers, Infantry, Royal Army Service Corps and Royal Army Medical Corps. In 1922 the title was changed to Territorial Army.

Territorials in the War—The strength of the Territorial Force in July, 1914 was about 265,000. During the Great War 320 new units were formed, and there passed through the ranks of the force about 90,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers and nearly 600,000 other ranks of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

OFFICIAL END OF THE WAR

The Official Termination of the War, when Treaties of Peace had been satisfied by the respective Governments, was Aug 31, 1918. The Ottoman Empire was excluded from the Order in Council, and War with Turkey was declared at an end on August 6, 1924.

STRENGTH OF THE AIR FORCE

The Air Estimates for 1932 show a maximum
number of Royal Air Force personnel allowed
for the year of 32,000 the same as for 1929.
These numbers exclusive of officers and airmen
serving in India are shown below—

	1932
Air Officers	38
Commissioned Officers	3,200
Cadets	140
Warrant Officers	512
Non Commissioned Officers	5,900
Aircraftmen	19,440
Aircraft apprentices	2,770
Total	32,000

The numbers recorded above include 3,476
officers and airmen in Technical Training and
Educational Services (including cadets and air-
craft apprentices under instruction) 1,076
Medical Services 225 Air Ministry and 899 in
Experimental and Research Services and
attached to Auxiliary and Reserve Forces

Air Force Reserve

The establishment of the Air Force Reserve
is 1,550 officers and 12,000 other ranks in 1932
the estimated strength on 1st January 1932
being 1,229 officers and 8,704 airmen (exclusive
of Permanent Staff) a total of 9,933

GREAT WAR CASUALTIES 1914-1918

THE CHURCH ASSEMBLY.

8, Dean's Yard, Westminster, S.W. 2.
(Hours 10 to 5)

Sessions of the Church Assembly in 1933—
Feb 6-10, June 12-16, Nov 13-17

MEASURE PASSED BY THE ASSEMBLY, 1932

(Date of Royal Assent is shown in brackets)

Benefices (Diocesan Boards of Patronage)
Measure, 1932 (June 16 1932)

THE CHURCH ASSEMBLY (or "National Assembly of the Church of England") was established in 1920, 'to deliberate on all matters concerning the Church of England and to make provision in respect thereof. The Assembly consists of three Houses composed of Bishops (Clergy, and Laity respectively). The first two Houses consist of the convocations of Canterbury and York, of which the respective Upper Houses form the *House of Bishops* and the respective Lower Houses the *Houses of Clergy*, the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conferences who consist mainly of representatives elected, either directly or indirectly by members of the Church of England on a roll prepared in each parish.

The Church Assembly is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the manner prescribed by the *Church of England Assembly (Powers) Act, 1919* often referred to as the "Enabling Act." It is specially provided that any innovation touching doctrinal formulae, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rites thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed by Parochial Church Meetings of parishioners who are members of the Church of England and by Church Councils elected by such meetings.

General Statistics—The number of baptisms in 1930 was 430,621 the Easter communicants in the various English Dioceses numbered 2,401,635. The total gross income of 12,807 incumbents was £6,523,257, including £200,000 contributed as Easter offerings. The stipends of the assistant clergy were £1,008,939. The amount of voluntary parochial contributions in the 43 dioceses of England was £6,833,000.

Central Board of Finance—Receipts in 1932 amounted to £135,692, of which sum Diocesan contributions amounted to £109,593. Below are the principal items of expenditure—

Training	Training for Holy Orders	£1,150
Religious education		31,267
Special purposes		359
Missionary Council		5,277
Investment of gifts to Capital		1,380
Clergy Pensions		50,000
Overseas Fund		623
Sponsors Scheme		16,535
General Administration (Convocations, Church Assembly, Central Board, Organisation &c., committees)		27,176
Total expenditure		£132,949
Total receipts		135,692

OFFICERS OF THE ASSEMBLY

Chairman, The Archbishop of Canterbury.
Vice Chairman, The Archbishop of York.
Secretary, Sir Philip W. Baker Wilbraham, Bart.

CONVOCATION.

Canterbury, Upper House.

President, The Archbishop of Canterbury.
Registrar, H. L. A. Dashwood.
Apparitor General, Sir John Huham Bt.

Lower House

Prolocutor, The Archdeacon of St. Albans.
Astutor, Guy Bowman.

York, Upper House.

President—The Archbishop of York.

Lower House

Prolocutor, The Archdeacon of Halifax.
Registrar, A. V. Hudson, Minister Yard, York.

* The Board also incurred a Capital Expenditure of £420,000 in connection with the rebuilding of training colleges the greater part of which was defrayed out of debentures issued and special contributions.

DIOCESES OF THE CHURCH OF ENGLAND.

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) prefer several years ago to retain in lieu of fixed annual money payments estates estimated at that time to produce the same annual income.

Province of Canterbury.

ST PATRICK'S NATIONAL CATHEDRAL, DUBLIN

Dean and Ordinary Very Rev. Hugh Jackson Lawlor, D.D., Litt D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz, 208 clerical and 426 lay)

Honorary Secretaries, Ven C. K. Irwin D.D. Very Rev. H. B. Kennedy, B.D.,

T. A. Macdonagh and Major L. H. C. Willesey

Secretary to the REPRESENTATIVE BODY (INCORPORATED 1870), A. B. Maude,

54 St. Stephen's Green E. Dublin

Chief Accountant—George H. Butler

By the Act of Union 1800 the Church of Ireland was united with the Church of England the Sovereign, is one of its members being supreme governor on earth. By the Act of 1869 this union was severed and on Jan. 1, 1871 the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments nothing being left but the right to the life services of the annuitant Bishops and Clergy (the annuities provided were committed for a capital sum) the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and outillage) and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 20 Diocesan Synods which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Parish of Vicarage* consisting of 7 persons viz. The Bishop 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan

Synod and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY composed of the Archbishops and Bishops 13 (clergymen and 26 laymen), chosen by the Diocesan Synods, with 230 elected members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £752,075 representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on Dec. 31, 1931 was only £13,961,257, charged with annuities to 4 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £20,927,366 made up of *Commutation* £13,961,257, *Private Endowments* £341,736, *Parochial Stipendation* £7,129,127, *Episcopal Stipendation* £572,087, *General Synod Funds* £273,488, and *Miscellaneous purposes* £2,146,930.

Since 1869 members of the Church have paid into the Representative Body a total sum of £10,884,318. The interest of the Diocesan and Parochial Stipendation and other funds is approximately £369,676. The total amount of *stipend* paid by parishes 1931 was £106,047 and the total amount paid for *stipends* under Diocesan schemes was £340,264.

THE CHURCH OF SCOTLAND

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly) to whom His Majesty the King has granted precedence in Scotland during his term of office next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown) who receives the sum of £2,000 towards his expenses. The country, for Church purposes was prior to the union of the Church of Scotland with the United Free Church of Scotland which was effected at a joint meeting of the General Assemblies of both Churches held on October 2, 1929, in the presence of H. R. H. the Duke of York as Lord High Commissioner divided into 16 Synods and 84 Presbyteries and there were about 1,800 ministers and licentiates engaged in ministerial and other work. The number of communicants on the roll (Dec 31, 1928) was 759,797. The sum of £800,865 3s 3d was (apart from Seat Rents levied by Church Authority and amounting to £73,371 6s 7d) but including legacies amounting to £45,230 6s 9d raised in 1928 for church and missionary purposes. Within the last 80 years considerably over 500 chapels at a cost for stipends and supplementary endowments of over £2,450,000, have been endowed and erected into parishes *quoad sacra*. The parish churches numbered 1,470. There were in addition 245 chapels and mission stations in all of which worship is regularly conducted. The figures applicable to the Church of Scotland as now united after 86 years of separation are only partly available.—

Congregations 2,920. Total membership 1,280,620. Sunday Schools 3,758 with 369,225 scholars and 47,795 teachers. In 20 Foreign Mission fields there are 581 Foreign Mission Agents (and in addition 195 missionaries wives, many of whom are doing mission work in the various fields) and 7,807 native agents, evangelists and teachers including in both cases the work of the Women's Foreign Mission.

Until 1560 the Church of Scotland was Roman Catholic but in that year the Scots Parliament abolished the jurisdiction of the Pope prescribed the Mass and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature and should be altered when they began to foster superstition. Presbyterianism was settled in 1560.

The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1600, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI alarmed the people, and the attempt of Charles I to impose on the Church a Book of Canons and a Liturgy was met by the National Covenant and the restoration of Presbyterian forms which culminated in the Westminster Confession of Faith in 1646. At the Restoration the Church again became Episcopal but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne (11)) the Church of Scotland was secured in its Presbyterian form of government and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In 1801 Parliament passed the Church of Scotland Act 1801, to declare the lawfulness of certain Articles declaratory of the constitution of the Church of Scotland. These Articles were framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee appointed by the Secretary for Scotland (under the Presidency of the late Viscount Haldane) enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments Bill) was introduced and was passed into law (15 and 16 Geo. V (33) in 1925. The primary purpose of this legislative measure was to transfer to and vest in the Church of Scotland General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirmation Act 1922 the whole properties and endowments belonging to the Church as it then existed for behoof of the latter.

LORD HIGH COMMISSIONER (1929) Sir Iain Colquhoun, Bt, D. 90, Holyrood Palace, Edinburgh.
MODERATOR (1929) Rt. Rev. Professor Hugh R. Mackintosh, D.D.
Senior Clerks: Rev. J. I. Cox, D.D., Very Rev. James Harvey, D.D.

Junior Clerk: Rev. J. G. Sutherland, D.D.

Procureur, Sir William Chree, K.C. LL.D.
Agents of the Church: J. A. S. Millar, M.V.O., W.S., 20 Castle St., Edinburgh. Arthur H. McLean, W.B. and L. McCandlish, W.S.

Chairman of General Trustees and Legal Adviser, J. A. S. Millar, M.V.O., W.S.
Parliamentary Solicitor, A. H. Spens, London.
General Treasurer, J. I. S. Watson, C.A., 121 George Street, Edinburgh.

OTHER PRESBYTERIAN CHURCHES

(x) *The Presbyterian Church in Ireland*—The largest of the Presbyterian churches in Ireland consists of 33 Presbyteries, 567 ministers, 547 congregations with 120,330 communicants, 94,141 families, 7,921 Sabbath school teachers and 95,027 scholars. During the 12 months ended Dec. 31, 1932, this branch contributed by congregational effort £328,644 for religious, charitable and missionary purposes. The total income for the period for all purposes was £467,951.—Moderator (1932), Rt. Rev. J. F. Macaulay, D.D. General Sec. Rev. W. A. Watson, M.A., D.D., Church House, Belfast.

(n) *The Presbyterian Church of England* has 14 Presbyteries, 353 congregations, 20 preaching stations and 84,298 members. It has a theological College (Westminster College, Cambridge), and supports 68 missionaries abroad, including 34 women. In 1932 the amount raised for all purposes was £347,860.—Moderator, Rev. J. M. Ferguson, M.A. Gen. Sec., Rev. Thomas Mackay, M.A. Church Offices, 25 Russell Square, W.C.1. Publications Office, 15 Warwick Lane, Paternoster Row, E.C.4.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence directly or indirectly, to the efforts of the Revd John Wesley (born June 17, 1703, died March 2, 1791) and his brother Revd Charles Wesley (born Dec. 18, 1707, died March 29, 1788).

A scheme for the re union of the Wesleyan Methodists the Primitive Methodists and the United Methodist Churches was approved by all three Conferences and an Enabling Bill was passed by both Houses of Parliament and received the Royal Assent. The final vote on Union (that is, the final vote prior to that of the Uniting Conference) was taken by the three Conferences in 1931 the majority of 75 per cent being requisite in each case. This vote took effect in 1932, the Uniting Conference meeting subsequently to the meeting of the several Conferences. The first United Conference will meet in 1933.

President (1932-1933), Rev John Scott Lidgett, D.D.

Secretary of the Conference, Rev Robert Bond

Wesleyan Methodists, the original body founded in 1739 by the two brothers. The first Conference consisting of six clergymen and four laymen was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics of Methodism throughout the world (1932) are: Ministers, 66,217; local preachers, 82,542; members and probationers, 10,088,547; Sunday schools, 92,608; officers and teachers, 961,327; scholars, 9,949,543; churches and other preaching places, 108,828. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head elected year by year. The Wesleys are governed primarily by the Conference, secondarily by the Synods, which are semi annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

The Primitive Methodists, who sprang up in Staffordshire in 1822 under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called 'camp meetings' the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision and were in consequence expelled. They and their sympathisers banded together in a new body with enlarged powers for the laity. Next

to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.

The United Methodist Church was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate fit in and independent of each other. These were—

The Methodist New Connexion which owed its origin in 1797 to the Rev. Alexander Kilham one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference should be constituted the source of all power in Methodism and that the Conference should consist of lay as well as ministerial members all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians founded in 1815 by Wm. O'Brien a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists formed in 1828 the Wesleyan Methodist Association which sprang out of a controversy in 1834 concerning the need for a trained ministry and the Wesleyan Reform Association founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination. The act of union of these three denominations into one took place in London on September 17, 1907, when the first United Conference was held.

INDEPENDENT METHODISTS

Independent Methodists. This body is Congregational in its organisation with an unpaid Ministry. Its first Conference was held in 1805.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with if any church denies it a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties. President and General Secretary (1932-33) Rev G. A. Metcalfe. Wesleyan Reform Book Room, 25 Change Alley Sheffield.

The Statistics relate to Great Britain and Ireland only and are for the year 1932

398 THE CALVINISTIC METHODIST CHURCH OF WALES.

The CALVINISTIC METHODIST or PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is a constituent of the Pan Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany. Churches and preaching stations in Assam, 1,367.

In 1931 the body numbered—churches, 1,491, chapels and other buildings for Sunday school branches 1,710, ministers and preachers, 1,150, elders, 7,523, communicants, 185,239, on probation, 867, Sunday school teachers and officers, 22,183; Sunday school scholars, 125,970 adherents (including communicants), 288,503. Contributions in aid of the Ministry in 1931, £199,283 for various religious purposes (in-

cluding the ministry), £422,125. Receipts from various funds, £27,300.

One of the features of the Welsh churches is the Sunday school, which is attended by adults as well as children, the vernacular is the language used generally in these schools. The English branch of the church has 376 chapels and preaching stations, with 34,849 communicants. All the rest are Welsh.

Moderator (South Wales) Synod, Rev J D Evans, M A, Aberystwyth, (North Wales), Rev W Wynia Davies, O B E, D D, Rhos, near Wrexham.

Moderator of General Assembly, Rev David Jones, 87 Botanic Road, Liverpool.

Chief Secretary, Rev D Unlio Davies, M A, Bryn Elwydd, Machynlleth, North Wales.

THE INDEPENDENTS

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1832 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1900 nine districts were formed, each under a Moderator. There are 31 county and other Associations in the British Isles, with 4,768 churches and preaching stations; the number of ministers in the British Isles is 2,886. *Chairman of the Congregational Union of England and Wales*, 1933-34, Rev H Elvet Lewis, M A. *Secretary*, Rev Sidney M Berry, D D. *Office and Publication Department*, 22 Memorial Hall, Faringdon St, E C 4.

The *Countess of Huntingdon's Connexion*, with 38 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E Dully Shelton. *Offices*, 41, Holborn Hall, Grays Inn Road, W C 2.

Minor Religious Denominations.

The General Assembly of Unitarian and Free Christian Churches, has about 330 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev Mortimer Rowe. 8 A Essex Hall, Essex Street, W C 2. The Brethren number about 80,000, of whom five eighths belong to the "Open body. The Society of Friends (Quakers) consists of 29,151 members in Great Britain and has 395 places of worship with 24 places of worship in Ireland and 2,122 members. *Central Office (Great Britain)*, Friends House, Euston Rd., N W 1, (Ireland), 6 Eustace Street, Dublin. The Churches of Christ have 14,777 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,729 teachers, and 16,811 scholars. The Church of Christ Scientist, has in the British Isles 240 branches of the *First Church of Christ, Scientist* in Boston, Mass., U S A. (*Offices*, Donington House, Norfolk St, Strand, W C 2) The Moravian Church (*Offices*, 32 Fetter Lane E C 1) has in the U K 42 congregations and preaching stations, with 3,341 communicants. The Catholic Apostolic Church has about 80 churches including a fine Gothic building in Gordon Square, W C 1. The New Church (Swedenborgian) 75 societies with about 6,700 registered members. The Latter Day Saints (Mormons) have 82 churches. The Free Church of England (otherwise called The Reformed Episcopal Church) is the Union of two denominations, the Free Church of England founded in 1844 and the Reformed Episcopal Church founded (in New York) in 1853. In England there are 50

AND THE BAPTISTS.

The BAPTISTS are similar to the Congregationalists in all respects but one—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1833. In the British Isles there were, in 1931 4,774 chapels and 2,037 pastors. The members numbered 406,216, Sunday school teachers 59,661, and Sunday school scholars 479,793. *President of the Baptist Union*, 1932-33, Alfred Ellis, I P. *Secretary*, Rev M E Aubrey. *Office*, 4, Southampton Row, London, W C 1.

The Baptist World Alliance (founded in 1905) is a Federation of National Conventions and Unions in more than 60 countries. Communicant membership about 11,500,000. *General Sec.*, Rev J H Rushbrooke, D D. *Office*, 4 Southampton Row, W C 1.

The Strict and Particular Baptists have about 600 places of worship in England and Wales, and 20,000 members, with foreign mission fields

churches. *Bishop Primus*, Rt Rev J Vaughan, D D, Emmanuel Rectory, Morecambe. *Gen. Sec.*, Rev A V Bland, D D, Rydal Mount, Morecambe. The Old Roman Catholic Church. *Archbishop in Gt Britain*, Most Rev Bernard Mary Williams, Madams Wood, Painswick, Stroud Glos. The Seventh Day Adventists (*Hdqrs*, Stanborough Park, Watford, Herts) have 66 organized churches, 36 companies and 4,736 members in the British Isles. The Greeks (*Branch of Western and Southern Europe*, Metropolitan of Ilyathia, Archbishop Germanos, 20 Newton Rd, Raywaster, W 3) have St Sophia's Cathedral (Moscow Road, W 2) and churches in Manchester, Liverpool, and Cardiff. The Armenians have a church in London (St Sarkis, Ixonia Gardens) and in Manchester (St Trinity, Upper Brook Street), the French, Dutch, Swedes, and Swiss in London, Norwich, Hull and Canterbury and there is a mosque for Moslems in Melrose Road, Southfields, S W 18, with a resident Imam.

The Chief Rabbi.

The Jews.—Among the inhabitants of the United Kingdom are about 300,000 Jews, mainly in London and other large towns, who possess 300 synagogues, with about 200 ministers and readers. *Chief Rabbi*, very Rev Dr J H Hertz. *Chief Rabbi's Office*, 4, St James's Place, Aldgate, E C 3. Their number in the British Empire totals 550,000, and throughout the world is computed at 15,000,000.

THE ROMAN CATHOLIC CHURCH

399

In England and Wales there are 4 Archiepiscopal and 24 Episcopal Sees, in Scotland 2 Archiepiscopal and 4 Episcopal Sees; in Ireland 4 Archiepiscopal and 24 Episcopal Sees. In the British Empire there are 40 Archiepiscopal and 225 Episcopal Sees, with 60 Vicariates and 31 Prefectures.

The Catholic Directory of 1932 estimates the Catholic population of England and Wales (1932) at 2,225,237, Scotland (1929) 607,753, Ireland (Census figures 1926) 3,172,697. The figures for India (1926) are 2,896,327, Ceylon (1922) 385,507, Canada (1921) 3,383,663, Australian Commonwealth (1921) 2,251,797, New Zealand (1923) 128,724, and Union of South Africa 173,956 the total for the British Empire being 16,328,159, and the Catholic population of the world is estimated at 334,664,791.

Holy Communion 8 a.m. Evening service at 6.30 p.m. (no tickets required for these services)

51 HOLY TRINITY, Vineries Aldgate E 1—(Disrupted and now a Sunday school) contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges.

52 MARYBONE CHAPEL, High Street, Marylebone W 1—The former Parish Church of the village of Marylebone (now replaced by St Marylebone Church) was rebuilt in early 18th century. In the churchyard lie Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician).

53 ST ALBAN, Brooke Street Holborn, E 1—A brick building by Butterfield (1858). Anglo-Catholic and noted for its music, organ by Willis. Local Rev R. S. Lives Services on Sundays. Holy Eucharist at 7 and 8. Choral at 10. Solemn with sermon at 11. Matins 10.30, baptisms and churchings at 11.15, children's service and catechism, 3 evenings at 6.30. Frequent mission services. Open daily 10.45 a.m. to 9 p.m.

54 ST ANDREW BY THE WINDROSE, Queen Victoria Street, F 4 (near the site of the King's Wardrobe). Rebuilt by Wren.

55 ST ANDREW, NORSWICH, St Mary Axe, Leadenhall Street, E C 2—An early 16th century church containing a monument of Stow, the London antiquary and a memorial of Holborn. The organ is by Rudolph Harris the rival of Father Smith.

56 ST ANNE, Waidm Street Soho, W 1—Built in 17th century and noted for its music. Monument of William Hazlitt in the churchyard.

57 ST BARNHOLM, W 1, Priory Church, Smithfield, E 1—The oldest parish church in London (A.D. 1123). Rector Rev Canon E. S. Savage. A fine old Norman building with tomb of the first prior Rahere. Transsept restored and reopened in June 1893. Crypt Lady Chapel and Cloisters opened 1905-1908. Open daily (Sundays 3 to 5 and for services 8.30, 11.10, 6.30).

58 ST BETH, Paul's Wharf, Upper Thames Street, E C 4, rebuilt by Wren 1683. Inigo Jones, 1573-1652 and his father and mother were buried in former church. St Benet is the Metropolitan Welsh Church.

59 ST BRIDEN'S CHURCH, Fleet Street F 4. Rebuilt by Wren with beautiful spire (1666). Samuel Richardson the novelist is buried in the nave. In the old church Lovelace, Sackville and Winkyn de Wode were buried, and Samuel Pepys was baptized.

60 ST CLEMENT DANES, Strand W 1—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I see p. 186) (son of Canute). The organ is by Father Smith the bells are those celebrated in the familiar nursery rhyme. Oranges and Lemons, and the air is among those played on the chimes (since 1900). Owing to the historical association of this church with the kingdom of Denmark Danish ceremonies are now and then performed there. In Johnson's pew in gallery and monument outside E end.

61 ST CLEMENTS, Clements Lane, Lombard Street E C 3. Rebuilt by Wren contains hand some carvings on pulpit and font, and some chained books.

62 ST DENNIS, 111 THE ELDER, Idol Lane, Lower Thames Street E C 3—Rebuilt by Wren with

fine tower and spire. East of church rebuilt, 1827-1828, contains many monuments.

63 ST EDMUND KING AND MARTIN, Lombard Street, E C 3—Rebuilt by Wren with altar at north end organ by Rudolph Harris. Restored and reopened 1919 after damage by Air Raid, July 7, 1917.

64 ST LITHBURGH, Bishopsgate E C 2 (14th and 15th century) with two Hudson windows—On April 9, 1607 Henry Hudson (the navigator who gave his name to Hudson Bay and to the Hudson River) his son John and his ten sailors took communion in St Lithburgh's purposely to see to sea four days after.

65 ST GEORGE'S, Hanover Square W 1 (18th century famous for fashionable marriages)—George Eliot, M. Asquith and Theodor Roosevelt were among those married here.

66 ST GEORGE'S, Southwark S E—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497-1569) and Edward Cocker (1631-1675), the author of Cocker's 'Arithmetick' (the expression 'ac-cording to Cocker' refers to this book).

67 ST GILES, Cripplegate E C 2 (14th century)—Contains the graves of John Milton, John Foxe and Sir Martin Robisher the Elizabethan seaman who attempted to discover a north west passage to Cathay and commanded the *Primrose* as vice admiral to Drake in his expedition to the West Indies.

68 ST HELEN'S, Bishopsgate E C 2—The 'Westminster Abbey of the City' from its numerous monuments building dated in 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice an American. In St Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1822.

69 ST JAMES'S, GARICKHILL, Garlick Hill F 4 has four stained glass windows one of which was seriously damaged by a bomb by a German air rider on June 13, 1917. It is proposed that the window should not be completely replaced and that year by year on the anniversary of the outbreak the congregation should assemble for a service of thanksgiving for merciful preservation from sudden and violent death. The Tomb Sermon will be a modern counterpart of the Lion Sermon (see St Katherine's Cathedral).

70 ST JAMES'S, Piccadilly W 1—Built by Wren, with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptized in St James's.

71 ST JOHN'S, St John's Square, Clerkenwell, I C 2. Built in early 18th century includes part of the ancient priory of St John (12th century crypt).

72 ST KATHERINE, 111 FLEET, Leadenhall Street E C 3. Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a cathedra wheel E window an organ by Father Smith Archbishop Laud's prayer book and bible and a monument of St Nicholas Broome. The 'Iron Sermon' is preached here annually before the Lord Mayor and Corporation of London to commemorate the capture of a Lord Mayor (Sir John Gay) from a lion in Algeria (Oct. 16, 1630).

73 ST MAGNUS, THE MARTYR, Lower Thames Street, E C 3—Rebuilt by Wren with steeple (185 feet) and lantern of great beauty contains the tomb of Miles Coverdale (1480-1568) translator of the Bible who was rector of St Magnus (1564-1566) and Bishop of Exeter (1557-1567).

74 ST MARGARET, Lothbury, E C 2—Rebuilt by

Wren contains Grinling Gibbons carvings (font, chancel screen, and pulpit)

97 MARGARET S. Westminster, S W 1—Founded 12th or 13th century, buildings date from 15th century, with frequent restorations. The parish church of the Dominions beyond the Seas

98 MARGARET PATTEN. Rood Lane East cheap E C 3—Rebuilt by Wren with a leaden spire contains two canopied pews and other curious survivals and relics

99 MARTIN S IN THE KIP IDE. Israfaelai Squair, S W 1—Built by James Gibbs (1721-6) in place of earlier church on same site. In register of burials are the names of Nell Gwynne (1687) Farquhar the dramatist (1707) and Roubiliac the sculptor (1765). A bust of James Gibbs by Fryback is in the church

100 MARY Aldermanbury E C 2—Rebuilt by Wren contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith 'drowned off Staten Island in 1782. John Hemmings and Henry Condill (Shakespeare's editors) were buried in the older church

101 MARY WOOLNETH (above the city and Smith London tube station) King William Street and Lombard Street E C 3—Built by Hawksmoor early 18th century organ by Father Smith contains a memorial to Sir Wm Phipps (Governor of Massachusetts who died in London in 1695)

102 MICHAEL PATERNOSTER ROYAL College Hill Upper Thames Street E C 4—Rebuilt after the Fire by Strong (a pupil of Wren) the former church contained the tomb of Dick Whittington and a Grinling Gibbons altarpiece

103 OLAVF Hart Street Mark Lane E C 3—A 15th century church which survived the Fire of London contains the tombs of Samuel Pepys and his wife and a monument of John Watts

President of the Council of New York also a memorial (formerly in All Hallows Staining) to Monkhouse Davison and Abram Newman the exporters of the chests of tea which were thrown into Boston Harbor Dec 16 1773. On Trinity Monday the Master and Brethren of Trinity House (91) attend service here

94 PAUL S Covent Garden W C 2—Built by Inigo Jones. The tombstones in the exterior of the church record the burial places of Samuel Butler (Humorist) Sir Peter Lilly (Painter), Wycherley (Dramatist) Grinling Gibbons (Wood carver) Dr Arne (Musician) and Macklin (Actor) Ellen Terry memorial

95 PETER S. Cornhill E C 3—Rebuilt by Wren contains a carved choir screen also ascribed to him. The organ is by Father Smith

96 SPENCER Holborn E C 3—Part of this church escaped the Fire (see footnote col 4) The organ is by Renatus Harris in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt John Smith (a sometime Governor of Virginia and Admiral of New England who would have been put to death but for the intercession of Pocahontas (Princess Pocahontas) is buried in Gravesend see p 481)

97 STEPHEN S Coleman Street E C 2—The Rev John Davenport who with other refugees landed at Boston in 1637 and founded the colony of New Haven, Connecticut, in the following year was vicar of this church from 1664 to 1633. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants

ST STEPHENS, Walbrook, E C 4—Rebuilt by Wren and consolidated, with Bow Church, 91, and St Brides 92, one of his greatest successes contains the tomb of Sir John Vanhugh (architect and dramatist), and a painting by Benjamin West

SAVOY CHAPEL, Savoy Street, Strand W C 2 (re built about 1505 on site of 13th century Savoy Palace restored after disastrous fire in 1864) Graves of Gavin Douglas and George Withers and memorials of D Oyley (arts), Laurence Irving, Sunday services at 11 15 and 6

ST SWITHINS CHURCH, St Swithins Lane F C 4 (re built by Wren after the Fire of London but since modernised)—Contains embedded in its external (S) wall London Stone (mentioned in King Henry VI Pt II), the millilium from which in Roman times the miles were measured

THE LITTLE CHURCH south side of Fleet Street E C 4—The largest of the five remaining round churches in England, the other four being the Churches of the Holy Sepulchre at (amidbury), Northampton Little Maplestead (Essex) and Ludlow. The Norman church, restored 1840-1845, is open to the public on week days, 10 30 a.m. to 4 p.m. Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday at 11 a.m. and 3 p.m. Service is discontinued in Aug and Sept. Master of the Temple Rev Spencer (cellar) Carpenter B.D.

WREN S CHURCHES—Many of the 9 churches in the city of London were destroyed by the Fire of London (Sept 6 1666). Fifty of these were rebuilt by Wren during the rebuilding of St Paul's Cathedral and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £63,786 10s 4½d the most expensive being St Mary le Bow £15,460 6s 8½d (£7,388 7s 7½d St Bow lower) and the cheapest St Vedast Foster (£2,853 15s 6d)

Church of Scotland

SCOTTISH NATIONAL CHURCH (Town Court Russell Street Covent Garden, W C 2) Sundays 11 15 and 6 30. Minister Rev J Moffett B.A. 15 Tavistock Street W C 1

Educational Statistics.

I—ELEMENTARY

Statutes require parents in *England and Wales* to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age, in *Scotland*, to provide efficient education up to 15 years, in *Ireland* to cause their children to attend school from 6 to 14 years.

In *England and Wales* (1929) there were 20,792 public elementary schools with accommodation for 7,109,385 pupils, an average attendance of 4,925,336. In addition, there were 127 special schools for blind and deaf children with accommodation for 9,284, and 463 for defective and epileptic children, with accommodation for 40,303. There were (1929) 33,698 certificated college trained men teachers and 64,068 women, 5,544 certificated not college trained men teachers and 20,053 women, and 2,048 uncertificated men and 29,942 uncertificated women.

In *Scotland* (1929) there were 2,915 primary schools with accommodation for 861,885, and average attendance of 584,473. There were (1929) 3,926 certificated men teachers and 15,128 women teachers, and 34 provisionally certificated women.

Elementary school education includes teaching in practical matters: needlework, drawing, gardening, handicrafts, cookery, &c.—and the relations upon health, medical attendance, physical training, evening play centres, home study, future employment, &c., show that the schools are valuable agencies in child welfare generally.

II—EDUCATION BEYOND ELEMENTARY

Secondary

The aims, methods, and institutions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, &c., employments.

In *England and Wales* (1929) the number of secondary schools recognised for grant was 2,342 with 20,249 full-time men and 20,265 full-time women teachers. The Authorities aim at securing graduate teachers as far as possible. The full-time pupils numbered 48,279 boys and 46,272 girls under 12, 140,844 13s and 119,395 girls between 12 and 16, 19,825 boys and 15,582 girls over 16, a total of 209,938 boys and 184,247 girls. Of these about one-fourth come up from elementary schools with free places, others with scholarships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. They are charged to most of the pupils. Of these efficient schools about 40 per cent receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The system in *Wales* is much the same as in *England* though the schools are under earlier statutory provisions, and are called 'Intermediate' in many cases. In *Wales* there is a central Welsh Board

In *Scotland* there are Preparatory and Secondary Departments under the same Commissioning and Local Authorities as the Elementary schools. In 1929 there were 207 Preparatory Departments with 76,092 children on the Register and average attendances of 66,247, and 222 Secondary Departments with 75,232 children on the Register and average attendances of 73,125. The Authorities aim at securing honours graduates as far as possible, and all teachers are certificated.

Technical

Technical Education in *England and Wales* is provided in Evening and similar schools and in Day Technical Classes and Technical Institutions (courses mostly controlled by Local Authorities). State grants are paid on the number of students, of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses, Tutorial Classes, and also Schools of Art, Branch Schools of Art and Art Classes. In *Scotland* Technical Education is provided in like manner.

Training

Training is provided by the State for Elementary School Teachers of whom 90 per cent have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the training of teachers for Secondary Schools a small annual State grant being made for the purpose, in *Scotland* all candidates for employment as teachers must undertake a course of training of at least one year in teaching.

Universities

Many of these institutions now receive annual State grants mainly in the form of 'block grants' paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in *England and Wales*. State grants to Irish institutions were transferred from the Treasury to the Irish Governments as from April 1922.

In 1930 32 the Professors and Undergraduates were approximately as under:

	Professors	Undergraduates
<i>England</i> (12)	3,900	34,960
<i>Wales</i> (2)	375	3,070
<i>Scotland</i> (4)	939	11,650
Total (18)	5,214	49,680

EXHIBIT III—EDUCATION 1929-30

(Out of the Parliamentary Vote)

	<i>England & Wales</i>	<i>Ireland</i>
Elementary	£2,827,065	£6,061,367
Higher	8,005,680	
Administration and Inspection	603,947	120,194
Teachers' Pensions	4,973,976	681,580
Museums, &c.	217,345	26,572
Deduct—		
Appropriations in Aid	5,129,492	757,555

Net Total .. £41,602,323 £4,172,162

THE UNIVERSITY OF LONDON.

South Kensington, S W 7. 1836, 1900 and 1929.

UNIVERSITY OF LONDON'S BUILDING SCHEME

IN 1925 the University of London with the assistance of a gift of £400,000 from the Rockefeller Foundation of America and a grant from H M Treasury, purchased a site in Bloomsbury immediately to the north of the British Museum upon which to erect a group of buildings which would form the headquarters of the University. The site, which is rectangular in shape and has an area of about 20½ acres is bounded on the west by Malet Street on the east by Russell Square and Woburn Square, on the north by Blyth Place and on the south by Montagu Place (with the British Museum on the other side of the road).

Before the war efforts were made to acquire this site, a considerable sum of money being raised for the purpose but for various reasons the scheme fell through and no further action was taken until 1920 when H M Government bought the site and offered it to the University subject to the condition that Kings College should vacate its present buildings in the Strand, the greater part of which are held on a Crown lease at a nominal rent. The authorities of Kings College were unable to agree to this proposal, and since the condition could not be fulfilled, the offer lapsed and the site was resold to the vendor by the Government. The purchase of the site by the University in 1927 was free from any such condition.

Since its acquisition, the problem of the development of the site for University purposes has been worked out stage by stage. With the assistance of the London County Council, parliamentary powers were obtained in 1928 for the closing of certain roadways which crossed the site, so as to secure a self contained estate for the central University area. With a view to avoiding inconvenience to the public and the

congestion of thoroughfares, the stipulation was made that before these powers were exercised certain of the roads surrounding the site should be widened and the cost borne by the University. The condition having been fulfilled, permission was given in February, 1932, by the Minister of Transport with the concurrence of the London County Council and the Holborn Borough Council, to the enclosing of the southern portion of the site. This was completed in the early part of 1932.

The buildings to be erected on the site will be mainly for various central institutions and activities for which inadequate or no accommodation exists at present. These include the University Library, the newly established Courtauld Institute of Art, the Institute of Historical Research and the Institute of Education. Suitable quarters will be provided for the central administrative staff, and it is hoped that it will also be possible to erect a large ceremonial hall and an adequate building for the University Union. Certain other institutions, notably the Birkbeck College and the School of Oriental Studies have been included provisionally in the building programme. With probably one or two exceptions it is not proposed to transfer to the site any of the Colleges of the University, in which the greater part of the teaching work of the University is conducted. The aim is to establish a centre for the University system which extends over the whole of London.

In the preliminary consideration of the question of development the University had the assistance of Mr H V Jauchester, F.R.I.B.A., who acted as consultant architect from 1929 to 1932. In June, 1931, Mr Charles Holden, F.R.I.B.A. was appointed Architect for all the buildings to be erected. Although the scheme will have to be carried out in stages, Mr Holden's first task has been the preparation of a general design for the whole site. It was requisite that any such design should have regard to the immediate and future need of the University that it should preserve on the site at least as much open space as now exists and that its scheme of buildings should not be out of harmony with other buildings adjoining the site. This task Mr Holden has accomplished and his design has been generally approved by the Court and Senate.

Towards the cost of building developments capital grants to an amount of £450,000 have been voted by the London County Council (the Corporation of the City of London have subject to certain conditions made a grant of £200,000 towards the cost of the Ceremonial Hall) whilst the Goldsmiths' Company have offered also conditionally £50,000 towards the cost of erecting and equipping the building of the University Library. Mr Samuel Courtauld has generously provided for the cost of the building for the Courtauld Institute of Art and the Czechoslovak Government have promised a substantial sum for a permanent home for the Institute of Slavonic Studies.

TABLES OF SESSION 1932-33

1st Term—October 6 to December 15, 1932

2nd Term—January 20 to March 22, 1933

3rd Term—April 25 to June 27, 1933

During the session 1932-33 the total admissions amounted to 11,018, the number of internal

Students reading for Degrees and Diplomas in July 1932, was 11,793

Vice-Chancellor, H. M. the King in Council

Chancellor, The Right Hon. the Earl of Athlone, K.G., P.C., G.C.B., G.C.M.G., G.C.I.O., D.S.O., D.C.L.

 Fellows (**FCI**) and Associates (**ACI**) are admitted after due training and examination

CHIROPODY

LONDON FOOT HOSPITAL SCHOOL OF CHIROPODY
 33 Fitzroy Sq. W. 1—Sec. A. Phillips **FCR**

COMMERCIAL EDUCATION

Commercial Students are well served by a number of independent schools or colleges in which class or private tuition is given or coaching undertaken by correspondence. Schools of Commerce can be found in practically every town. Book-keeping, Office Routine, shorthand languages, are the usual subjects. Nearly every Education Authority has its system of Evening Institutes (Session—September to Easter and sometimes July) in which tuition may be obtained in most Commercial and technical subjects. Classes are either free or subject to nominal charges.

The London County Council has Junior and Senior Evening Institutes to serve every district in the Metropolis. A child joining direct from an elementary day school and attending regularly can obtain all evening training from 6d upwards. A postcard addressed to the L.C.C. making a request for details will be promptly answered.

In addition to the Secondary Schools in London at which various stages of commercial training are included in the general subjects the L.C.C. has a series of voluntary and low fee Day Continuation Schools at which commercial and trade subjects are taught to children over 14 years. The L.C.C. has also several Central Schools at which free training is given to children 12-17 years in general education with either a commercial or industrial bias.

DEFENCE

IMPERIAL DEFENCE COLLEGE

9 Buckingham Gate, S.W. 1

LONDON HOSPITAL MEDICAL COLLEGE AND DENTAL SCHOOL—The largest general hospital in England. 839 beds in patients 1931, 24,304 out patients 81,389 attendances 498,645. Over 170 appointments are made annually from students of the College recently qualified. Resident appointments carry board and residence. Research Funds to the value of approximately £123,000. Scholarships to the value of £1,084. Prizes are awarded annually including 6 entrance scholarships of the value of £706—*Dean* Prof William Wright, D.Sc., *Sec.* F. J. Bindon

GUY'S HOSPITAL—Number of beds in constant occupation, 649. Number of new out-patients in 1931, 122,867. Clinical clerkships and dresserships held by all students. Resident appointments after qualification carry free board and residence.

Scholarships and Prizes amounting in all to nearly £1,000 are awarded annually. Residential college and club for students, adjoining the hospital—*Dean*, Prof I. H. Johnston, M.B., Ch.B., Sub-Dean, J. J. Conybeare, M.D., *Sec.*, J. H. E. Winston

ST THOMAS'S HOSPITAL (Founded 1228)—644 beds numerous prizes and scholarships, 50 house appointments and clinical assistantships open to qualified students twice yearly, clinical clerkships and dresserships are held without extra fees. The School Buildings are among the most complete in London. Fees, £50 per annum. A Residential Club includes dining club, reading and billiard rooms as well as resident accommodation for 60 students—*Medical Sec.*, R. J. C. Thompson, C.M.G., D.S.O., M.D., F.R.C.P.

ST GEORGE'S HOSPITAL MEDICAL SCH—Beds, 436, including 100 convalescent beds at Wimbleton. Numerous scholarships, &c. and 210 registrarships value £500 per annum—*Dean*, Anthony Leiling, M.D.

MIDDLESEX HOSPITAL—Number of beds, 470. Two entrance scholarships, value £100 each, also two of £50 and £60 for students of Oxford and Cambridge Universities. Total value of scholarships and prizes awarded annually exceeds £1,000—*Dean*, I. Izod Bennett M.D. F.R.C.P., *Secretary*, R. A.oley

ST MARY'S HOSPITAL—Number of beds, 331. In patients 1931, 5,550. Out patients 1931, 45,827. Five entrance scholarships, value £20 to £200, awarded annually in July—*Dean*, Dr C. M. Wilson *Sec.*, B. E. Matthews B.A.

CHAIKIN CROSS HOSPITAL MEDICAL SCHOOL—Number of beds, 300. In patients 1931, 5,000, out patients 27,000—*Dean* Eric A. Cook M.A., M.Ch. F.R.C.S.

WESTMINSTER HOSPITAL—Beds, 240—*Dean*, Sir Stanley Woodcock, C.M.C. C.B.F.M.D.

UNIVERSITY COLLEGE HOSPITAL MEDICAL SCHOOL, University St, W.C. 1—530 beds. A School of Final Medical Studies. Recently the recipient from the Rockefeller Foundation of New York of £835,000 for the advancement of medical education and research. Under this benefaction considerable additions have been made to the Hospital and Medical School. One of the Schools with Teaching Units in Medicine, Obstetric Medicine and Surgery. Forty seven appointments open to students and paid appointments to the annual value of over £2,000. Scholarships and Exhibitions to the value of over £1,000 awarded annually. There is a Students' Resident Hostel adjoining the school. The National Dental Hospital Great Portland Street forms the Dental Department and Dental School of University College Hospital—*Dean*, A. M. H. Gray, C.B.F.M.D. F.R.C.S., *Sec.*, R. Soley *Dee Dean*, Gwynne Williams, M.S., F.R.C.S. *Sub Dean* (for Dental Students), J. L. Dudley Burton F.M.S.B.A., F.D.S.

KING'S COLLEGE HOSPITAL (Medical and Dental Schools) Denmark Hill, S.E. 5—Number of beds, 384. Entrance Scholarships of a total value of £1,530 are offered annually. Four tutors and six Registrars are appointed annually, and sixteen Resident Medical Officers are elected half yearly, from among the qualified students—*Dean*, J. A. Drake, M.D., *Sec.*, B. C. Ranner, M.A. *Director* Prof J. C. G. Ledingham, C.M.G., M.B.

LONDON (ROYAL FREE HOSPITAL) SCHOOL OF MEDICINE FOR WOMEN, 8 Hunter St., Brunswick Sq., W.C.—Scholarships of the annual value of over £1,000 are awarded each year. Clinical work is carried out at the Royal Free and various Special Hospitals. Many appointments open to qualified students. Students chambers are provided in connexion with Medical School. Courses for dental students in conjunction with Royal Dental Hospital—*Dean* Miss Bolt M.I., B.S. *Warden and Sec.* Miss L. M. Brooks.

LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE, Keppel St., Gower St., W.C.—*Diploma in Tropical Medicine and Hygiene*—three courses of study annually. *Diploma in Public Health* (One year's course). *Diploma in Bacteriology*—One year's course. *Epidemiology and Vital Statistics*—three monthly courses. *Dean* Professor W. W. Jameson, Sec., R. W. Harris.

ROYAL ARMY MEDICAL COLLEGE, Millbank, S.W.2—*Commandt.* Maj Gen R. B. Ainsworth D.S.O., D.S.M.

ROYAL DENTAL HOSPITAL of London and School of Dental Surgery, 38 Leicester Square, W.C. Sec. Miss H. M. Duncan.

ROYAL NAVAL MEDICAL SCHOOL, Royal Naval College, Greenwich, S.E.30—*Director of Medical Studies* Surgeon Capt. S. Bradbury M.D., R.N.

OTHER METROPOLITAN SCHOOLS

WEST LONDON POST GRADUATE COLLEGE, West London Hospital, Hammersmith, W.6—Continuous instruction for graduates only. Three months Hospital Practice (including lectures and demonstrations), 9 guineas, one month 4 guineas, six months 7 guineas.

BRITISH POST GRADUATE HOSPITAL AND MEDICAL SCHOOL, Hammersmith Rd., W.6.

LONDON SCHOOL OF CLINICAL MEDICINE, Dreadnought Hospital, Greenwich, S.E. (for Post Graduates only)—also beds.

THE COLLEGE OF NURSING, Hamletta St. Cavendish Square, W.1—*Pres.* Miss M. E. Sparshott (B.F.R.C. *Chairman of Council*). Hon. Sir Arthur Stanley G.B.E. (B.M.O.), D.D. Sec. Miss Mary S. Randle B.R.C.D.N.

In addition to the Institutions mentioned below there are Faculties of Engineering at the Universities of Birmingham, Bristol, Cambridge, Dublin, Leeds, Liverpool, London, Manchester and Sheffield, Wales, St. Andrews, Glasgow and Edinburgh, Dublin National University, Ireland and the Queen's University of Belfast.

The principal technical institutes maintained or aided by the I.C.C. are the following:—

Institution entirely maintained by the L C C
BARRITT STREET LEADE SCHOOL, Oxford
 Street W 1.—Principal, Miss E. F. Cox, B A

BEAUFY INSTITUTE, Prince's Road, Vauxhall Street, S.E.11.—*Princ.* A. Ritchie-Scott, D.Sc., F.R.S.E.

BLOOMSBURY TRADE SCHOOL, Queen Square, Bloomsbury, W.C.1.—*Principal*, Miss A. Crawley, B.Sc.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Rd., S.E.5.—*Princ.* S. Thorogood, A.R.C.A.

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, P. H. Jowett, A.R.C.A.

CLAPHAM SCHOOL OF ART, Edgeley Road, High St., Clapham, S.W.4.—*Principal*, W. A. Wildman, A.R.C.A., B.B.A.

CLAPHAM TRADE SCHOOL, 373-7 Clapham Road, S.W.5.—*Principal*, Miss K. A. Corner, M.B.E.

HAOKNEY TECHNICAL INSTITUTE, Dalston Lane, E.8.—*Principal*, W. Rankine, M.B.E., M.I.M.E., M.I.Struct.E.

HAMMERSMITH SCHOOL OF BUILDING AND ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W.12.—H. W. Mole, A.R.I.H.A., M.I.Struct.E.

HAMMERSMITH TRADE SCHOOL, Lime Grove, Shepherd's Bush, W.12.—*Principal*, Miss M. A. J. Boon.

LONDON SCHOOL OF PRINTING AND KINDRED TRADES, 62 Stamford Street, S.E.1.—*Principal*, J. R. Riddell.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, Capt. L. N. Coombs, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltburn Crescent, W.—*Principal*, F. H. Reid, B.Sc., M.I.M.E.

PUTNEY SCHOOL OF ART, Oxford Road, Putney, S.W.15.—*Principal*, School of Building, Ferndale Road, Brixton, S.W.4.—*Principal*, F. E. Drury, M.Sc.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, J. Paley Yorke, M.Sc., A.M.I.E.E.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.4.—*Principal*, A. J. Bull, M.Sc.

SCHOOL OF RETAIL DISTRIBUTION, 66 Horseferry Road, S.W.1.—*Principal*, S. A. Williams, M.A.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N. (*branch at Old Castle Street, L.C.C. School*)—*Principal*, T. Reed, M.B.E.

SMITHFIELD MEAT TRADES INSTITUTE, Great Saffron Hill, E.C.1.—*Principal*, W. H. Nevell.

SOUTH EAST LONDON TECHNICAL INSTITUTE, Lewisham High Road, S.E.4.—*Principal*, G. A. Robinson, B.Sc. Eng., M.I.Mech.E., M.I.Struct.E., M.R.San.I.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the **WESTMINSTER SCHOOL OF ART**—*Principal*, J. N. Long, D.Sc. Eng. (London), A.M.I.Mech.E., *Head* (School of Art), Walter Bayes, A.R.W.S.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, G. F. O'Riordan, B.Sc., F.R.S.E., M.I.Mech.E., M.I.A.E., M.I.M.E.

BOROUGH POLYTECHNIC, Borough Road, S.E.1.—*Principal*, J. W. Blispham, O.B.E., M.A., B.Sc.

CHELSEA POLYTECHNIC, Manresa Road, Chelsea, S.W.3.—*Princ.* F. J. Harlow, B.Sc., M.B.E., Ph.D.

CITY OF LONDON COLLEGE, White Street, Moorfields, E.C.2.—*Director*, J. W. Ramsbottom, M.A., M.COB.

NORTHAMPTON POLYTECHNIC, St. John Street, E.C.1.—*Principal*, S. C. Laws, M.A., M.Sc.

NORTHERN POLYTECHNIC INSTITUTE, Holloway Road, N.7.—*Principal*, T. J. Drakeley, D.Sc.

NORTH WESTERN POLYTECHNIC, Prince of Wales Road, N.W.5.—*Principal*, F. E. Rowett, D.Sc., M.A.

REGENT STREET POLYTECHNIC, 309 Regent Street, W.1. "The Poly" comprises, on its educational side, a Day School of Commerce, an Evening School of Commerce, a Dept. of Industrial Administration and Business Management, and a School of Modern Languages—*Director of Education*, D. Humphrey, B.A., B.Sc.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, G. Patchin, A.R.S.M.

WOOLWICH POLYTECHNIC, William St., Woolwich, S.E.18.—*Principal*, E. Mallett, D.Sc., M.I.E.E., A.M.I.Bst.C.E., F.P.S.

Technical Institutes, &c., aided by the L.C.C.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.15.—*Warden*, Rev. J. Scott Lidgett, M.A., D.D.

BLUR COAT SCHOOL FOR GIRLS, 58 Point Hill, Greenwich, S.E.—*Headmistress*, Miss A. Ward.

CAMPDEN TECHNICAL INSTITUTE, Lancaster Road, W.11.—*Principal*, Miss G. L. Abbot.

CORDWAINERS' TECHNICAL COLLEGE, St. John's Lane, Finsbury, E.C.1.—*Principal*, B. Worswick, D.L.C., A.R.C.Sc., B.Sc., A.B.S.T.

GOLDSMITHS' COLLEGE, New Cross, S.E.14.—*Warden*, A. E. Dean, M.A., M.Litt.

KING EDWARD VII. NAUTICAL SCHOOL (British Sailors' Society), 680 Commercial Road, E.14.—*Secretary*, Herbert E. Barker.

LEATHERSELLERS' TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.1.—*Principal*, M. C. Lamb.

MARY WARD SETTLEMENT, Tavistock Place, W.C.1.—*Hon. Warden*, Horace Fleming, M.A., J.P.

MORLEY COLLEGE, 61 Westminster Bridge Road, S.E.1.—*Principal*, Eva M. Hubback, M.A.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen St., Borough, S.E.1.—*Lady Principal*, Miss E. A. Roberts.

ROYAL SCHOOL OF NEEDLEWORK, Exhibition Road, S.W.7.—*President* H. R. H. the Duchess of York; *Secretary*, Miss Barber.

SAILORS' HOME, Dock Street, E.1 (School of Nautical Cookery).—*Secretary*, Paymaster-Com A. E. Loder, R.N.R.

SCHOOL OF WOOD-CARVING, 39 Thurlow Place, S.W.7.—*Hon. Secretary*, Maj. C. T. P. Bailey.

TOYNBEE HALL, 28 Commercial Street, E.1.—*Warden*, J. J. Mallon, M.A.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.18.—*Principal*, D. N. Griffiths, B.Sc., M.I.Mech.E.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH SCHOOL OF ARTS AND CRAFTS, Lee Road, Blackheath, S.E.3.—*Principal*, John Platt, A.R.C.A.

ST MARTIN'S SCHOOL OF ART, 207 Charing Cross Road, W.C.2.—*Princ.*, G. R. Woolway, A.R.C.A.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northampton Polytechnic, and to Goldsmiths' College. A School of Art is also conducted by the City and Guilds of London Institute at the South London Technical Art School, 122-124 Kennington Park Road.

DISTANCE OF THE HORIZON.

THE limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below, which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of 5 ft.	the range is 2.9 miles.	At a height of 500 ft.	the range is 29.5 miles	At a height of 4,000 ft.	the range is 83.3 miles.
20	5.9 "	1,000 "	42.6 "	5,000 "	93.7 "
30	9.3 "	2,000 "	58.9 "	20,000 "	188.2 "
100	13.2 "	3,000 "	72.7 "		

Headmasters' Conference Schools.

433

THE HEADMASTERS' CONFERENCE—*Chairman* (1931) F. B. Malm (Wellington), *Secy.* W. A. Bulkeley-Evans, C.B.E., LL.D., 5 Paper Buildings, Temple, E.C. 4.—The Headmasters' Conference was founded in 1866 and incorporated in 1909. The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Governing Scheme or other instrument under which the School is administered, and if the School is maintained or aided by a Local Education Authority (a) how the Governing Body is constituted, (b) to what extent by right or in practice the Governing Body acts independently of the Local Education Authority in directing general policy or administering disposable funds, to the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or

other equivalent Examination, are continuing their studies beyond that stage. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town.

NOTES—(a) "Annual Fees" represent the average amount payable annually, *exclusive* of fees for optional subjects. The accepted practice is for a term's notice to be given before a boy is withdrawn, and a term's fee is usually payable if a withdrawal takes place without notice.

(b) "Headmaster." In certain Schools other titles prevail, e.g. Beaumont, "Rector"; Belfast Academical, "Principal"; Dulwich, "Master"; Edinburgh Academy, "Rector"; Glenalmond, "Warden"; Haileybury, "Master"; King William's, I. of Man, "Principal"; Liverpool College, "Principal"; Magdalen Coll. Sch., "Master"; Manchester Gr., "High Master"; Marlborough, "Master"; Radley, "Warden"; St. Columba, Dublin, "Warden"; St. Edward's, Oxford, "Warden"; St. Paul's, "High Master"; Stonyhurst, "Rector"; Victoria College, Jersey, "Principal"; Wellington, "Master".

THE BOYS' BRIGADE. (Incorporated.)

The senior boys' organisation, founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is over 100,000 officers and boys, with 50,000 juniors in The Life Boys—Abbey House, Westminster, S.W. 1.

CHURCH LADS' BRIGADE.

An organisation especially valuable for helping a parish to keep the elder lads to their religious duties; was founded in 1891, and combines a military method with moral and religious instruction. It is estimated that 1,000,000 lads have had the advantage of the Brigade's training, and to-day there are over one thousand Companies throughout the Empire, with upwards

of 60,000 lads—Headquarters, Aldwych House, Catherine Street, W.C. 2. *II Q. Staff Chaplain and Secretary*, Rev. C. M. Armitage, M.A.

THE BROTHERHOOD.

THE BROTHERHOOD MOVEMENT, "to lead men and women into the Kingdom of God, to unite in Brotherhood of mutual help, to win the masses of the people for Jesus Christ, and to encourage the study of social service," may be said to have been founded in 1895 as the outcome of the *Pleasant Sunday Afternoon* movement initiated by John Blackham of West Bromwich. The movement is non-political and unsectarian, and connected with it are other societies—Sisterhoods, P.S.A., Bible Classes, &c. *President*, W. H. Bolton; *General Secretary*, Rev. J. W. Tuffley; *Headquarters*, 37 Norfolk Street, Strand, W.C. 2.

NOTES.—(a) "Annual Fees" represent the average amount payable annually, exclusive of fees for optional subjects. (b) "Headmistress" In certain Schools other titles prevail, e.g., St. Paul's, "High Mistress"; St. Michael's, Bognor, "Lady Warden."

Secondary Schools.

A Secondary School, as defined by the Board of Education, is a school for pupils who intend to remain for at least four years, and up to at least the age of 10. It must provide a progressive course of general education of a kind and amount suited to an age-range at least from 12 to 17. The Board of Education issues annually a list of Secondary Schools recognized by the Board of Education as efficient, with the full official name of the school, the place where it is situated, the date of recognition, the fees payable and (in many cases) the examinations taken. A similar list is published for Wales and with less detail) for Scotland. The list, in the case of England and Wales alone, occupies over 130 pages.

SCHOLASTIC ASSOCIATIONS

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C.1. *President*, Frank Fletcher, M.A. *Joint Hon. Secs.*, W. Jenkyn Thomas, M.A.; F. R. Hurlstone-Jones, M.A.; *Hon. Treasurer*, F. B. Mahon, M.A.; *Asst. Sec.*, H. Marshall.—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Secy.*, Rev. C. B. Armstrong, M.A., St. Columba's College, Rathfarnham) is similar to the I.A.H.M. ASSOC. OF ASSISTANT MASTERS IN SECONDARY SCHOOLS, 29 Gordon Sq., W.C.1. *Sec.*, G. D. Dunkerley, B.Sc.

Income of fund to be devoted to the "Improvement of the well-being of the masses of the people of Great Britain and Ireland by such means as are embraced in the

meaning of the word 'Charitable' in Scots and English Law." The Trustees are concentrating upon the development of public libraries by means of grants (for book-purchase only) to municipal libraries; grants in aid of county library development and for the further development of the National Central Library. They are also helping to promote schemes of Regional Library co-operation. In the sphere of Rural Development and Social Service they are co-operating with the *National Council of Social Service* in the following:—Rural Community Councils, Village Halls, Educational Settlements in New Housing Estates, Young Farmers' Clubs, Music and Drama in Rural Areas, and Boys' and Girls' Clubs. In the sphere of Adult Education they are helping the *Workers' Educational Association*. They are also making grants for the re-organisation of public owned Museums. Grants are also made in aid of Public Playing Fields and certain forms of Music and the Drama. Grants to individuals are excluded, the organ grant policy has been discontinued, and in general grants are not made for the erection of buildings. *Management*—By Trustees. *Income* (1931)—£122,200.

KING EDWARD VII'S HOSPITAL FOR OFFICERS, SISTER AGNES, Founder, 17 Grosvenor Crescent, S.W. 1.

KING EDWARD'S HOSPITAL FUND FOR LONDON, 7 Walbrook, E.C. 4.—Founded in 1807 by the late King Edward (then Prince of Wales) to secure more efficient support for the London Voluntary Hospitals. The Fund makes annual grants to hospitals within a radius of 11 miles from St. Paul's Cathedral, including special grants for approved schemes of extension or improvement. Each individual claim is carefully considered, and every effort is made to encourage efficiency and economy of working. The Fund also holds inquiries and publishes reports on matters affecting the welfare of the hospitals, and by various methods seeks to arouse and to maintain interest in the hospitals and their work. Total receipts, 1931, £345,744; expenses, £13,215; grants to hospitals and convalescent homes, £294,639; funds in hand (including gifts to capital), £3,882,207.—*Pres.*, H.R.H. Prince of Wales. *Hon. Secs.*, Lord Somerset; Lord Luke; Sir Leonard Cohen; Sir Harold Verelst.—*Sec.*, H. R. Maynard.

THE UNION JACK CLUB,

Waterloo Road, S.E. 1. Tel.: Hop. 3511.

Patron-in-Chief His Majesty the King
Patroness-in-Chief Her Majesty the Queen.
Patrons H.R.H. The Prince of Wales, K.G.,
 H.R.H. The Duke of Connaught, K.G.

President. Sir Walter R. Lawrence, Bt.,
 G.C.B., G.C.V.O., C.B.

Vice-President Colonel Sir Henry Streetfield,
 G.C.V.O., C.B., C.M.G.

Hon. Treasurer The Marquess of Cambridge,
 K.C.V.O.

Comptroller of Club Vice Admiral E. Wigram,
 C.M.G., D.S.O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London, a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 21st, 1907, by His late Majesty King Edward VII. Membership is open to those below the rank of Officer who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and to the Navies, Armies and Air Forces of Foreign Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C.

officers and men may also be elected members of the Club.

The Club is managed by a Council and a General Committee, which includes representatives of the members.

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914-18 and to provide increased accommodation was completed in 1923.

Since 1925 the Council has been enabled, through the anonymous gift of one of its members, still further to enlarge the premises, bringing the number of beds available to 816, as against the original 208 when the Club opened.

THE UNION JACK HOSTEL,

Exton Street, Waterloo Road, S.E. 1.

Tel.: Hop. 2724. Opened June, 1913.

Patron-in-Chief His Majesty the King.
Patroness-in-Chief Her Majesty the Queen.
Patron. H.R.H. the Duke of Connaught, K.G.

President. Brig.-General Sir Frederick Gascoigne,
 K.C.V.O., C.M.G., D.S.O.

Vice President Sir Herbert J. Creedy, K.C.B.,
 K.C.V.O.

Hon. Treasurer The Marquess of Cambridge,
 K.C.V.O.

Secretary J. R. Hayward, M.B.E.

Warden Miss B. R. Morris.

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions are quite separate from one another.

THE SALVATION ARMY

THE SALVATION ARMY was founded by General William Booth (b. 1829, d. 1912). In Dec. 1931, the number of *Officers, Cadets and Employes* was 35,822, of *Corps and Outposts*, 15,467, *Local Officers* (unpaid) 119,142. The number of countries occupied was 84, and of languages used 75. Connected with the Salvation Army are 1,599 philanthropic institutions, including 324 Industrial Homes, 91 Maternity Homes and 104 Children's Homes, 166 Slum Posts, 25 Prison Gate Homes, 397 Shelters and Cheap Food Depôts for the Homeless, 129 Labour Bureaux, 12 Farms, &c., 973 Industrial and Day Schools. The total raised in the British Isles during 'Self Denial Week' in 1932 amounted to £148,220 16s. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 102 Queen Victoria Street, E.C. 4.—GENERAL, Edward J. Higgins (1929), Queen Victoria Street, London, E.C. 4.

GIRLS' LIFE BRIGADE (Inc.).

An organisation founded by the National Sunday School Union in 1902, with the supreme purpose of keeping girls in close touch with the church and Sunday School, and of training them for useful and noble Christian womanhood. Its four-fold programme covers every phase of a

girl's life. Spiritual, Physical, Educational and Social. This interdenominational temperance Movement has an international membership which is rapidly increasing.—*Headquarters*, 55 Old Bailey, London, E.C. 4.

LONDON FEDERATION OF BOYS' CLUBS

Incorporated (FOUNDED in 1887.)

Patron H.R.H. Prince Arthur of Connaught,
 K.G.

President: The Right Hon. The Lord Desborough,
 K.G.

The objects of the Federation are (a) To consolidate and extend the important work of Boys' Clubs in London. (b) To promote competitions and friendly intercourse between the members of affiliated clubs. (c) To promote opportunities for those interested in the management of London Working Boys' Clubs to interchange opinions as to the best way of conducting them. There are now 150 Clubs affiliated—the total membership of these clubs, of boys between 14 and 18, amounting to approximately 14,000. The Federation is almost entirely dependent upon voluntary subscriptions, although a certain amount of support is obtained from affiliated Clubs by means of registration fees and entrance fees for competitions.

SOUTH LONDON HOSPITAL FOR WOMEN (Incorp.), South Side, Clapham Common, S.W. 4. 235 beds.

ADELPHI, Strand, W.C. 2.—Adelphi Terrace and district commemorate the four architect brothers, James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. James, John, Robert, and William Streets (the last named is now Durham Street) commemorate these founders of the Adam style of architecture and internal decoration. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens, *q r*), the commemorative streets being Charles Street, *Villiers Street*, *Duke Street*, *Of Lane*, *Buckingham Street* (*Of Lane* is now "York Place").

AUSTRALIA HOUSE, Strand, W.C. 2.—A handsome and imposing building, erected 1911-4 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. The Agents-General for NEW SOUTH WALES, VICTORIA, SOUTH AUSTRALIA, and TASMANIA are accommodated in Australia House. QUEENSLAND and WESTERN AUSTRALIA have separate offices in the Strand.

BANK OF ENGLAND, Threadneedle Street, E.C. 2. (Not open to sightseers).—The Bank of England was founded in 1694, and, although a joint stock bank, has always been closely connected with the Government. The present building (now being enlarged) was erected from the designs of Sampson (1734) and Sir John Soane (1788). A "Bank Guard" is furnished every evening by the Battalion of Foot Guards on duty.

BETHLEM ROYAL HOSPITAL.—The site in Lambeth, formerly occupied by this institution, will be laid out as a public park under the supervision of the I.C.C., through the generosity of Lord Rothermere.

BELGRAVIA.—A fashionable district of London west of Buckingham Palace and south of Hyde Park, extends from Grosvenor Place on the east to Sloane Street on the west, and includes Belgrave, Chester, Lowndes, and Eaton Squares and Cadogan Place.

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, affording a fine view of the Pool and of the metropolis; *London Bridge* (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London) with the Monument (*q v*) and Fishmongers' Hall; *Southwark Bridge* (opened in 1820, and rebuilt by the Corporation of London, 1921); *St Paul's Bridge* (proposed to be built by the Corporation of London); *Blackfriars Bridge* (opened in 1869 and widened by the Corporation of London in 1908), width, 105 ft.; *Waterloo Bridge* (Rennie), width, 42 ft. 6 ins. (opened in 1817) commanding a fine view of western London (to be reconstructed or rebuilt by I.C.C.); *Hungerford Bridge* (for pedestrians only); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet, rebuilt and reopened in 1862, width, 84 ft.) with Thynne's *Boudicca* at the north-western end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (*q r*) and St Thomas's Hospital; *Lambeth Bridge* (rebuilt by I.C.C. and opened in 1932) leading from Lambeth Palace to Millbank; *Faulhall Bridge* (rebuilt in 1906) leading to Kennington Oval; *Victoria Bridge* (1896); *Chelsea*, leading from Chelsea Hospital to Battersea Park, and *Albert Bridge*

(1873); *Battersea Bridge* (opened in 1891); *Wandsworth Bridge* (opened in 1873); *Pulney Bridge* (opened in 1886) where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammer-smith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only); and *King Edward VII. Bridge, Kew* (rebuilt in 1902), leading to the Royal Botanic Gardens, Kew.—The County Councils of Middlesex and Surrey are building three new 70 ft. bridges over the Thames, at a total cost of £1,107,000 (a) Richmond to Twickenham (£345,000), (b) Chislewick to Mortlake (£255,000), (c) Hampton Court, in place of existing bridge (£180,000), the connecting roads will cost £307,000.

BUCKINGHAM PALACE, St James's Park, S.W. 1. (Not open to the public). Was purchased by King George III. in 1703 from the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Re-fronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

BURLINGTON HOUSE, Piccadilly, W. 1.—Occupied by Royal Academy of Arts (for annual exhibitions, see "Picture Galleries"), British Academy, Royal, Antiquarian, Astronomical, Linnæan, Chemical and Geological Societies.

CANADA HOUSE, Trafalgar Square, S.W. 1.—A conspicuous building on the Western side of the Square in which are the Offices of the High Commissioner of the Dominion and Officials dealing with Trade, Emigration, &c. Designed by Sir Robert Smirke in 1820, it was renovated and embellished when vacated by the Union Club. Certain interior features of the original building are preserved, and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Agents-General, Steamship, Railway and other Dominion Companies, the Canadian Building is one of London's new landmarks. It was opened by Their Majesties the King and Queen in June, 1925.

CANONBURY TOWER, Canonbury, N. 1.—A social club for tenants of the Marquess of Northampton's estates in the vicinity (in the remains of the 16th century house of the Priors of St. Bartholomew). Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen in the vicinity.

CEMETERIES. For *Bunhill Fields*, see p. 464. In *Kensal Green Cemetery*, North Kensington, W. 10 (70 acres), are tombs of W. M. Thackeray, Anthony Trollope, Sydney Smith, Shirley Brooks, Wilkie Collins, Tom Hood, W. Murelady, George Crichton, John Leech, Leigh Hunt, Brunel ("Great Eastern"), Ross (Arctic), Charles Kemble and Charles Matthews (Actors), Robert Owen (Social Reformer). In *Unghate Cemetery*, N. 6, are the tombs of George Eliot, Herbert Spencer, Michael Faraday, and G. J. Holyoake. In *Abney Park Cemetery*, Stoke Newington, N. 16, are the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines. In the *South Metropolitan Cemetery*, Notwood, E.E. 27, are the tombs of C. H. Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher, R. A., Theodore Watts-Dunton, Dr. Moffat (Missionary), Sir H. Bessemer, Sir H. Maxim, Sir J. Baring, Sir A. Manns, and J. Whitaker, F.R.S. (*Whitaker's Almanack*). **CREMATORIA.**—*Ufford* (City of London); *Notwood*, and *Golden's Green* (same), adjoining Hampstead Heath, with "Garden of

Rest and memorials to famous men and women. Since cremation was first instituted in 1885 there have been 65,000 cremations in Great Britain. Of these, 26,000 have been carried out at Golders' Green, 8,500 at Woking, 7,400 at Manchester, and the remainder at 20 different centres in Great Britain.

CENOTAPH, Whitehall, S.W. 1.—(Literally "empty tomb") Monument erected "To the Glorious Dead," as a memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the Great War. Erected as a temporary memorial in 1929 and replaced by a permanent structure in 1930. Unveiled by the King-Emperor on Armistice Day, 1930.

CENTRAL CRIMINAL COURT, Old Bailey, E.C. 4.—Built by Corporation of London, 1908-1907. Fine mural paintings by Sir W. B. Richmond and Professor Gerald Maier in Great Hall. To be viewed on Tuesdays and Fridays (from 10 to 4) when sittings of the Court so permit. Application to be made to the Keeper.

CHARTERHOUSE, in Charterhouse Square, E.C. 1 (Mader, Rev. W. B. Hayter, M.A.).—A Carthusian monastery until 1535, purchased from the Earl of Suffolk in 1611 by Thomas Sutton and devoted by him as a home for aged gentlemen (see "Brothers of Charterhouse," for patients in *see Times*, p. 11, Feb. 5, 1921). The buildings are partly 14th (but mainly 16th) century. Chapel, great hall, and staircase. Mon. Wed. and Fridays, admission 12 at 3 p.m. Service on Sundays at 8 and 11 a.m., and on weekdays at 9.30 a.m. and 6 p.m. Buildings not shown on Sundays. Roger Williams, the founder and governor of Rhode Island, U.S.A., was on June 25, 1631, elected a scholar of Sutton's Hospital.

CHICHESTER, S.W. 3.—A western metropolitan borough (see p. 683), with a fine embankment between Victoria and Battersea bridges over the Thames (see p. 478). "Chelsea Old Church" (All Saints) contains memorials of Sir Thomas More, Sir Hans Sloane, Shadwell (poet laureate) Woodfall (printer of "Junius"), and many other poets, Kneller, Turner, Rossetti, Whistler, Leigh Hunt and Carlyle (see p. 310) lived there. The borough was formerly famous for huns and porcelain.

CHICHESTER PHYSIC GARDEN, Royal Hospital Road S.W. 3.—A garden of general botanical research, established in latter part of 17th century by the Society of Apothecaries, occupies site presented in 1772 by Sir Hans Sloane. Transferred in 1899 to the Trustees of the London Parochial Charities. Tickets of admission for approved students obtainable from the Clerk to the Trustees, 2, Temple Gardens, E.C. 4.

CHICHESTER ROYAL HOSPITAL (founded by Charles II. in 1682, and built by Wren; opened in 1694). Royal Hospital Road, Chelsea, S.W. 3, for Old and Disabled Soldiers, Pensions and other War Trophies in the Great Hall. Accommodation for 558 in Pensioners. The extensive grounds include the former Wandsworth Gardens. Open daily 10 to 12 and 2 to 4, and on Sunday afternoons. *Governor, General Sir Walter P. Braithwaite, G.C.B. Lieut. Governor and Secretary, Maj.-Gen. G. J. Farmer, G.B., C.M.G.*

COLLEGE OF ARMS OR HERALDS' COLLEGE (see also p. 233), Queen Victoria Street, E.C. 4.—The Royal "Officers of Arms" ("Kings, Heralds and Pursuivants of Arms") were incorporated by Richard III., and acquired "Derby House" on

the site of the present College building from Queen Mary I. The building now in use was rebuilt after the Fire of London. The Powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to all State ceremonial, and the granting and use of Armorial Bearings, are exercised by this College. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m. Saturdays, 10 to 1.

COUNTY HALL, Westminster Bridge S.E. 1.—The Headquarters of the London County Council (see pp. 689-692) built on the Pedlar's Acre, Lambeth, from the designs of Ralph Knott, with a river façade of 750 ft. Cost about £4,000,000. The building contains a council chamber, reception hall, &c.

CUSTOM HOUSE, Lower Thames Street, E.C. 3.—Built early in 18th century, with a wide quay on Thames. The Long Room is 120 ft. long.

DEAN WACK HOUSE, 7 Wane Office Court, E.C. 4, Downing Street, Whitehall, S.W. 1.—Named after a politician of Charles II.'s reign. No. 10 is the official town residence of the Prime Minister, No. 11 of the Chancellor of the Exchequer, and No. 12 is the office of the Government Whips.

ELY PLACE, Holborn Circus, E.C. 1.—The site of the London house of former Bishops of Ely. The 14th century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk. A charge of 3d is made for admission to the crypt.

EMPIRE MEMORIAL HOSTEL (British Sailors Society), 747 Commercial Road, Limehouse, E 14.—A memorial erected by the women of the Empire to men of both sea services. The hostel contains 220 beds, a restaurant and recreation rooms, an additional wing is now being erected containing 100 cabins. Open daily, incl. Sunday, free, night porter in attendance.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W. 6.—The courtyard is 15th century remainder 18th century. Residence of the Bishop of London. Grounds of 37 acres surrounded by ancient moat. Previous application to visit should be made to the Bishop's Secretary.

GUILDHALL, King Street, City, E.C. 2 (dating from early 15th century).—Grand Civic Hall, where Sovereigns and Princes are entertained, Feudal Courts conferred, and the great City functions take place. Offices and Council Chamber of the Corporation of the City of London (see p. 684). Admission free. The salient contains Plan of London in 1570. Decd of Sale with Shakespeare's signatures, first, second and fourth folios of Shakespeare's plays, &c., and (with Newspaper Room adjoining) is open free on week days, 10 a.m. to 6 p.m. *Keeper of the Guildhall, G. W. Bodman (1922).*

GUY'S HOSPITAL, St. Thomas Street, S.E. 1.—Founded by Thomas Guy (a bookseller), in 1721: the main entrance and quadrangle (with statue of founder) are early 18th century. 648 beds.

HOLBORN VIADUCT, E.C. 1, was constructed in 1867-1869 by order of the Corporation of the City of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the "Hole-bourne"). The Holborn Valley Viaduct is 1,400 ft. long, and is mainly of brick with iron bridges over Farringdon Street and Shoe Lane. The cost (£2,571,000) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues, these dues were abolished in 1889 and 1902, and the loan is being otherwise discharged.

HONOURABLE ARTILLERY COMPANY'S HEAD QUARTERS, City Road, E.C. 2. — The H A C. (Sec. Maj. G. G. Walker, D.R.O., M.C.) received its charter of incorporation from Henry VIII in 1537, and has occupied its present ground since 1641. Four of its members—Duncan Keavne, Sedgwick, and Spencer—who emigrated in the seventeenth century, founded in 1638 the Ancient and Honourable Artillery Company of Boston, U.S.A. American soldiers and sailors may view the armoury, on request.

HORSE GUARDS, Whitehall, S.W. 1. — Archway and offices built about 1750. The mounting of the guard (Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guards Parade*, (300,000 sq. ft.), where the Colonel is "trooped" on the King's Birthday (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W. 1. — The "Palace of Westminster" was rebuilt in 1840-1850 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of £3,198,000. — Open to visitors on Saturdays, and on Easter and Whit Monday and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Stranger's Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains "Big Ben" (13½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

INNS OF COURT — The *Inner and Middle Temple*, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (q.v.) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. I) places the incident which led to the "Wars of the Roses" (1455-1485). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the library is 15th century and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres), the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C. 1, was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594), the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active but *Staple Inn* is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposite Gray's Inn Road), and the Hall, with hammer beam roof, is intact. *Clement's Inn* (near St. Clement's Dane's Church); *Clifford's Inn*, Fleet Street and *Thames Inn*, Holborn Circus. *Ser-*

jeants Inn, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1922.

KENSINGTON PALACE, W. 8. — Enlarged by Christopher Wren for King William III. (1691), and continued as a royal residence until 1762. The birthplace of Queen Victoria in 1819. Open on Saturdays and Sundays (March-Sept. 2 to 6; Oct. 2 to 5, Nov.-Feb. 2 to 4). *Kensington Gardens* (q.v.) adjoin.

KING'S COLLEGE HOSPITAL, Denmark Hill, S.E. 5. **LAMBETH PALACE** S.E. 1. The official residence of the Archbishop of Canterbury, on south bank of Thames, the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LAW COURTS, Strand, W.C. 2. — The Royal Courts of Justice were erected from the designs of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874-1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition).

Until they were occupied by the Supreme Court of Judicature (established in 1873 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (q.v.). The Central Hall is 138 ft. long.

LITTLE BRITAIN, Smithfield, E.C. 2. Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (q.v.).

LIVERY COMPANIES' HALLS. The Principal Companies (see p. 687) have magnificent halls, but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL, Whitechapel Road, E. 1. — Founded 1740. Hospital contains 843 beds.

LONDON MONUMENT (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3. — Built from designs of Wren, 1671-1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 303 feet high (the flames of fire 42 feet in addition), and is based on a square plinth, with fine carvings on W. face. Splendid views of London from gallery at top of column. Admission 3d, 9 to 6 (Oct.-April to 4).

LONDON UNIVERSITY. Administrative buildings, hall, union, &c., will be erected on 10-acre site in Bloomsbury. Foundation stone will probably be laid early in 1933. Office accommodation is at present afforded in the Imperial Institute Buildings, South Kensington.

LORDS CRICKET GROUND, St. John's Wood Road, N.W. 8. — The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket the scene of some of the principal matches of the season and Middlesex County headquarters. Admission to ordinary matches 1s., to special matches 2s. or 3s. (including tax). The public can obtain reserved seats on payment. Tennis Court in building behind members pavilion, where interesting games are played.

MANOR HOUSE, City, E.C. 4. — (Reconstructed 1920-31). The official residence of the Lord Mayor, the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 3,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield; *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street, *Spitalfields*, E 1 (Vegetables, Fruit, &c.), enlarged 1928, and opened by H. M. the Queen; *London Fruit Exchange*, Brushfield Street (built by Corporation of London 1928-9) faces Spitalfields Market; *Metropolitan Cattle Market* (Mon and Th); *General or Pedlars' Market*, Tu. and Fri.) and *Abchurch, Caledonian Road*, N. 1. Other markets are—*Convent Garden*, W.C. 2 (established under a charter of Charles II. in 1665) and *Borough Market*, S.E. 1, for Vegetables, Fruit, Flowers, &c. **MARLBOROUGH HOUSE**, Pall Mall, S.W. 1. (Not open to the public).—Built by Wren for the great Duke of Marlborough about 1710, and purchased as a London residence for the Prince of Wales in 1863.

MAYFAIR—A fashionable district of London, north of Buckingham Palace and east of Hyde Park, extends from Oxford Street (N.) to Piccadilly (S.), and from Bond Street (E.) to Park Lane (W.), includes Curzon Street and Grosvenor and Berkeley Squares. The most fashionable shopping centres of London are included in Mayfair in Old and New Bond Street and Oxford Street. Regent Street almost adjoins Mayfair.
